Handbook Of Prescriptive Treatment For Adults:

Handbook of Prescriptive Treatments for Adults Robert T. Ammerman, Michel Hersen, 2013-11-11 This book could not have been conceptualized or published 20 years ago Indeed it is doubtful that we could have organized the material for this handbook 10 years ago Over the last 20 years however the painstaking efforts of many clinical researchers working with a variety of resistive psychopathologies have resulted in specific psychotherapies and pharmacotherapies that are effective with a significant proportion of patients at least for some of the disorders Much clinical research remains to be carried out in the forthcoming decades But now that we are nearing the 21st century at least some statement about efficacy can be made In 1967 Gordon Paul succinctly stated that the ultimate goal of treatment outcome research is to determine What treatment by whom is most effective for this individual with that specific problem and under which set of circumstances p 111 At that time empirical evaluations of psychosocial and pharmacologic treatments were few and far between Methodological strategies for determining treatment effectiveness were also in the formative stage as exemplified by introduction of control groups that received inactive interventions i e placebo and the relatively recent practice of comparing two or more treatments in addition to placebo In the almost three decades since Paul's oft quoted dictum both the quantity and the quality of treatment outcome research with adults have increased dramatically *International Handbook of Cognitive and Behavioural Treatments for Psychological Disorders* V.E. Caballo, 1998-11-27 This handbook shows the wide perspective cognitive behavioural treatment can offer to health professionals the vast majority of whom now recognize that cognitive behavioural procedures are very useful in treating many mental disorders even if certain disciplines continue to favour other kinds of treatment This book offers a wide range of structured programmes for the treatment of various psychological psychiatric disorders as classified by the DSM IV The layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment It is divided into seven sections covering anxiety disorders sexual disorders dissociative somatoform impulse control disorders emotional disorders and psychotic and organic disorders Throughout the twenty three chapters this book offers the health professional a structured guide with which to start tackling a whole series of mental disorders and offers pointers as to where to find more detailed information The programmes outlined should it is hoped prove more effective than previous approaches with lower economic costs and time investment for the patient and therapist

Psychopharmacology Handbook for the Non Medically Trained Sophia Dziegielewska, 2006-08-08 In today's era of managed behavioral health care mental health professionals are called upon to consult on medication treatment or recommend what medications would best serve as adjuncts to therapy Medically trained or not all mental health professionals need to know as much as possible about psychopharmacologic medications from dosage and side effects to drug drug interactions and other special considerations in order to provide effective and accountable treatment The first ever handbook of its kind *Psychopharmacology Handbook for the Non Medically Trained* fills a noticeable gap in most student

