Handicapped Children In Residential Care A Study Of Policy Failure:

Handicapped Children in Residential Care Ann Shearer,1980-01-01 *Residential Child Care* Andrew Kendrick,2008 Draws on recent research to address key issues in residential child care policy and practice in the UK offering guidance for developing best practice and improved outcomes for children and young people **Researching Learning Difficulties** Jill Porter,Penny Lacey,2005 The book will help readers to critically evaluate the implications of research reports for their own practice The Children Act Great Britain. Dept. of Health,1991 How will the Children Act affect work with disabled children This guidance outlines the responsibilities of social services departments SSDs under the Act stating that they have a clear duty to provide services to children with disabilities Treating disabled children as children first is of paramount importance However there is a need for all staff who may be involved in providing a service to a child with a disability to be aware of legislation and SSDs should ensure that advice expertise and resources are available for their staff when needed **Normalisation in Practice** Andy Alaszewski,Pauline BN Ong,2015-12-22 First published in 1990 this book was the first informed study to focus on care within the voluntary sector Written with the child in mind it is a sensitive work which explores the administration strategy and problems facing carers in children s homes at that time Centring on small community based facilities the authors discuss the processes involved in setting up and running such facilities They examine the difficulties of evaluating progressive services that are influenced by the philosophy of normalisation and highlight the lessons from which other providers of services are able to learn Written by experienced researchers with contributions from service managers Normalisation in Practice offers pragmatic advice on managing innovation efficiently without neglecting the needs of the child Detailed interviews are combined with theoretical insight to provide an important guide for students and practitioners and a model for academics undertaking evaluative research Although written at the start of the 1990s this book contains discussions and material that are still very relevant to the subject today Development in Short-term Care Kirsten Stalker,1996 The first book to bring together and review the findings of research into short term care services for a range of user groups this book addresses the question of short term care from many perspectives Particular attention is paid to the views of those in direct receipt of the service while the issues of costings and quality and the current research on provision to particular groups including disabled children and people with dementia are also examined **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1983 The Intimate Lives of Disabled People Kirsty Liddiard,2017-12-01 Disabled people are routinely assumed to lack the capabilities and capacities to embody and experience sexuality and desire as well as the agency to love and be loved by others and build their own families if they so choose Centring on the sexual intimate and erotic lives of disabled people this book presents a rare opportunity to understand and ask critical questions about such widely held assumptions In essence this book is a collection of sexual stories told by disabled people on their own terms and in their own ways Stories that shed light on areas of disability love and life that are

typically overlooked and ignored A sociological analysis of these stories reveals the creative ways in which disabled people manage and negotiate their sexual and intimate lives in contexts where these are habitually denied In its calls for disabled people s sexual and intimate citizenship stories are drawn upon as the means to create social change and build more radically inclusive sexual cultures In this ground breaking feminist critical disability studies text *The Intimate Lives of Disabled People* introduces and contributes to contemporary debates around disability sexuality and intimacy in the 21st century Its arguments are relevant and accessible to researchers academics and students across a wide range of disciplines such as sociology gender studies psychology social work and philosophy as well as disabled people their families and allies and the professionals who work with and for them
