Wells, Jamie Rankin, 1993-01-01 **Language in the Context of Use** Andrea Tyler, Yiyoun Kim, Mari Takada, 2008-08-27 The volume explores key convergences between cognitive and discourse approaches to language and language learning both first and second The emphasis is on the role of language as it is used in everyday interaction and as it reflects everyday cognition The contributors share a usage based perspective on language whether they are examining grammar or metaphor or interactional dynamics which situates language as part of a broader range of systems which underlie the organization of social life and human thought While sharing fundamental assumptions about language the particulars of the areas of inquiry and emphases of those engaged in discourse analysis versus cognitive linguistics are diverse enough that historically many have tended to remain unaware of the interrelations among these approaches Thus researchers have also largely overlooked the possibilities of how work from each perspective can challenge inform and enrich the other The papers in the volume make a unique contribution by more consciously searching for connections between the two broad approaches The results are a set of dynamic thought provoking analyses that add considerably to our understanding of language and language learning The papers represent a rich range of frameworks within a usage based approach to language Cognitive Grammar Mental Space and Blending Theory Construction Grammar ethnomethodology and interactional sociolinguistics are just some of the frameworks used by the researchers in this volume The particular subjects of inquiry are also quite varied and include first and second language learning signed language syntactic phenomena interactional regulation and dynamics discourse
