**Emergency Patient Care** Lenworth M. Jacobs, Barbara R. Bennett, 1983      **Textbook of Pediatric Emergency Procedures** Fred M. Henretig, Christopher King, 1997-01-01 Comprehensive clinical reference for physicians who care for children with acute illness or injury in emergency departments and office based practices Illustrated      **Injury Epidemiology: Fourth edition** Leon S. Robertson, Ph.D., 2015 Research on injuries is a high priority to inform public policy that reduces deaths hospitalizations and associated costs Principles for research design and analysis of injury incidence and severity are emphasized Review of extant surveillance data reveals numerous flaws that must be changed to increase usefulness of the data Research designs of studies of injury causation and evaluation of countermeasures are often inappropriate and mislead analytic and injury control efforts Appendices to chapters illustrate research projects that influenced public policy affecting the reduction of motor vehicle fatalities per population by half in the U S The principles illustrated by these studies can be applied to other types of injury      **Injury Epidemiology** Leon Robertson, 2007-07-03 The previous edition of this useful text on epidemiologic methods for studying injuries and evaluating interventions to prevent them provides specific objectives for research in the various stages of injury control planning and implementation including the types of data needed to reach the objectives Using a progressive step by step analysis it illustrates how to pose research questions and design the best research studies to answer those questions This new edition will update all chapters and include new examples of studies The chapters will also be organized into more precise topic areas for ease of reference The chapter on policy analysis would be dissolved and topic treated as part of other chapters      **Hospital-Based Emergency Care** Institute of Medicine, Board on Health Care Services, Committee on the Future of Emergency Care in the United States Health System, 2007-05-03 Today our emergency care system faces an epidemic of crowded emergency departments patients boarding in hallways waiting to be admitted and daily ambulance diversions Hospital Based Emergency Care addresses the difficulty of balancing the roles of hospital based emergency and trauma care not simply urgent and lifesaving care but also safety net care for uninsured patients public health surveillance disaster preparation and adjunct care in the face of increasing patient volume and limited resources This new book considers the multiple aspects to the emergency care system in the United States by exploring its strengths limitations and future challenges The wide range of issues covered includes The role and impact of the emergency department within the larger hospital and health care system Patient flow and information technology Workforce issues across multiple disciplines Patient safety and the quality and efficiency of emergency care services Basic clinical and health services research relevant to emergency care Special challenges of emergency care in rural settings Hospital Based Emergency Care is one of three books in the Future of Emergency Care series This book will be of particular interest to emergency care providers professional organizations and policy makers looking to address the deficiencies in emergency care systems      *Injury Epidemiology* Leon S. Robertson, 1998 This text

provides a comprehensive overview of the epidemiologic methods used to study injuries and evaluate interventions to prevent them. The author explains the formation of research questions, the sources of reliable and valid data, and the selection of research methods. The difficulties of applying rates and ratios to the evaluation of programs are discussed as well, and the use of economic concepts and policy analysis is covered. The Second Edition provides specific objectives for research in the various stages of injury control planning and implementation, including the types of data needed to reach the objectives. The new edition of Injury Epidemiology is a unique comprehensive guide to this specialized field. It will benefit students, newcomers, and seasoned researchers in the areas of injury prevention, injury control, and epidemiology. **National Library**

The following protocols outline the emergency medical support that can be administered under austere conditions by emergency medical services (EMS) providers credentialed by the Department of Homeland Security, DHS Office of Health Affairs (OHA). These protocols are intended to supplement the DHS OHA Basic Life Support (BLS) and Advanced Life Support (ALS) protocols when providers are operating in austere environments. The protocols guide the management of individual patients while considering the circumstances under which patient evaluation and treatment may occur. Any given patient may require the use of a single protocol, a portion of a protocol, or a combination of several protocols. OHA expects that providers will use the protocols to assess and to establish a treatment plan for each patient. 3 United States Marine Corps WILDERNESS MEDICINE COURSE STUDENT HANDBOOK.
