Hands On Technology:

All Hands on Tech Thomas H. Davenport, Ian Barkin, 2024-09-18 Supercharge your organization's capacity for innovation. The greatest untapped asset in an enterprise today is the ingenuity of its people. Dive into a future of work where technology empowers everyone to be a creator and builder with All Hands on Tech. The Citizen Revolution in Business Technology. This pivotal book offers a comprehensive look into the role of citizen developers, business domain experts who are driving IT-enabled innovation using technology previously reserved for professional technologists. Through case studies of citizens and citizen-enabled enterprises, the authors demonstrate how emerging technology bestows unprecedented power on these individuals and unprecedented value on the organizations that channel their efforts. They outline a transformative approach to citizen development that not only enhances companies' innovative capacity via the empowerment of domain experts but also minimizes risk and liberates IT departments to pursue more strategic initiatives. All Hands on Tech describes a revolution in work powered by technology becoming more human and humans becoming more comfortable with technology. This convergence provides a clear pathway for enterprises to leverage the on-the-ground experience and insight of all employees. The authors provide diverse examples of companies that have aligned the work of their citizen developers with wider organizational goals across citizen data science automation and development projects. These examples demonstrate why and how to commit to the citizen revolution in your organization. In the book, you'll discover the untapped potential of citizen developers to revolutionize business operations with technology democratization. Find a practical framework for integrating citizen development into a broader corporate digital and data strategy while controlling risk. Explore a forward-thinking approach to redefining the roles of all hands in an enterprise, empowering them to turn ideas into applications, automations, and analytical AI models. For business leaders, executives, managers, and IT professionals looking to harness the full potential of their front-line employees and redefine the landscape of IT work, All Hands on Tech is a must-have resource. For business domain specialists and those eager to turn ideas into action, the citizen revolution democratizes information technology and empowers you to lead your organization towards a more innovative and efficient future. For subject matter experts, domain specialists, and those eager to put their ideas to work while also future-proofing their careers with invaluable skills, the citizen revolution ushers in an entirely new way of working.

Exhibitions Tim Caulton, 2006-04-14 The development of interactive displays has transformed the traditional museum world in the last decade Visitors are no longer satisfied by simply gazing at worthy displays in glass cases they expect to have hands on experience of the objects and be actively involved with the exhibits learning informally and being entertained simultaneously Hands on museums and science centres provide the most remarkable example of how museums are redefining their roles in society improving access to real objects and real phenomena so that they can be enjoyed by more people In recent years museums have been thrust into intense competition for the public's time and money with all branches of the leisure industry from commercial theme parks to retail shopping and home entertainment This has upset the traditional stability of the museum and their visitors A hands on approach encourages a broader visitor base which in turn helps to bring in additional revenue at a time of declining public subsidy Tim Caulton investigates how to create and operate effective exhibitions which achieve their educational objectives through hands on access He concludes that the continuing success of hands on museums and science centres hinges on attaining the very best practice in exhibition design and evaluation and in all aspects of operations including marketing and financial and human resource management Hands On Exhibitions provides a practical guide to best practice which will be indispensable to all museum professionals and students of museum studies

Education Is Freedom: The Future Is in Your Hands James W. Keyes, 2024-02-27 Education is Freedom explores the transformative power of education and its ability to liberate individuals and societies from the constraints of ignorance inequality and oppression In this book author James Keyes explores the ways education empowers people to take control of their lives to pursue their dreams and to contribute to the world in meaningful and fulfilling ways He provides a roadmap to the why what and how of learning The book outlines the importance of education for all mankind the power of education to change our world and the wisdom to unlock our personal freedom while preserving our democracy Where does humanity go to school Democracy across the world is at risk With the polarization of today's society the foundational right to freedom of speech is now being challenged from all sides The truth is under siege as misinformation and hostility have replaced critical thinking and civil discourse Our freedom of self determination has a prerequisite an informed electorate If that electorate is armed with false information or is influenced by outside forces their actions and reactions can put democracy in jeopardy Today more than ever we must nurture the education knowledge and wisdom of individuals to discern right from wrong truth from fiction and success from failure If learning is the key to success then how can humanity advance its own cause Our forefathers recognized that an educated populace was the very foundation of democracy Education is a self help guide for humanity that allows us to individually and collectively understand the roadmap to freedom For the individual education is the one common denominator that separates those who are free from the ones trapped in their own reality Someone can take your money your material things your job but they can't take away what you know With knowledge you can replace anything lost you can be free to explore the world you are beholden to no one Whatever challenges or adversity

you face in life embracing a learning mentality will empower you and set you free Humanity must indeed go back to school because the future is in our hands

Nature, Technology, and Society Victor Ferkiss, 1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we get where we are today In Nature Technology and Society Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues
