Handbook of the Biology of

Aging Edward J. Masoro, Steven N. Austad, 2011-04-28 The Handbook of the Biology of Aging Sixth Edition provides a comprehensive overview of the latest research findings in the biology of aging. Intended as a summary for researchers, it is also adopted as a high level textbook for graduate and upper level undergraduate courses. The Sixth Edition is 20% larger than the Fifth Edition with 21 chapters summarizing the latest findings in research on the biology of aging. The content of the work is virtually 100% new. Though a selected few topics are similar to the Fifth Edition, these chapters are authored by new contributors with new information. The majority of the chapters are completely new in both content and authorship. The Sixth Edition places greater emphasis and coverage on competing and complementary theories of aging, broadening the discussion of conceptual issues. Greater coverage of techniques used to study biological issues of aging include computer modeling, gene profiling, and demographic analyses. Coverage of research on *Drosophila* is expanded from one chapter to four. New chapters on mammalian models discuss aging in relation to skeletal muscles, body fat, and carbohydrate metabolism, growth hormone, and the human female reproductive system. Additional new chapters summarize exciting research on stem cells and cancer, dietary restriction, and whether age-related diseases are an integral part of aging. The Handbook of the Biology of Aging Sixth Edition is part of the Handbooks on Aging series, including Handbook of the Psychology of Aging and Handbook of Aging and the Social Sciences, also in their 6th editions.

**Physical Change and Aging, Sixth Edition** Sue V. Saxon, Mary Jean Etten, Elizabeth A. Perkins, 2014-08-27 This book has been honed into an elegant compendium. This outstanding work should be widely read; it is perhaps the best example of an integrative approach to gerontology. Score 94 4 stars. Doody's Physical Change Aging has been a well-respected resource for caregivers ever since it was published in 1978. This updated version carries on the tradition of providing valuable information on the aging process and age-related health issues. Former First Lady Mrs. Rosalynn Carter. This sixth edition of a classic multidisciplinary text for students of gerontology continues to offer practical, reader-friendly information about the physical changes and common pathologies associated with the aging process. It places special emphasis on the psychological and social implications of these changes in the lives of older adults. The book is distinguished by its thorough focus on anatomy and physiology and common health problems pertaining to each body system. It emphasizes the positive aspects of aging and demonstrates how the elderly population can gain greater personal control through lifestyle changes and preventive health strategies toward the goal of optimal aging. This sixth edition has been thoroughly updated to present new research findings that differentiate normal aging from actual pathology and includes substantially updated information on diagnosis and treatment. It incorporates new data from healthy older adults demonstrating that the aging process is not necessarily as devastating as earlier research had indicated. The book provides new data and guidelines on risk factors, nutrition, preventive measures, interventions, and commonly prescribed medications, and includes expanded treatment of complementary and alternative therapies. Also included is an updated discussion of grief, ethical issues, and funeral options. The book reinforces information with practical applications of aging data. Written for

students of gerontology social work human services nursing medicine occupational and physical therapy counseling and elder law it presents information that is clearly understandable for those without an extensive background in biology or medicine Additionally the book is a useful practitioner s guide and an easily understandable book for family caregivers THIS SIXTH EDITION INCLUDES NEW INFORMATION ON Diagnosis and treatment Behaviors and interventions that promote more control over an individual s aging process Genetic DNA theories Dementia and Parkinson s disease Immunotherapy Lifelong health disparities Animal assisted therapy Prayer and meditation Pharmacogenetics Geragogy self directed learning Caregiver health as a public health issue Natural funerals biodegradable caskets burial urns dying at home      **Current Catalog** National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70      Social Structures, Aging, and Self-Regulation in the Elderly K. Warner Schaie, PhD,Laura L. Carstensen, PhD,2006-07-06 This collection considers ways in which societal contexts influence aging by influencing self regulatory processes No one doubts that the social contexts in which individuals develop exert strong influence on life trajectories Those born into environments that provide high quality education supportive social relations and economic assets do better in old age than those born into environments bereft of such resources The extent of this influence however is only beginning to be revealed Recent research shows that life experiences influence basic brain structures e g the effect of musical training on neural organization and functions e g inflammatory processes and that social embeddedness may even protect against Alzheimer s disease Similarly education increasingly appears to have a real effect on neural integrity Thus societal contexts may not simply open or close doors for individuals but may influence self regulatory processes at the most basic levels of functioning Although social structures are generally seen as the independent variables that affect individual aging it is also possible to think of a lifetime development of self regulatory processes leading to behaviors in old age that can have impact on and modify societal structures Two parts of this book consider self regulation as the dependent variable asking how social contexts influence cognitive emotional and self regulatory processes The third part reverses the question treating self regulation as the independent variable and retirement and physical health as dependent variables In this part consideration is given to how the effectiveness of self regulation influences physical and economic outcomes in old age      **Handbook of Aging and the Social Sciences** Robert H. Binstock,Linda K. George,Stephen J. Cutler,Jon Hendricks,James H. Schulz,2011-05-05 The Handbook of Aging and the Social Sciences Sixth Edition provides a comprehensive summary and evaluation of recent research on the social aspects of aging The 25 chapters are divided into four sections discussing Aging and Time Aging and Social Structure Social Factors and Social Institutions and Aging and Society Within this context aging is examined from the perspectives of many disciplines and professions including anthropology bioethics demography economics epidemiology law political science psychology and sociology The Sixth Edition of the Handbook is virtually 100% new material Seventeen chapters are on subjects not carried in the previous edition Seven topics were carried over from the previous edition but

