Embryos And Ethics The Warnock Report In Debate:

Embryos and Ethics Nigel M. de S. Cameron, 1987 Christian Ethics and Biomedical Innovation Stephen Goundrey-Smith, 2024-11-05 In Christian Ethics and Biomedical Innovation Stephen Goundrey Smith outlines a strategy for future adoption of human enhancement technologies which will ensure that such technologies are a common good a strategy which is appropriate for a pluralistic society yet consistent with Christian ethical principles Drawing on the history of biomedical innovation to date in pharmaceutical medicine he argues that technological capability alone is not enough and that the responsible adoption of enhancement technologies will require active ethical deliberation and robust public policy discourse Goundrey Smith argues that biomedical technology ethics and public policy together form an essential triad for appropriate future enhancement technology adoption This approach helps to ensure that biomedical technologies introduced will be common goods and to reduce the risk of their instrumental use The use of any technology is closely linked to its sociopolitical and cultural context and drawing on Augustine's The City of God Goundrey Smith presents a theological vision for good biomedical technology innovation in human society Assisted Human Reproduction Dani Singer, Myra Hunter, 2006-02-22 With contributions from Eric Blyth Ken Daniels Julia Feast Robert Lee Nina Martin Alexina McWhinnie Derek Morgan Clare Murray Sharon Pettle Claire Potter Jim Richards and Francoise Shenfield The separation of procreation from conception has broadened notions of parenthood and created novel dilemmas A woman may carry a foetus derived from gametes neither or only one of which came from her or her partner or she may carry a foetus created using in vitro fertilisation IVF with the purpose of handing it to two other parents one neither or both of whom may be genetically related to the prospective child Parents may consist of single sex couples only one of them genetically related to the child the prospective mother may be past her menopause and genetic parenthood after death is now achievable In a world increasingly reliant on medical science how can the argument that equates traditional with natural and novel with unnatural unethical be justified Should there be legislation which is notoriously slow to change in a field driven by dazzling new possibilities at ever faster rate particularly when restrictions differ from country to country so that those who can afford it travel elsewhere for their treatment of choice Whose rights are paramount the adults hoping to build a family or the prospective child's future well being On what basis can apparently competing rights be regulated or adjudicated and how and to what extent can these be enforced in practice The Global Politics of Human Embryonic Stem Cell Science H. Gottweis, B. Salter, C. Waldby, 2009-01-15 Drawing on a wide range of interviews and primary and secondary sources this book investigates the dynamic interactions between national regulatory formation and the global biopolitics of regenerative medicine and human embryonic stem cell science **Soul of the Embryo** David Albert Jones, 2004-12-01 We are delighted to announce that this book has been short listed for the prestigious Michael Ramsey prize for the best in theological writing For more information please visit www.michaelramseyprize.org.uk A radical examination of the Christian tradition relating to the human embryo

and how this relates to the debate today In recent years the moral status of the human embryo has come to the fore as a vital issue for a range of contemporary ethical debates concerning the over production freezing and discarding of embryos in IVF concerning the use of spare embryos for scientific experimentation and finally concerning the prospect of producing clone embryos These debates have involved not only general philosophical arguments but also specifically religious arguments Many participants have attempted to find precedent from the Christian tradition for the positions they wish to defend It is therefore extraordinary that until *The Soul of the Embryo* there has been no significant work on the history of Christian reflection on the human embryo Here David Albert Jones seeks to tell the story of this unfolding tradition a story that encompasses many different medical moral philosophical and theological themes He starts by examining the understanding of the embryo in the Hebrew Scriptures then moves through early Christianity and the Middle Ages to the Reformation and beyond Finally Albert Jones considers the application of this developed tradition to contemporary situation and questions which contemporary Christian view or views are best regarded as authentic developments of the tradition and which should be regarded as alien to the tradition

Experiments on Embryos Anthony Dyson, John Harris, 2012-10-12 Covering scientific legal ethical historical theological and public policy aspects of human embryo research the cases for and against are put strongly and clearly Scientific evidence is cogently presented by leading embryologists

The Embryo Research Debate Michael Joseph Mulkay, 1997-02-13 Scientific research involving human embryos was a major topic of public debate in Britain during the 1980s Despite strong support from the scientific community embryo research was initially condemned by many ordinary people as well as by special interest groups and came close to being banned by Act of Parliament Michael Mulkay describes the dynamics of the parliamentary struggle over the future of embryo

research focusing on such issues as the clash between the anti abortion and pro research lobbies the tactics of the Government political ideology the media s role the importance of gender religion the impact of science fiction the lure of medical advance and the difficulty of maintaining ethical control He explains how the advocates of embryo research eventually triumphed and ends with an examination of the cultural tensions which linger after the debate *Research Ethics* Ana Smith Iltis,2006-01-16 Medicine in the twenty first century is increasingly reliant on research to guarantee the safety and efficacy of medical interventions As a result the need to understand the ethical issues that research generates is becoming essential This volume introduces the principal areas of concern in research on human subjects offering a framework for understanding research ethics and the relationship between ethics and compliance Research Ethics brings together leading scholars in bioethics and the topics covered include the unique concerns that arise in specific areas of research such as gene therapy and stem cell research Individual chapters also address the ethical issues that occur when conducting research with specific populations such as infants or adolescents and the volume looks at important emerging questions in human subjects research namely financial conflicts of interest and the interpretation of scientific data *Ethics and Theology* United States. Congress. Senate. Committee on Labor and Human Resources. Subcommittee on Public Health and Safety,1997 **Embryo Politics** Thomas Banchoff,2011-05-15 Since the first fertilization of a human egg in the laboratory in 1968 scientific and technological breakthroughs have raised ethical dilemmas and generated policy controversies on both sides of the Atlantic Embryo stem cell and cloning research have provoked impassioned political debate about their religious moral legal and practical implications National governments make rules that govern the creation destruction and use of embryos in the laboratory but they do so in profoundly different ways In Embryo Politics Thomas Banchoff provides a comprehensive overview of political struggles about embryo research during four decades in four countries the United States the United Kingdom Germany and France Banchoff s book the first of its kind demonstrates the impact of particular national histories and institutions on very different patterns of national governance Over time he argues partisan debate and religious secular polarization have come to overshadow ethical reflection and political deliberation on the moral status of the embryo and the promise of biomedical research Only by recovering a robust and public ethical debate will we be able to govern revolutionary life science technologies effectively and responsibly into the future **Designs on Nature** Sheila Jasanoff,2011-06-27 Biology and politics have converged today across much of the industrialized world Debates about genetically modified organisms cloning stem cells animal patenting and new reproductive technologies crowd media headlines and policy agendas Less noticed but no less important are the rifts that have appeared among leading Western nations about the right way to govern innovation in genetics and biotechnology These significant differences in law and policy and in ethical analysis may in a globalizing world act as obstacles to free trade scientific inquiry and shared understandings of human dignity In this magisterial look at some twenty five years of scientific and social development Sheila

Jasanoff compares the politics and policy of the life sciences in Britain Germany the United States and in the European Union as a whole She shows how public and private actors in each setting evaluated new manifestations of biotechnology and tried to reassure themselves about their safety Three main themes emerge First core concepts of democratic theory such as citizenship deliberation and accountability cannot be understood satisfactorily without taking on board the politics of science and technology Second in all three countries policies for the life sciences have been incorporated into nation building projects that seek to reimagine what the nation stands for Third political culture influences democratic politics and it works through the institutionalized ways in which citizens understand and evaluate public knowledge These three aspects of contemporary politics Jasanoff argues help account not only for policy divergences but also for the perceived legitimacy of state actions
