Handbook Of War Studies II:

Handbook of War Studies II Manus I. Midlarsky, 2000 Essays reflecting the most recent theoretically and empirically oriented research on international warfare Handbook of War Studies III Manus I. Midlarsky, 2009-06-24 Handbook of War Studies III is a follow up to Handbook of War Studies I 1993 and II 2000 This new volume collects original work from leading international relations scholars on domestic strife ethnic conflict genocide and other timely topics Special attention is given to civil war which has become one of the dominant forms if not the dominant form of conflict in the world today Contributors Bruce Bueno de Mesquita New York University and Hoover Institution Stanford University Nils Petter Gleditsch International Peace Research Institute Oslo PRIO and Norwegian University of Science and Technology NTNU Trondheim Hvard Hegre University of Oslo and International Peace Research Institute Oslo PRIO Erin K Jenne Central European University Budapest Mark Irving Lichbach University of Maryland Roy Licklider Rutgers University New Brunswick T David Mason University of North Texas Rose McDermott Cornell University Stephen Saideman McGill University Hvard Strand International Peace Research Institute Oslo PRIO Monica Duffy Toft Harvard University Manus I Midlarsky is the Moses and Annuta Back Professor of International Peace and Conflict Resolution at Rutgers University New Brunswick He is the founding past president of the Conflict Processes Section of the American Political Science Association and a past vice president of the International Studies Association International Relations and Scientific Progress Patrick James, 2002 International Relations and Scientific Progress contends that a theory focusing on the structure of the international system explains a wider and more interesting range of events in world politics than other theories Such theorizing appears to be out of favor as the result of the apparent failure by structural realism the most prominent system level theory over the last two decades on any number of fronts most notably an inability to anticipate the ending of the Cold War and its aftermath This new book is put forward as the most comprehensive and innovative theoretical work on paradigms in international relations since the publication of Theory of International Politics which created structural realism more than two decades ago With appropriate revisions however structural realist theory can compete effectively and reclaim its primacy The first part of International Relations and Scientific Progress assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part reviews structural realism within that context and identifies a lack of connection between theory and research that links power based indicators to international conflict crisis and war This part of the book makes the case for an elaboration of structural realism by showing that a system level theory based on structure has great unrealized explanatory potential By comparison the current overwhelmingly research oriented agenda on state dyads imposes severe limitations on understanding that are not currently appreciated Part Three sums up the work and explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system

Understanding Foreign Policy Decision Making Alex Mintz, Karl DeRouen Jr, 2010-02-22 *Understanding Foreign Policy Decision Making* presents a psychological approach to foreign policy decision making This approach focuses on the decision process dynamics and outcome The book includes a wealth of extended real world case studies and examples that are woven into the text The cases and examples which are written in an accessible style include decisions made by leaders of the United States Israel New Zealand Cuba Iceland United Kingdom and others In addition to coverage of the rational model of decision making levels of analysis of foreign policy decision making and types of decisions the book includes extensive material on alternatives to the rational choice model the marketing and framing of decisions cognitive biases and domestic cultural and international influences on decision making in international affairs Existing textbooks do not present such an approach to foreign policy decision making international relations American foreign policy and comparative foreign policy

Globalization and Global History Barry K. Gills, William Thompson, 2012-11-12 *Globalization and Global History* argues that globalization is not an exotic and new phenomenon Instead it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations With this historical advantage the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past The book is divided into three sections The first focuses on how globalization has been written about from a historical perspective The second part advances three different takes on how best to view globalization from a very long term stance The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions

When the Stakes Are High Vesna Danilovic, 2010-06-04 *When the Stakes Are High* is based on the premise that powers have continually played a decisive role in international conflicts Consequently one of the key questions concerns the conditions that are likely to trigger or abate dispute escalation into major power conflicts In this book Vesna Danilovic provides a rigorous theoretical and empirical analysis of these conditions Since the most precarious and common form of dispute between major powers arises over third nations the author's primary focus is on so called extended deterrence In this type of deterrence one side attempts to prevent another side from initiating or escalating conflict with a third nation *When the Stakes Are High* addresses such questions as When is extended deterrence likely to be effective What happens if deterrence fails In what circumstances is war likely to result from a deterrence failure The author's main argument is that a major power's national interests which shape the inherent credibility of threats and which are shaped by various regional stakes set the limits to the relevance of other factors which have received greater scholarly attention in the past Strongly supported by the empirical findings the arguments in this work draw important implications for conflict theory and deterrence policy in the post Cold War era This book will appeal to the reader interested

in international relations in general and in theories of international conflict deterrence causes of wars great power behavior and geopolitics in particular Vesna Danilovic is Assistant Professor of Political Science Texas A M University

Regional Leadership in the Global System Daniel Flesmes, 2016-04-08 We assume that the ideas interests and strategies of regional powers are highly significant variables with the power to influence foreign policy Yet while comparative research projects involving OECD countries are fairly common comparative research integrating developing regions is still rare despite the fact that these countries are among the key actors of the twenty first century This collection emphasizes the role of regional powers in intra regional interregional and global contexts analyzing the rise of regional powers from a comparative perspective In so doing the book explains how these powers have power to shape regional and global politics

