Luff, 2002-03-15 *Ecological Golf Course Management* is the most comprehensive work ever done on ecological turf management. It is a must have for any golf course superintendent, sports field manager or turf professional interested in reducing or eliminating chemical pesticide use. *Ecological Golf Course Management* focuses on managing the health and welfare of all soil organisms from a single celled bacterium to fully developed turf plants and connects the reader to the important and relevant interactions between them. It points out ways to exploit natural plant defense systems that have been largely ignored and to engage many of the powerful allies that live above and below ground. *Ecological Golf Course Management* explores in detail the many aspects of Biological and botanical pest control, Plant stress management, Compost production and use, Natural disease suppressants, Biological fertility management, Soil leaf tissue and water analysis, The ecological impact of conventional pesticides and cultural practices *The Planting Design Handbook* Nick Robinson, 2020-09-10 Since the first edition was published in 1992, Nick Robinson's *The Planting Design Handbook* has been widely used as a definitive text on landscape architecture courses throughout the world. It remains one of the few titles written by a practicing landscape architect and educator who is also a horticulturalist and accomplished plantsman and which deals with the application of planting design on a large scale in landscape architecture and urban design projects. *The Planting Design Handbook* is distinctive for its elegant integration of an ecological approach with an understanding of visual and spatial composition. It emphasizes the role of vegetation layers and designed plant communities in complex and diverse plant assemblages for all kinds of sites and uses. This expanded and comprehensively updated third edition still provides a complete examination of principles and practice of design for public, institutional and private landscapes. It takes account of developments in theory and practice, especially in the use of perennials and reflects a variety of media and approaches current in landscape architecture and design. All chapters have been revised and re-written to ensure updated references and new references have been added. Many new photographs of planting and projects around the world have been included with examples of current professional drawings to illustrate the design process. It is generously illustrated including a colour section and the beautifully detailed line drawings of the Chinese architect and painter Jia Hua Wu **Managing Healthy Sports Fields** Paul D. Sachs, 2004-01-22 The huge chemical arsenal once available to turf managers for pest, weed and disease control has slowly but surely been restricted or regulated. As a result, alternative methods have had to be sought. This text aims to liberate the modern turf manager from dependency on chemical treatments through suggestions you can adapt to specific field types, climatic zones and desired appearance. Author Paul Sachs offers safety for people and animals as well as longevity for the land without sacrificing the quality of the turf itself.
