Unlocking the Emotional Brain Bruce Ecker, Robin Ticic, Laurel Hulley, 2024-04-22 This highly influential volume now in a much expanded second edition delivers major advances for psychotherapy all empirically grounded in memory reconsolidation neuroscience A great increase of therapeutic effectiveness can be gained thanks to a clear map of the brain's innate core process of transformational change a process that does not require use of any particular system or techniques and is therefore remarkably versatile Twenty six case examples show the decisive ending of a vast range of major symptoms including depression anxiety panic shame self devaluing anger perfectionism alcohol abuse sexual aversion compulsive eating and obesity paralyzed self expression and teen ADHD all transformed through deeply resolving underlying disturbances such as complex trauma lifelong oppression by systemic racism and homophobia childhood sexual molestation parental narcissistic domination violent assault trauma natural disaster trauma and childhood traumatic aloneness and neglect This is a transdiagnostic transtheoretical lucid understanding of therapeutic action based for the first time in the history of the psychotherapy field on rigorous empirical knowledge of an internal mechanism of change and it achieves a fundamental unification of the confusingly fragmented psychotherapy field diverse systems no longer seem to belong to different worlds because they now form a wonderful repertoire of options for facilitating the same core process of transformational change as shown in case examples from AEDP Coherence Therapy EFT EMDR IFS IPNB ISTDP psychedelic assisted therapy and SE It's

now clear why therapy systems that differ strikingly in technique and theory can produce the same quality of liberating change Practitioners who value deep connection with their clients are richly rewarded by the experiential depth that this core process accesses where no awareness had previously reached whether sessions are done in person or via online video It is an embarrassment of riches because in addition we gain the decisive resolution of several longstanding polarizing debates regarding the nature of symptom production the prevalence of attachment issues the operation of traumatic memory the functions of the client therapist relationship the role of emotional arousal in the process of change and the relative importance of specific versus non specific factors *Innovative Interventions in Psychotherapy* Seymour Hoffman, Brurit Laub, 2006-05 The present volume unquestionably constitutes a significant contribution to clinical literature The case reports with their descriptions of many types of therapeutic interventions and combinations of interventions in dealing with a wide variety of difficulties presented by different patients and patient groups as well as the discussions of important topics in psychotherapy add to our knowledge of the many facets of psychotherapy enrich our understanding of the treatment process and deepen our appreciation of the importance of therapeutic sensitivity and flexibility Developing a Secure Self April Steele, 2007-08 Treatment of Traumatized Adults and Children Allen Rubin, David W. Springer, 2009-07-23 Praise for Treatment of Traumatized Adults and Children A major stumbling block to adoption of evidence based practice in the real world of clinical practice has been the absence of clinician friendly guides Such guides need to be understandable free of technical research jargon infused with clinical expertise and rich with real life examples Rubin and Springer have hit a home run with this series which has all of these characteristics and more Edward J Mullen Willma Albert Musher Chair and Professor Columbia University Rubin and Springer have assembled the wisdom of leading practitioners of evidence based practice interventions enhancing the likelihood that these practices will be adopted by helping professionals Written in the language of practitioners this book represents an exemplar for dissemination of evidence based practice information Joanne Yaffe Associate Professor University of Utah College of Social Work Evidence based interventions for treating traumatized adults and children Part of the Clinician's Guide to Evidence Based Practice Series Treatment of Traumatized Adults and Children provides busy mental health practitioners with detailed step by step guidance for implementing clinical interventions that are supported by the latest scientific evidence Edited by renowned educators Allen Rubin and David W Springer this thoroughly useful reference draws on a roster of experts and researchers in the field who have assembled state of the art knowledge into this well rounded guide and covers the following interventions that have the best empirical support for treating posttraumatic stress disorder Prolonged exposure therapy Trauma focused cognitive behavior therapy Eye Movement Desensitization and Reprocessing EMDR Easy to use and accessible in tone this indispensable resource is for practitioners who would like to implement evidence based compassionate and effective interventions in their care of traumatized clients Also in the Clinician's Guide to Evidence Based Practice Series Substance Abuse Treatment for Youth and

Adults **Treating Trauma-Related Dissociation** Kathy Steele, Suzette Boon, Onno van der Hart, 2016-11-29 Winner of the 2017 International Society for the Study of Trauma and Dissociation ISSTD Pierre Janet Writing Award Establishing safety and working with dissociative parts in complex trauma therapy Therapists around the world ask similar questions and struggle with similar challenges treating highly dissociative patients This book arose not only out of countless hours of treating patients with dissociative disorders but also out of the crucible of supervision and consultation where therapists bring their most urgent questions needs and vulnerabilities The book offers an overview of the neuropsychology of dissociation as a disorder of non realization as well as chapters on assessment prognosis case formulation treatment planning and treatment phases and goals based on best practices The authors describe what to focus on first in a complex therapy and how to do it how to help patients establish both internal and external safety without rescuing how to work systematically with dissociative parts of a patient in ways that facilitate integration rather than further dissociation how to set and maintain helpful boundaries specific ways to stay focused on process instead of content how to deal compassionately and effectively with disorganized attachment and dependency on the therapist how to help patients integrate traumatic memories what to do when the patient is enraged chronically ashamed avoidant or unable to trust the therapist and how to compassionately understand and work with resistances as a co creation of both patient and therapist Relational ways of being with the patient are the backbone of treatment and are themselves essential therapeutic interventions As such the book also focused not only on highly practical and theoretically sound interventions not only on what to do and say but places strong emphasis on how to be with patients describing innovative compassionately collaborative approaches based on the latest research on attachment and evolutionary psychology Throughout the book core concepts fundamental ideas that are highlighted in the text in bold so they can be seen at a glance are emphasized These serve as guiding principles in treatment as well as a summing up of many of the most important notions in each chapter Each chapter concludes with a section for further examination These sections include additional ideas and questions exercises for practicing skills and suggestions for peer discussions based on topics in a particular chapter meant to inspire further curiosity discovery and growth
