Handicap And Politics:

Disability and U.S. Politics Dana Lee Baker, 2017-01-16 More than 1 billion people worldwide have a disability and they are all affected by politics This two volume work explores key topics at the heart of disability policy such as voting race gender age health care social security transportation abuse and the environment Disability policy is no longer an area that can be adequately addressed within major areas of public policy such as welfare health labor and education Disability has become widely acknowledged in recent decades partly because of the increasing number of disabled citizens across all demographic populations Advocates argue that diversity of all kinds deserves recognition and accommodation This set examines policies targeting disability to provide a multifaceted description of the political participation of people with disabilities as well as disability policy development in the United States The first volume focuses on political participation and voting issues and the second volume covers disability public policy In these two volumes numerous scholars and experts in the social sciences and humanities explore timely topics that are key to disability policy questions including activism voting race gender age health care social security civil rights abuse the environment and even death Readers will better understand the challenges that policymakers face in grappling with controversies over issues of social engineering and public policy often attempting to reconcile majority experience with minority rights The chapters analyze the history of disability politics describe the disability policy infrastructure as it currently exists in the United States and provide insight into current disability related controversies

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches

Disability, Civil Rights, and Public Policy Stephen L. Percy, 2018-04-10 Disability Civil Rights and Public Policy examines how implementation policies in these areas evolved through protracted

political struggles among a variety of persons and groups affected by disability rights laws Efforts to influence these policies extended far beyond the process of legislative enactment and often resulted in struggles played out in the courts and the executive branch The role of symbolic politics the strengths and weaknesses of the contemporary models used for policy implementation and the politics of administrative policymaking play key roles in this study

Disability Politics and Community Care Mark Priestley, 1999 Priestley encourages health and welfare professionals and policy makers to start working much more closely with disabled people themselves He argues that this will break barriers between user and provider and result in the reality of integrated living

The Politics of Mental Handicap Joanna Ryan, 1987

Cheap Talk Joshua St. Pierre, 2022-05-25 In Cheap Talk Disability and the Politics of Communication Joshua St Pierre flips the script on communication disability positioning the unruly disabled speaker at the center of analysis to challenge the belief that more communication is unquestionably good Working with Gilles Deleuze's suggestion that we don't suffer these days from any lack of communication but rather from all the forces making us say things when we've nothing much to say St Pierre brings together the unlikely trio of the dysfluent speaker the talking head and the troll to show how speech is made cheap and produced and repaired within human bodies to meet the inhuman needs of capital The book explores how technologies like social media and the field of speech language pathology create smooth sites of contact that are exclusionary for disabled speakers and looks to the political possibilities of disabled voices to de face

research and a variety of qualitative and quantitative data It discusses why increasing the number of disabled politicians matters not only as a matter of justice and equality but also to better represent the issues and interests of importance to disabled people Evans and Reher identify a variety of ableist barriers prevent disabled people from fully participating in the political process from disenfranchisement and inaccessible polling stations to prejudice within parties and a lack of financial support for candidates who require adjustments The work shows that while the preferences of disabled citizens are currently under represented in parliament disabled representatives often draw on their lived experience to advocate for their interests The concept of experiential representation is developed to help scholars and practitioners better navigate the concept of political representation specifically as it relates to disability Thus the book explores how disability can help us think about the contours of political representation It presents and analyses a range of diverse and original data including qualitative data generated from interviews with disabled politicians and activists in the UK quantitative survey data on the political attitudes and participation of disabled citizens from across Europe and data from survey experiments examining voter perceptions of disabled politicians in the UK and the US
