Non-Standard Architectural Productions Sandra Karina Löschke, 2019-07-30 This book captures concepts and projects that reshape the discipline of architecture by prioritizing people over buildings In doing so it uncovers sophisticated approaches that go beyond standard architectural protocols to explore experience based aesthetics encounters action based research critical practices and social engagement If these are widely understood as singular or incompatible approaches the book reveals that they form a growing network of interrelations and generate levels of flexibility and dynamism that are reshaping the discipline The thirteen chapters analyze thought provoking projects branded museums restaged exhibitions home work spaces multi cultural spaces ageing apartment blocks abandoned homes and urban slums amongst them Together they enliven the stalled debate about a single architectural response to the complex challenges of the contemporary world by highlighting pluralistic perspectives on architecture that offer fresh solutions on how architecture can improve people s lives Featuring essays from an international range of authors this book makes a vital contribution to our understanding of the wider conditions under which and in relation to which contemporary architecture is produced **Design Resources**
