

PROBLEM-SOLVING

DEFINITION

Problem-solving is a cognitive process used to identify, analyze, and resolve challenges or obstacles. It involves evaluating various solutions and selecting the most suitable one based on the given criteria. Effective problem-solving requires critical thinking, creativity, and the ability to apply different strategies and techniques.

EXAMPLES

- **Five Whys:** The Five Whys method is a problem-solving technique that involves asking "why" five times to drill down into the root cause of an issue.
- **Pro-Con Analysis:** A pro-con analysis helps in weighing the advantages and disadvantages of a decision, facilitating more informed and balanced choices.

Crawling Out of the Bramble Patch Dr. Alexander Winchester, Developing Practice Competencies D. Mark Ragg, 2011-04-18 Designed for the generalist practice course, this book uses students' own experiences rather than abstract discussion to build competency and professional identity. Full of rich case examples and exercises, the book lets students visualize and carry out skills in an applied, experimental way. It breaks down each practice skill into subcomponents, allowing students to consciously build up their capabilities as part of a lifelong learning process. Social work students will benefit from this presentation of the core knowledge, techniques and values essential to the effective practice of social work.

Chronic Disease Nursing Susan Oliver, 2006-02-03 Individuals with chronic diseases have to cope with various challenges to their physical and psychological well-being as part of their daily lives. In the field of chronic disease management, nurses have an integral role in supporting the needs of the patient and identifying the optimum in high quality care. Dealing with the increasing needs of the growing chronic disease and elderly populations presents difficult challenges. Resources need to be used effectively. Chronic Disease Nursing offers support to all nurses but particularly primary and secondary care advanced practitioners wishing to develop an effective system of care for those with a long term medical condition. There is guidance on the practical aspects of setting up a telephone helpline service, identifying the ethical and professional aspects of developing a nurse led clinic, selecting appropriate outcome measures for clinic setting and suitable biologic therapies used in chronic disease areas and working across professional organisations. This book provides a framework for the development of a chronic disease nursing service using rheumatology as an example.
