Forthcoming Books Rose Arny, 1998

Dracula in Visual Media John Edgar Browning, Caroline Joan (Kay) Picart, 2014-01-10 This is a comprehensive

sourcebook on the world's most famous vampire with more than 700 citations of domestic and international Dracula films, television programs, documentaries, adult features, animated works, and video games, as well as nearly a thousand comic books and stage adaptations. While they vary in length, significance, quality, genre, moral character, country, and format, each of the cited works adopts some form of Bram Stoker's original creation and Dracula himself or a recognizable vampiric semblance of Dracula appears in each. The book includes contributions from Dacre Stoker, David J. Skal, Laura Helen Marks, Dodd Alley, Mitch Frye, Ian Holt, Robert E. Bisang, and J. Gordon Melton. **Classic Home Video Games, 1985-1988** Brett Weiss, 2012-11-12. A follow-up to 2007's *Classic Home Video Games 1972-1984*, this reference work provides detailed descriptions and reviews of every U.S. released game for the Nintendo NES, the Atari 7800, and the Sega Master System, all of which are considered among the most popular video game systems ever produced. Organized alphabetically by console brand, each chapter includes a description of the game system followed by substantive entries for every game released for that console. Video game entries include publisher, developer, data release year, gameplay information, and typically the author's critique. A glossary provides a helpful guide to the classic video game genres and terms referenced throughout the work, and a preface provides a comparison between the modern gaming industry and the industry of the late 1980s. **Cumulated Index to the Books**, 1999. **Digital Games and Mathematics Learning** Tom Lowrie, Robyn Jorgensen (Zevenbergen), 2015-10-05. Digital games offer enormous potential for learning and engagement in mathematics, ideas, and processes. This volume offers multidisciplinary perspectives of educators, cognitive scientists, psychologists, and sociologists on how digital games influence the social activities and mathematical ideas of learners, gamers. Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered and embedded within digital game environments. In particular, the volume advocates for new and different ways of thinking about mathematics in our digital age, proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies. The authors acknowledge that the promise of digital games has not always been realized or fulfilled. There is emerging and considerable evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning. Throughout the book, what constitutes mathematics, learnings, and pedagogy is contested. Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and to identify current tensions within the field. Mathematics learning is defined as being about problem solving, engagement in mathematical ideas, and processes, and social engagement. The artefact, which is the game, shapes the ways in which the gamers engage with the social activity of gaming. In parallel, the book as a textual artefact will be supported by Springer's online platform, allowing for video and digital communication, including links to relevant websites to be used as supplementary material and to establish a dynamic communication space. In his first book, *National Post* columnist Scott Feschuk offers a hilarious satirical take on trends in television and our peculiar obsession with the

famous the infamous and the nature of Tom Cruise s sexuality Searching for Michael Jackson s Nose romps through the birth and the future of reality television takes readers to the all star parties thrown each summer by the major American television networks and makes the case that what the world needs now is more yes more showbiz award shows It pokes fun at Hollywood s rich and renowned and also at Steve Guttenberg It both applauds and skewers our intensifying fascination with the profoundly inconsequential tribal councils celebrity interviews the crude romantic exploits of bachelors and bogus millionaires And it takes us on a tour through the prevailing popular culture of the twenty first century with stops at the Starship Enterprise Britney Spears Sesame Street the Oscars Pamela Anderson a naked Billy Baldwin and the everchanging facial topography of the King of Pop