training programs by providing a reader friendly and accessible overview of the role of drugs in mental health treatment Emphasizing the importance of making medications available to consumers in conjunction with the most effective and efficient counseling interventions Dziegielewska establishes the context for the therapeutic use of psychotropic drugs in the culture of today s mental health treatments examines the danger of the quick fix mentality into which consumers and clinicians are tempted to fall and then focuses on the medications themselves One of the most prominent and authoritative social work academics today Dziegielewska is an authority on the topic of psychopharmacology in social work practice The recipient of numerous honors and awards for her teaching the creator of a popular preparation course for social work licensure and the author of over 95 publications she is a source to which students and professionals turn for up to date accurate information on a variety of topics in the social work field Psychopharmacology Handbook for the Non Medically Trained is an invaluable resource guide for all non medically trained practitioners providing therapists social workers and other counselors with effective tools and critical information to help them become better informed about all courses of mental health treatment for their clients **Oxford Handbook of Personality Assessment** James N. behavioral and cognitive models **Psychological Treatment of Older Adults** Michel Hersen, Vincent B. Van Hasselt, 2013-06-29 This multiauthored introductory textbook could not have been conceived or brought to fruition 10 or 15 years ago. Indeed, at that time, relatively little attention was accorded to the psychological needs of older adults. The general tenor of the field then was that older adults would not benefit from psychological intervention. As we now know, this was a faulty assumption that has been discredited with empirical data. Indeed, clinical research data adduced primarily in the last decade clearly documents that older adults do benefit from specific psychotherapies that are tailored to their unique presentation of symptoms. Given the explosion of interest in this area, as evinced by increased investigatory activity, national funding, and media attention, and the increased number of masters and doctoral level courses devoted to this topic, we felt that the time was right for a textbook in the area. Such flurry of activity also has been fueled by statistics showing how our population by the year 2030 will consist of 30% who are senior citizens. Moreover, since 12% of older adults in the community are estimated to have diagnosable psychiatric disorders and 40% to 50% of older adult medical inpatients have a concomitant psychiatric disorder, the task for clinicians in the next century will be overwhelming. *The Oxford Handbook of Obsessive Compulsive and Spectrum Disorders* Gail Steketee, 2012 A review of current literature on obsessive compulsive disorder (OCD) and its associated spectrum conditions, including body dysmorphic disorder (BDD), hoarding, trichotillomania, tic disorders, and Tourette's Syndrome. *Principles and Practice of Behavioral Assessment* Stephen N. Haynes, William Hayes O'Brien, 2003-10-27 Behavioral assessment is a psychological assessment paradigm that emphasizes empirically supported multimethod and multi-informant assessment of specific observable behaviors and contemporaneous causal variables in the natural environment. The behavioral assessment paradigm stresses the use of well-validated assessment instruments and assumptions that social, environmental, cognitive, and physiological variables are often important sources of behavior variance. The behavioral assessment paradigm has had a major influence on the field of psychological assessment. It has affected the way research on the causes of behavior disorders is conducted, the way treatment processes and outcomes are evaluated, and the way treatment decisions are made. The goal of this book is to present the characteristics and underlying assumptions of the behavioral assessment paradigm and to show how they affect the strategies of behavioral assessment. Although all of the concepts and strategies discussed in this book are applicable in the research, this book focuses on the use of behavioral assessment to guide clinical judgments. **Practitioner's Guide to Empirically Based Measures of Anxiety** Martin M. Antony, Susan M. Orsillo, Elizabeth Roemer, 2006-04-10 This volume provides a single resource that contains information on almost all of the measures that have demonstrated usefulness in measuring the presence and severity of anxiety and related disorders. It includes reviews of more than 200 instruments for measuring anxiety-related constructs in adults. These measures are summarized in quick-view grids which clinicians will find invaluable. Seventy-five of the most popular instruments are reprinted, and a glossary of frequently used terms is provided. Standards and Guidelines for the

Ammerman, 1993 Provides guidelines for treatment of children and adolescents that are derived from the empirical literature The Handbook is divided into three parts Part One consists of an introductory chapter Part Two which comprises the bulk of the book is composed of chapters examining specific disorders w **Effective Brief Therapies** Michel Hersen, Maryka Biaggio, 2000-06-05 This treatment guide is based on selected disorders taken from the American Psychiatric Association DSM IV Diagnostic Classifications The disorders selected are treatable or responsive to brief therapy methods The therapist or student in training can use this book to identify the elements needed for formulating a treatment plan on disorders typically encountered in clinical practice The approaches taken are based on cognitive behavioral principles and makes use of empirical findings However the case study format allows the reader to see how the assessment and treatment is implemented in a real life patient and not as a clinical abstraction distilled from research studies Moreover the treatment plan is outlined in a manner that makes reimbursement likely from managed care organizations and insurance companies Effective Brief Therapies is useful as a reference for therapists and as a training guide for graduate students Case Descriptions Treatment Conceptualization Assessment Techniques Treatment Implementation Techniques Concurrent Diagnoses and Treatment Complications and Treatment Implications Dealing with Managed Care and Accountability Outcome and Follow up Dealing with Recidivism Comprehensive Behavioral (ComB) Treatment of Body-Focused Repetitive Behaviors Charles S.
