The World of the Imagination Eva T. H. Brann,1993-03-16 In this book Eva Brann sets out no less a task than to assess the meaning of imagination in its multifarious expressions throughout western history The result is one of those rare achievements that will make *The World of the Imagination* a standard reference **Human Memory** Robert L.

Greene,2014-01-02 The fact that cognitive psychology has become largely concerned with a handful of laboratory tasks has brought expressions of concern and suggestions about how to place the field on a more solid footing The view expressed here however is that the classic cognitive paradigms have become fascinating puzzles on which some of the best minds in the field have labored An examination of the development of research in these areas yields many examples of the scientific method at its most sophisticated as well as impressive examples of how theories and data can interact Covering the whole temporal range of memory experiences this volume provides a review of the major paradigms that have been used by experimental psychologists to study human memory Handbook of Mental Health and Aging James E. Birren,Gene D. Cohen,R. Bruce

Sloane,Barry D. Lebowitz,Donna E. Deutchman,May Wykle,Nancy R. Hooyman,2013-10-22 This book is a thorough revision of one of the most comprehensive reference volumes for persons working in the area of aging and mental health The thrust of the work is interdisciplinary and discusses research on both clinical and practical issues in aging and mental health The multidisciplinary nature of this book and the inclusion of subject matter from the professional as well as research realm result in a level of comprehensiveness which is distinct in the field of mental health and aging Each chapter contains a comprehensive bibliography the compilation of which represents a definitive reference source in the field The chapters review state of the art research in the biological behavioral and social sciences and represent the cutting edge of current practice in psychiatry neurology social work nursing psychology and pharmacology among other professions The compilation of prevalence data is a much needed addition to the current literature The multidisciplinary nature of this book and the inclusion of both clinical and practical issues makes the book distinctively comprehensive **Interlingual Processes** Hans-Wilhelm

Dechert,Manfred Raupach,1989 Generative Mental Processes and Cognitive Resources U. Hecker,Stefan Dutke,Grzegorz Sedek,2012-12-06 In recent years a booming research interest has been observed in linking basic cognitive processes with a variety of social and clinical phenomena Evidence comes from the increasing popularity of psychological paradigms such as social cognition cognitive psychopathology or cognitive aging What links those paradigms is their special focus on explaining cognitive phenomena by use of the concept of mental resources Immediate reasons for such a focus are found in the growing emphasis on understanding everyday dynamics of thinking and acting within a complex world as well as within personal

constraints Obviously our current goals and choice of activities constrain and influence our reasoning as well as the processes of input to and retrieval from memory Situational demands will act to the same effect and the interplay between both internal and external constraints makes apparent a first and straightforward relevance of the resource notion in action oriented cognitive research For example person perception is a dynamic process depending on what my goals in perception are what the perceiving situation is that I find myself in and how complex the target characteristics are In fact the amount of resources spent in this process may be reflected in its speed the quality of the perceptual or mnemonic trace which is being created or the kind of social or non social behavior that can be supported

Basic Processes in Memory Development

C.J. Brainerd, M. Pressley, 2013-11-11 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series

Subtypes of Learning Disabilities Lynne V. Feagans, Elizabeth J. Short, 2012-11-12 Although experts agree that various types of learning disabilities do exist few attempts have been made to classify learning disabled children into subtypes The editors of this collection feel that the lack of subcategorization has frustrated previous research efforts to obtain a generalizable body of knowledge in the field To meet this critical need for definitive information this book presents basic reviews and theoretical approaches used to subtype learning disabled children ranging from a behavior genetics approach to a dimensional approach It also demonstrates actual research methods utilizing theoretical approaches

Image And Brain Stephen M. Kosslyn, 1996-08-26 This long awaited work by prominent Harvard psychologist Stephen Kosslyn integrates a twenty year research program on the nature of high level vision and mental imagery Image and Brain marshals insights and empirical results from computer vision neuroscience and cognitive science to develop a general theory of visual mental imagery its relation to visual perception and its implementation in the human brain It offers a definitive resolution to the long standing debate about the nature of the internal representation of visual mental imagery Kosslyn reviews evidence that perception and representation are inextricably linked and goes on to show how quasi pictorial events

in the brain are generated interpreted and used in cognition The theory is tested with brain scanning techniques that provide stronger evidence than has been possible in the past Known for his work in high level vision one of the most empirically successful areas of experimental psychology Kosslyn uses a highly interdisciplinary approach He reviews and integrates an extensive amount of literature in a coherent presentation and reports a wide range of new findings using a host of techniques

Hippler, Norbert Schwarz, Seymour Sudman, 2012-12-06 Survey researchers have long been aware that the way in which questions are asked determines the obtained responses However the exact processes that mediate response effects remained elusive In the present volume cognitive psychologists and survey methodologists explore the cognitive processes that underlie respondents answers to survey questions The contributors provide an introduction to information processing theories for survey researchers review current knowledge of response effects in the light of recent theorizing in cognitive psychology and report a number of experimental studies on question context and question wording In combination the chapters provide a theoretical framework for the analysis of response effects in surveys and raise a number of applied and theoretical issues that have so far not been addressed in cognitive psychology
