

Let's imagine how a **military historian**, a **social psychologist**, and a **political scientist** would read this text. Follow the color-coding below to find which words and phrases a practitioner in each discipline might emphasize:

**Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war, testing whether that nation or any nation so conceived and so dedicated can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting-place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But in a larger sense, we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead who struggled here have consecrated it far above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us the living rather to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us--that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion--that we here highly resolve that these dead shall not have died in vain, that this nation under God shall have a new birth of freedom, and that government of the people, by the people, for the people shall not perish from the earth.**

**A Writer's Reference with Writing in the Disciplines** Diana Hacker, Nancy Sommers, 2011-04-08 With Writing in the Disciplines Cover [The St. Martin's Handbook](#) Andrea A. Lunsford, 2011-02-11 Lunsford found that today's students write more than ever before and make rhetorically appropriate choices in texts they create outside the classroom This is the first handbook to help students build on the smart decisions they make as recreational writers in order to succeed in their academic and professional work It is an all in one teaching tool and reference that shows students how to write effectively for any purpose

**The Oxford Guide for Writing Tutors** Melissa Ianetta, Lauren Fitzgerald, 2016 The Oxford Guide for Writing Tutors introduces two conversations to the tutor's preparation one about the creation of knowledge in writing programs the other about tutor research This approach to tutor training provides several benefits First it allows tutors to test their theories of what might work in a writing center session and helps them to move professional conversation towards why such things happen They bridge the theory practice divide

that often frustrates both novices and experienced tutors. By conducting research to answer such questions, tutors can help themselves, the writers with whom they work, their fellow tutors, and the writers with whom they work. And further, this approach gives the reader new methods for appreciating and critiquing scholarly work, making it easier to understand the best ways to help writers and to move the field forward. As writing tutoring programs take on a variety of forms and pursue a range of missions, this book aims to create a flexible text whose contents can be easily rearranged to support a broad spectrum of reader needs. Each chapter accordingly can be read independently; the text does not rely on a sequential reading to create meaning. The book also includes intra-textual and extra-textual references for the reader who wants to inquire further. That is, throughout the book are references to material in other chapters that might be of interest to the reader intrigued by the topic at hand. So too, in each chapter we include references to and citations of the scholarship that supports much of the common knowledge of the field, including in the Handbook both previous tutor education textbooks and research from the field. The aim is to aid the interested reader's inquiry into the scholarship of the field as well as to ground advice about practice in research that testifies to the effectiveness of a range of tutoring practices. Much of the scholarship cited throughout the book is authored by undergraduate tutor researchers as well as several former tutors who were graduate students when they published their articles. This crucial aspect best models the ways in which tutors themselves can bring together practice and research in their day-to-day work and in their informed thinking about this work. Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country.

Student Writing in the Quantitative Disciplines Patrick Bahls, 2012-03-06. Designing interesting problems and writing assignments is one of the chief tasks of all teachers, but it can be especially challenging to translate and apply learning theory, good teaching techniques, and writing assignments into STEM and other quantitative disciplines. Student Writing in the Quantitative Disciplines offers instructors in math-based disciplines meaningful approaches to making their coursework richer and more relevant for their students as well as satisfying institutional imperatives for writing curricula. This important resource provides instructors with the hands-on skills needed to guide their students in writing well in quantitative courses at all levels of the college curriculum and to promote students' general cognitive and intellectual growth. Comprehensive in scope, the book includes ideas for using writing as a means of learning mathematical concepts, illustrative examples of effective writing activities and assignments in a number of different genres, assessment criteria and effective strategies for responding to students' writing, examples of ways to help students engage in peer review, revision, and resubmission of their written work. Those of us who spend our lives urging faculty in all disciplines to integrate more writing into their courses have wished for the day when someone like Patrick Bahls would step forward with a book like this one.

Chris M. Anson, University Distinguished Professor and director, Campus Writing and Speaking Program, North Carolina State University. Written by a mathematician, this readable, theoretically sound book

describes practical strategies for teachers in the quantitative sciences to assign and respond to students writing. It also describes numerous approaches to writing that engage students in disciplinary learning, collaborative discovery, and effective communication. Art Young, Campbell Professor of English emeritus, Clemson University, loaded with practical advice. This timely, important, and engaging book will be an invaluable resource for instructors wishing to bring the benefits of writing to learn to the quantitative disciplines. As a mathematician thoroughly grounded in writing across the curriculum scholarship, Bahls brings humor, classroom experience, and pedagogical savvy to a mission he clearly loves: improving the quality of student learning in math and science. John C. Bean, professor, Seattle University, and author, *Engaging Ideas*. **The Rinehart Handbook for Writers**, Bonnie Carter, Gary W. Carter, Craig Skates, 1992-10-01.
