*Eliminating Minor Stoppages on Automated Lines* Kikuo Suehiro, 2017-12-14 Stoppages of automated equipment lines adversely affect productivity cost and lead time Such losses make decreasing the number of stoppages a crucial element of TPM Kikuo Suehiro has helped companies such as Hitachi achieve unprecedented reduction in the number of minor stoppages In this explicitly detailed book he presents a scientific approach to determining the causes of stoppages and the actions that can be taken to diminish their occurrence *Eliminating Minor Stoppages on Automated Lines* Kikuo

Suehiro, 1992-04-01 **Non-Stock Production** Shigeo Shingo, 1988-06-01 Shingo whose work at Toyota provided the foundation for JIT teaches how to implement non stock production in your JIT manufacturing operations The culmination of his extensive writings on efficient production management and continuous improvement this book is an essential companion volume to his other landmark books on key elements of JIT including SMED and poka yoke It includes Fundamental flaws in European and American production philosophies Basic concepts for improving production systems The scientific thinking mechanism a new approach to improvement Implementing a production method in an age of authorized stock production Development of production functions in the age of non stock production Significance of the different production systems

*Working with Machines* Michel Baudin, 2007-04-20 How do companies in high labor cost countries manage to remain competitive In western manufacturing the more manual a process the more severe the competitive handicap of high wages Full automation would make labor costs irrelevant but remain impractical in most industries Most successful manufacturing processes in advanced economies are neither fully manual nor fully automatic they involve interactions between small numbers of highly skilled people and machines that account for the bulk of the manufacturing costs and thereby remain competitive In *Working with Machines* The Nuts and Bolts of Lean Operations With Jidoka author Michel Baudin explains how performance differences that can be observed from one factory to the next are due to the way people use the machines from the human interfaces of individual machines to the linking of machines into cells the management of monuments and common services automation maintenance and production control **Improving Production with Lean Thinking** Javier

Santos, Richard A. Wysk, Jose M. Torres, 2015-03-24 Unique coverage of manufacturing management techniques complete with cases and real world examples *Improving Production with Lean Thinking* picks up where other references on production processes leave off It is increasingly important to integrate and systematize lean thinking throughout production manufacturing and the supply chain because the market is becoming more competitive products are becoming more complex and product life is getting shorter and shorter With a practical focus this book encompasses the science and analytical background for improving manufacturing control and design It covers specific methodologies and tools for Material flow and facilities layout including a six step layout design process The design of cellular layouts Analyzing and improving equipment efficiency including Poka Yoke motion study maintenance SMED and more Environmental improvements including 5S

implementation With real life case studies of successful European and American approaches to lean manufacturing this reference is ideal for engineers managers and researchers in manufacturing and production facilities as well as students It bridges the gap between production manufacturing and supply chain techniques and provides a detailed roadmap to improved factory performance