written by new authors with fresh perspectives and brought up to date Some of the exciting new topics include social relationships in late life technological change and aging religion and aging lifestyle and aging perceived quality of life economic security in retirement and aging and the law There is also a greater emphasis on international perspectives particularly in chapters on aging and politics diversity and aging and immigration The Handbook will be of use to researchers and professional practitioners working with the aged It is also suitable for use as a course text for graduate and advanced undergraduate courses on aging and the social sciences

**National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1990

**Working Memory and Ageing** Robert H. Logie,Robin G. Morris,2014-06-20 The rapid growth in the numbers of older people worldwide has led to an equally rapid growth in research on the changes across age in cognitive function including the processes of moment to moment cognition known as working memory This book brings together international research leaders who address major questions about how age affects working memory Why is working memory function much better preserved in some people than others In all healthy adults which aspects of working memory are retained in later years and which aspects start declining in early adulthood Can cognitive training help slow cognitive decline with age How are changes in brain structures connectivity and activation patterns related to important changes in working memory function Impairments of cognition and particularly of working memory can be major barriers to independent living The chapters of this book dispel some popular myths about cognitive ageing while presenting the state of the science on how and why working memory functions as it does throughout the adult lifespan Working Memory and Aging is the first volume to provide an overview of the burgeoning literature on changes in working memory function across healthy and pathological ageing and it will be of great interest to advanced undergraduates postgraduates and researchers in psychology and related subject areas concerned with the effects of human ageing including several areas of medicine

Nursing for Wellness in Older Adults Carol A. Miller,2009 Now in its Fifth Edition this text provides a comprehensive and wellness oriented approach to the theory and practice of gerontologic nursing Organized around the author s unique functional consequences theory of gerontologic nursing the book explores normal age related changes and risk factors that often interfere with optimal health and functioning to effectively identify and teach health promotion interventions The author provides research based background information and a variety of practical assessment and intervention strategies for use in every clinical setting Highlights of this edition include expanded coverage of evidence based practice more first person stories new chapters and clinical tools such as assessment tools recommended by the Hartford Institute of Geriatric Nursing

Ageing and Older Adult Mental Health Patrick Ryan,Barry J. Coughlan,2013-03 This book examines the issues and implications that mental health professionals face when dealing with ageing and older adults The book focuses on the biological psychological and cultural influences that impact on the work of mental health practitioners who work with this client group Based on current empirical research and evidence based practical issues this book explores topics including

ageing and dementia elder abuse caring for older adults depression and ageing the paradox of ageing how older adults are key to the success of future generations Throughout the book the contributors emphasise the notion of healthy ageing and the importance and significance of this concept as part of the life cycle process As such Ageing and Older Adult Mental Health will be key reading not only for mental health professionals but also for those involved in policy making for older adults **Generations**, 2007 Life Span Human Development Carol K. Sigelman, Linda De George, Kimberley

Cunial, Elizabeth A. Rider, 2018-09-01 The third edition of Life Span Human Development helps students gain a deeper understanding of the many interacting forces affecting development from infancy childhood adolescence and adulthood It includes local multicultural and indigenous issues and perspectives local research in development regionally relevant statistical information and National guidelines on health Taking a unique integrated topical and chronological approach each chapter focuses on a domain of development such as physical growth cognition or personality and traces developmental trends and influences in that domain from infancy to old age Within each chapter you will find sections on four life stages infancy childhood adolescence and adulthood This distinctive organisation enables students to comprehend the processes of transformation that occur in key areas of human development This text also includes a MindTap course offering with a strong suite of resources including videos and the chronological sections within the text can be easily customised to suit academic and student needs Exploring Psychology, Sixth Edition, in Modules David G. Myers, 2004-12-07 The success of the

modular version of David Myers's bestselling brief text Exploring Psychology proves the author's longheld belief supported by independent research that for a number of students a text comprised of 45 15 page chapters is more effective than one of 15 45 page chapters Exploring Psychology Sixth Edition in Modules includes all the features and up to date content of the current edition of Exploring Psychology organized into 45 modules It is accompanied by its own expansive variety of media and supplements similar to the Exploring Psychology package also reorganized to match the modular format This is NOT a brief version of Psychology Seventh Edition in Modules Rather this text is a MODULARIZED version of Exploring Psychology Sixth Edition **Lifespan Development** Tara L. Kuther, 2015-12-10 Recipient of the 2017 Most Promising New Textbook Award from the Textbook Academic Authors Association TAA Chronologically organized Lifespan Development Lives in

Context offers a unique perspective on the field by focusing on the importance of context examining how the places sociocultural environments and ways in which we are raised influence who we become and how we grow and change Author Tara L Kuther integrates cutting edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life Robust pedagogy student friendly writing and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan *A - Airports*
