**Emerging Technologies for Shelf-Life Enhancement of Fruits** Basharat Nabi Dar,Shabir Ahmad Mir,2020-05-05

Focusing on new technological interventions involved in the postharvest management of fruits this volume looks at the research on maintaining the quality of fruits from farm to table The volume examines the factors that contribute to shortening shelf life as well as innovative solutions to maintaining quality while increasing the length of time fruit remains fresh nutritious and edible The volume considers the different needs of the diversity of fruits and covers a variety of important topics including factors affecting the postharvest quality of fruits microbial spoilage decontamination of fruits by non thermal technologies new kinds of packaging and edible coatings ozone as shelf life extender of fruits Emerging Technologies for Shelf Life Enhancement of Fruits considers the fundamental issues and will be an important reference on shelf life extension of fruits Highlighting the trends in future research and development it will provide food technologists food engineers and food industry professionals with new insight for prolonging the shelf life of fruits

**Unit Operations in Food Grain Processing** C.K. Sunil,K.A. Athmaselvi,N. Venkatachalapathy,C. Anandharamakrishnan,V.M.

Balasubramaniam,2024-05-09 Unit Operations in Food Grain Processing covers theory and principles as well as best practices in cleaning grading drying storage milling handling transportation and packaging of grains The book begins with an overview of grain types grain structure and composition and engineering properties of different grains It then moves into the aspects of processing It reviews best practices in processing rice wheat pulses oilseeds millets and pseudocereals The book discusses value addition methods products of grains and waste and by product utilization from grains These discussions outline equipment and machinery needed different methods of operations for various grains and advances in grain processing as well as grain waste and by product utilization The book has 18 chapters in total Each chapter discusses principles design illustrations advances and challenges to aid in understanding Therefore this book is a valuable reference material for academicians researchers consultants manufacturers and practitioners in the field of food processing Presents different methods of operations and the latest advances in grain processing Explores value addition grain waste and by product utilization from grains Covers all the unit operations followed in grains processing theory and principle Covers application of emerging technologies in grain processing

**Handbook of Food Preservation** Mohammad Shafiur Rahman,2020-06-10

The processing of food is no longer simple or straightforward but is now a highly inter disciplinary science A number of new techniques have developed to extend shelf life minimize risk protect the environment and improve functional sensory and nutritional properties Since 1999 when the first edition of this book was published it has facilitated readers understanding of the methods technology and science involved in the manipulation of conventional and newer sophisticated food preservation methods The Third Edition of the Handbook of Food Preservation provides a basic background in postharvest technology for foods of plant and animal origin presenting preservation technology of minimally processed foods and hurdle technology or

combined methods of preservation Each chapter compiles the mode of food preservation basic terminologies and sequential steps of treatments including types of equipment required In addition chapters present how preservation method affects the products reaction kinetics and selected prediction models related to food stability what conditions need be applied for best quality and safety and applications of these preservation methods in different food products This book emphasizes practical cost effective and safe strategies for implementing preservation techniques for wide varieties of food products Features Includes extensive overview on the postharvest handling and treatments for foods of plants and animal origin Describes comprehensive preservation methods using chemicals and microbes such as fermentation antimicrobials antioxidants pH lowering and nitrite Explains comprehensive preservation by controlling of water structure and atmosphere such as water activity glass transition state diagram drying smoking edible coating encapsulation and controlled release Describes preservation methods using conventional heat and other forms of energy such as microwave ultrasound ohmic heating light irradiation pulsed electric field high pressure and magnetic field Revised updated and expanded with 18 new chapters the Handbook of Food Preservation Third Edition remains the definitive resource on food preservation and is useful for practicing industrial and academic food scientists technologists and engineers Handbook of Soil Acidity Zdenko Rengel,2003-01-17 Discusses the control management and reduction of soil acidification in various agricultural systems The text presents strategies to modify and adjust crop production processes to decrease the toxicity of soil contaminants balance soil pH improve nutrient uptake and increase yield *Indigenous Fermented Foods of South Asia* V.K. Joshi,2016-01-05 Indigenous Fermented Foods of South Asia covers the foods of India Pakistan Bangladesh Sri Lanka Nepal Bhutan Maldives and Afghanistan For each type of food its microbiology biochemistry biotechnology quality and nutritional value is covered in depth The book discusses numerous topics including various types of fermented foods their o *Handbook of Fruits and Fruit Processing* Nirmal K.
