Pyper,C.A.C. Stout,2000-05-03 This dictionary was produced in response to the rapidly increasing amount of quasi industrial jargon in the field of information technology compounded by the fact that these somewhat esoteric terms are often further reduced to acronyms and abbreviations that are seldom explained Even when they are defined individual interpretations continue to diverge Until now the codes have been reproduced in separate language publications there is no universal listing in alphabetical order that

covers the English French Spanish and German languages This dictionary sets out the English French Spanish and German alternatives as a single merge sorted whole Today most of the codes have passed into the public domain simply because they exist in most of the telecommunications systems installed throughout the developed and developing world and are largely known to most of those who work in that particular area However foreign variants often defy even the most astute observer This dictionary seeks to clarify this bewildering situation as much as possible The 26 000 definitions set out here drawn from some 16 000 individual cybernoms cover computing electronics telecommunications including intelligent networks and mobile telephony together with satellite technology and Internet Web terminology Annex I lists some of the innumerable file types found in the filing systems of computers using powerful desktop managers and Annex II lists the abbreviations of country names found in universal resource locators URL Elsevier's Dictionary of Cybernoms is a useful tool for translators students universities and computer enthusiasts *American Book Publishing Record* ,2000-07 **American Reference Books Annual** ,2001 1970 issued in 2 vols v 1 General reference social sciences history economics business v 2 Fine arts humanities science and engineering **The British National Bibliography** Arthur James Wells,2000 Elsevier's Dictionary of Cybernoms Terry R.
