Handbook of the Sociology of Gender Janet Saltzman Chafetz, 2006-11-22 During the past three decades feminist scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities past and present Intrapsychic interactional and collective social processes are gendered as are micro meso and macro social structures Gender shapes and is shaped in all arenas of social life from the most mundane practices of everyday life to those of the most powerful corporate actors Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non academic activist thinkers However while incorporating some cross disciplinary material this volume focuses specifically on sociological theories and research concerning gender which are discussed across the full array of social processes structures and institutions As editor I have explicitly tried to shape the contributions to this volume along several lines that reflect my long standing views about sociology in general and gender sociology in particular First I asked authors to include cross national and historical material as much as possible This request reflects my belief that understanding and evaluating the here and now and working realistically for a better future can only be accomplished from a comparative perspective Too often American sociology has been both tempero and ethnocentric Second I have asked authors to be sensitive to within gender differences along class racial ethnic sexual preference and age cohort lines

**Handbook of the Sociology of Gender** Janet Saltzman Chafetz, 2006-05-02 During the past three decades feminist

scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities past and present. Intrapsychic interactional and collective social processes are gendered as are micro, meso, and macro social structures. Gender shapes and is shaped in all arenas of social life from the most mundane practices of everyday life to those of the most powerful corporate actors. Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non-academic activist thinkers. However, while incorporating some cross-disciplinary material, this volume focuses specifically on sociological theories and research concerning gender which are discussed across the full array of social processes, structures, and institutions. As editor, I have explicitly tried to shape the contributions to this volume along several lines that reflect my long-standing views about sociology in general and gender sociology in particular. First, I asked authors to include cross-national and historical material as much as possible. This request reflects my belief that understanding and evaluating the here and now and working realistically for a better future can only be accomplished from a comparative perspective. Too often, American sociology has been both temperate and ethnocentric. Second, I have asked authors to be sensitive to within-gender differences along class, racial, ethnic, sexual preference, and age cohort lines.

Thematically organized chapters explore the development of Women's and Gender Studies as an academic discipline, changes in the field, research directions, and significant scholarship in specific interrelated disciplines such as science, health, psychology, and economics. Original essays offer fresh perspectives on the mechanisms by which gender intersects with other systems of power and privilege, the relation of androcentric approaches to science and gender bias in research, how feminist activists use media to challenge misrepresentations and inequalities, disparity between men and women in the labor market, how social movements continue to change Women's and Gender Studies, and more. Engages with both individual and collective approaches to agency and resistance. Addresses topics of intense current interest and debate such as transgender movements, gender-based violence, and gender discrimination policy. feminist studies or related disciplines such as psychology history education political science sociology and cultural studies as well as practitioners and policy makers working on issues related to gender and sexuality

**The Gender Vendors** A. L. Jones, 2014-08-26 Among numerous ancient Western tropes about gender and procreation the seed and the soil is arguably the oldest most potent and most invisible in its apparent naturalness The Gender Vendors denaturalizes this proto theory of procreation and deconstructs its contemporary legacy As metaphor for gender and procreation seed and soil constructs the father as the sole generating parent and the mother as nurturing medium like soil for the man's seed child In other words men give life women merely give birth The Gender Vendors examines seed and soil in the context of the psychology of gender honor and chastity codes female genital mutilation the taboo on male femininity femiphobia the fear of being feminine or feminized sexual violence institutionalized abuse the early modern witch hunts the medicalization and criminalization of gender nonconformity and campaigns against women's rights The examination is structured around particular watersheds in the history of seed and soil for example Genesis ancient Greece early Christianity the medieval Church the early modern European witch hunts and the campaigns of the nineteenth and twentieth centuries against women's suffrage and education The neglected story of seed and soil matters to everyone who cares about gender equality and why it is taking so long to achieve
