An Economic Theory of Cities Wei-Bin Zhang, 2012-12-06 Over more than two centuries the development of economic theory has created a wide array of different concepts theories and insights My recent books Capital and Knowledge Zhang 1999 and A Theory of International Trade Zhang 2000 show how separate economic theories such as the Marxian economics the Keynesian economics the general equilibrium theory the neoclassical growth theory and the neoclassical trade theory can be examined within a single theoretical framework This book is to further expand the framework proposed in the previous studies This book is a part of my economic theory with endogenous population capital knowledge preferences sexual division of labor and consumption institutions economic structures and exchange values over time and space Zhang 1996a As an extension of the Capital and Knowledge which is focused on the dynamics of national economies this book is to construct a theory of urban economies We are concerned with dynamic relations between division of labor division of consumption and determination of prices structure over space We examine dynamic interdependence between capital accumulation knowledge creation and utilization economic growth price structures and urban pattern formation under free competition The theory is constructed on the basis of a few concepts within a compact framework The comparative advantage of our theory is that in

providing rich insights into complex of spatial economies it uses only a few concepts and simplified functional forms and accepts a few assumptions about behavior of consumers producers and institutional structures *Handbook of Regional and Urban Economics* P. Nijkamp, Edwin S. Mills, P. C. Cheshire, 1986 This second volume of the Handbook presents professional surveys of all the important topics in urban economics The first section contains 6 surveys on locational analysis the second 5 surveys of specific urban markets and the third part presents 5 surveys of government policy issues The book brings together exhaustive research by distinguished scholars from many countries It is the only complete survey volume of urban economics and should serve as a reference volume to scholars and graduate students for many years For more information on the Handbooks in Economics series please see our home page on <http://www.elsevier.nl/locate/hes>

New Models in Geography Richard Peet, Nigel Thrift, 2002-09-11 Two decades after the publication of the seminal *Models in Geography* edited by Richard Chorley Peter Haggett this major collection of specially commissioned essays charts the new human geography from the perspective of political economy Providing surveys of recent trends in theory bibliographic guides to the literature and pointers to advances and frontiers in thinking the book ranges from cultural to economic and urban geography The authors explore the connections between political economy and geographical thought in each area with the emphasis lying on the processes of material production and social reproduction

Reconstructing Urban Economics Franklin Obeng-Odoom, 2016-08-15 Neoclassical economics the intellectual bedrock of modern capitalism faces growing criticisms as many of its key assumptions and policy prescriptions are systematically challenged Yet there remains one field of economics where these limitations continue virtually unchallenged the study of cities and regions in built environment economics In this book Franklin Obeng Odoom draws on institutional Geogist and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about urban economics In doing so he demonstrates the widespread tensions and contradictions in the status quo showing how to reconstruct urban economics in order to create a more just society and environment

From Neighborhoods to Nations Yannis Ioannides, 2013 Just as we learn from influence and are influenced by others our social interactions drive economic growth in cities regions and nations determining where households live how children learn and what cities and firms produce *From Neighborhoods to Nations* synthesizes the recent economics of social interactions for anyone seeking to understand the contributions of this important area Integrating theory and empirics Yannis Ioannides explores theoretical and empirical tools that economists use to investigate social interactions and he shows how a familiarity with these tools is essential for interpreting findings The book makes work in the economics of social interactions accessible to other social scientists including sociologists political scientists and urban planning and policy researchers Focusing on individual and household location decisions in the presence of interactions Ioannides shows how research on cities and neighborhoods can explain communities composition and spatial form as well as changes in productivity industrial specialization urban expansion and national growth The author examines how researchers address the

challenge of separating personal social and cultural forces from economic ones Ioannides provides a toolkit for the next generation of inquiry and he argues that quantifying the impact of social interactions in specific contexts is essential for grasping their scope and use in informing policy Revealing how empirical work on social interactions enriches our understanding of cities as engines of innovation and economic growth From Neighborhoods to Nations carries ramifications throughout the social sciences and beyond

Economics of Agglomeration Masahisa Fujita, Jacques-François Thisse, 2013-07-31 Economic activities are not concentrated on the head of a pin nor are they spread evenly over a featureless plane On the contrary they are distributed very unequally across locations regions and countries Even though economic activities are to some extent spatially concentrated because of natural features economic mechanisms that rely on the trade off between various forms of increasing returns and different types of mobility costs are more fundamental This book is a study of the economic reasons for the existence of a large variety of agglomerations arising from the global to the local This second edition combines a comprehensive analysis of the fundamentals of spatial economics and an in depth discussion of the most recent theoretical developments in new economic geography and urban economics It aims to highlight several of the major economic trends observed in modern societies The first edition was the winner of the 2004 William Alonso Memorial Prize for Innovative Work in Regional Science

A Companion to Urban Economics Richard J. Arnott, Daniel P. McMillen, 2008-04-15 A Companion to Urban Economics provides a state of the art overview of this field communicating its intellectual richness through a diverse portfolio of authors and topics Unique in both its rigor and international treatment An ideal supplementary textbook in upper level undergraduate urban economics courses or in master's level and professional courses providing students with the necessary foundation to tackle more advanced topics in urban economics Contains contributions from the world's leading urban economists

The Emerging Economic Geography in EU Accession Countries Peter Nijkamp, 2017-11-30 This title was first published in 2003 Since 1990 Central and Eastern European countries have experienced increased economic integration with the European Union The spatial implications of this process have been little investigated so far Have patterns of regional specialization and industrial concentration changed during the 1990s How does regional specialization relate to economic performance How has access to Western markets affected the regional wage structure What types of regions are winners and what types of regions are losers This book poses and answers such policy relevant questions It is organized into three parts The first introduces the main features of economic integration and transition processes in Central and Eastern Europe and discusses the theoretical and methodological framework of the research The second part examines the cases of five countries Bulgaria Estonia Hungary Romania and Slovenia and the final part includes three comparative analyses which explain the underlying factors that determine the changing patterns of location of manufacturing activity the adjustment pattern of regional wages and adaptation processes in border regions in the five countries

OECD Urban Policy Reviews: China 2015 OECD, 2015-04-18 This review examines the

major challenges associated with China's shift to a new model of urbanisation looking at a range of such issues as social and labour market policies, land use and transport planning, urban planning, urban governance and public finance **Cities, Economic Inequality and Justice** Edwin Buitelaar, Anet Weterings, Roderik Ponds, 2017-07-28 Increasing economic inequality in cities and the spatial translation of that into more segregated neighbourhoods is top of the political agenda in developed countries. While the overall living standards have increased in the last century, the focus has now shifted from poverty to economic differences with a particular focus on the gap between the very poor and the ultra rich. The authors observe a common view among policy makers and researchers alike that urban economic inequality and segregation are increasing, that this increase is bad, and that money and people in the case of segregation need to be redistributed in response. In six compact chapters, this book enriches and broadens the debate. Chapters bring together the literature on the social effects of economic inequality and segregation and question whether there are sizeable effects and what their direction, positive or negative, is. The often conflated concepts of economic inequality and segregation and social injustice are disentangled and the moral implications are reflected on. The book is essential reading for students and academics of Planning Theory, Planning Ethics, Urban Geography, Urban Economics, Economic Geography and Urban Sociology.
