2nd IWA Leading-Edge on Water and Wastewater Treatment Technologies Mark C. M. van Loosdrecht, Jonathan Clement, 2005-04-30 Wastewater and drinking water treatment are essential elements of urban infrastructure In the course of the last century there has been enormous technical development so successful that for the general public in industrialized countries this infrastructure is hardly noticed Nevertheless there is ongoing activity to further improve the existing processes The IWA Leading Edge Technology conference held in Prague helped to stimulate this development and this book helps disseminate the results A selection of presentations from the conference are included in this volume Wastewater and drinking water treatment are normally considered as two separate fields due to the very different boundary conditions that apply Nevertheless several issues such as membrane processes removal of micropollutants and water reuse are of crucial importance to both This potential for cross fertilization further enhances the value of this collection of high quality articles that delineate the leading edge of research and development in water and wastewater treatment

Advanced Industrial Wastewater Treatment and Reclamation of Water Swapnila Roy, Alok Garg, Shivani Garg, Tien Anh Tran, 2021-11-20. This book focuses on industrial wastes that either join the streams or other natural water bodies directly or are emptied into the municipal sewers, and their characteristics vary widely depending on the source of production and the raw material used by the industry even during the pre-industrial period and prospect of wastewater treatment for water resource conservation. The treatment of industrial wastewater can be done in part or as a whole either by the biological or chemical processes. Advanced treatment methods like membrane separation, ultra-filtration techniques, and adsorption are elaborated. It would emphasize and facilitate a greater understanding of all existing available research, i.e., theoretical, methodological, well-established, and validated empirical work associated with the environment and climate change aspects.

Activated Carbon for Water and Wastewater Treatment Ferhan Cecen, Özgür Aktas, 2011-09-19. This monograph provides comprehensive coverage of technologies which integrate adsorption and biological processes in water and wastewater treatment.