Paying the Human Costs of War Christopher Gelpi, Peter D. Feaver, Jason Reifler, 2009-02-09 From the Korean War to the current conflict in Iraq Paying the Human Costs of War examines the ways in which the American public decides whether to support the use of military force Contrary to the conventional view the authors demonstrate that the public does not respond reflexively and solely to the number of casualties in a conflict Instead the book argues that the public makes reasoned and reasonable cost benefit calculations for their continued support of a war based on the justifications for it and the likelihood it will succeed along with the costs that have been suffered in casualties Of these factors the book finds that the most important consideration for the public is the expectation of success If the public believes that a mission will succeed the public will support it even if the costs are high When the public does not expect the mission to succeed even small costs will cause the withdrawal of support Providing a wealth of new evidence about American attitudes toward military conflict Paying the Human Costs of War offers insights into a controversial timely and ongoing national discussion

Perfect Deterrence Frank C. Zagare, D. Marc Kilgour, 2000-09-21 An important and timely contribution to International Relations and political science this is the first general analysis of deterrence since the end of the Cold War Using non cooperative game theory the authors develop a new approach to deterrence Perfect Deterrence Theory which they apply to unilateral and mutual direct deterrence relationships

and to extended deterrence relationships supported by deployment policies such as Massive Retaliation and Flexible Response The authors focus on the relationship among capabilities preferences credibility and outcomes to achieve a new understanding of threats and responses Some surprising conclusions emerge indicating that credible threats to respond to attack can sometimes make an attack more likely and that incredible response threats can sometimes promote peace With the application of deterrence theory in diverse social settings and historical examples from before during and after the Cold War this book provides a welcome new examination of the subject

Thompson, 2016-01-26 Ever since the revival of Kant's Perpetual Peace thesis the linkages between democracy and peace has been a central topic in international relations research with sustained debate over whether it exists and if it does why it does In this stimulating volume two leading IR scholars place the democratic peace debate within a broader context including the extent of threats in international relations degree of satisfaction with the status quo the diffusion of democracy and the rise of the trading state Step by step Thompson and Rasler examine the democratic peace through a series of puzzles concerning arguments at the dyadic systemic and individual state levels Synthesizing a broad range of knowledge and linking islands of theory **Puzzles of the Democratic Peace** provides a distinctive look at the state of the field and paths forward

Acting Alone Bradley F. Podliska, 2010-02-15 Acting Alone A Scientific Study of American Hegemony and Unilateral Use of Force Decision Making is a straight forward analysis of unilateral U S military actions which are dependent upon the power disparity between the U S and the rest of the world In solving the puzzle as to why individual presidents have made the wrong decision to act alone the author lays out a president s behavior during a crisis as a two step decision process Acting Alone reviews the well studied first decision deciding to use force based on international conflict literature and organized along traditional lines The author then details the second decision deciding to use unilateral force with an explanation of the criticisms of multilateralism and the reasons for unilateralism To test a new theory of unilateral use of force decision making Acting Alone devises a definition and coding rules for unilateral use of force develops a sequential model of presidential use of force decision making and constructs a new alternative measure of military power a Composite Indicator of Military Revolutions CIMR It then uses three methods a statistical test with a heckman probit model an experiment and case studies to test U S crisis behavior since 1937 By applying these three methods the author finds that presidents are realists and make expected utility calculations to act unilaterally or multilaterally after their decision to use force The unilateral decision in particular positively correlates with a wide military gap with an opponent an opponent located in the Western hemisphere and a national security threat

International Relations Theory and the Consequences of

Unipolarity G. John Ikenberry, Michael Mastanduno, William C. Wohlforth, 2011-09-01 The end of the Cold War and subsequent dissolution of the Soviet Union resulted in a new unipolar international system that presented fresh challenges to international relations theory Since the Enlightenment scholars have speculated that patterns of cooperation and conflict might be systematically related to the manner in which power is distributed among states Most of what we know about this relationship however is based on European experiences between the seventeenth and twentieth centuries when five or more powerful states dominated international relations and the latter twentieth century when two superpowers did so Building on a highly successful special issue of the leading journal World Politics this book seeks to determine whether what we think we know about power and patterns of state behaviour applies to the current unipolar setting and if not how core theoretical propositions about interstate interactions need to be revised

Territory, War, and Peace John A. Vasquez, Marie T. Henahan, 2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of The Steps to War 2008 with Paul Senese and The War Puzzle Revisited 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henahan is Director of Internships and Lecturer Department of Political Science at the University of Illinois Urbana Champaign She is author of Foreign Policy and Congress An International Relations Perspective and co editor of The Scientific Study of Peace and War

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes

International Relations in the Cyber Age Nazli Choucri, David D. Clark, 2019-04-09 A foundational analysis of the co evolution of the internet and international relations examining resultant challenges for individuals

organizations firms and states In our increasingly digital world data flows define the international landscape as much as the flow of materials and people How is cyberspace shaping international relations and how are international relations shaping cyberspace In this book Nazli Choucri and David D Clark offer a foundational analysis of the co evolution of cyberspace with the internet as its core and international relations examining resultant challenges for individuals organizations and states The authors examine the pervasiveness of power and politics in the digital realm finding that the internet is evolving much faster than the tools for regulating it This creates a co evolution dilemma a new reality in which digital interactions have enabled weaker actors to influence or threaten stronger actors including the traditional state powers Choucri and Clark develop a new method for addressing control in the internet age control point analysis and apply it to a variety of situations including major actors in the international and digital realms the United States China and Google In doing so they lay the groundwork for a new international relations theory that reflects the reality in which we live one in which the international and digital realms are inextricably linked and evolving together
