Subcommittee on Housing and Urban Affairs, 1980 **Credit Marketing and Consumer Protection** Terence G. Ison, 2025-08-01 The mid 20th century saw a significant expansion in the purchase of consumer goods and in the use of credit At the same time several changes in the nature of consumer credit took place Credit cards made credit more readily available for goods and services and mass production automated selling methods and the growth of consumer credit brought advantages But they have also provided opportunities for predatory practices and deception Originally published in 1979 and based on surveys and interviews this book presents a review of some of these developments together with an evaluation of some of the techniques of control over abuses in the marketing of consumer goods The book discusses the financing of consumer goods the variables that might have causative significance in leading to satisfactory or unsatisfactory transactions and the legal positions of the time in relation to consumer problems *Reports of the Tax Court of the United States* United States. Multinational Banking Division, 1993 **Consumer Credit, Debt and Bankruptcy** Johanna Niemi, Iain Ramsay, William C. Whitford, 2009-07-15 After a long period of prosperity and steady economic growth the world's leading economies are now in crisis and although there will be debate about its origins the scale and seriousness of the crisis is in no doubt There is also no doubt that excessive amounts of consumer credit allied to a weak understanding of how globalised credit markets might

react to a crisis have played a significant part This book which is primarily about credit debt and the trouble they have led to is written by authors who have specialised in researching into over indebtedness that is situations in which an individual s debt burden has become overwhelming For these authors the plight of individuals is a primary concern but the wider issue is how credit is used and how it changes societies The essays in this volume addressing topics which are fundamental to our understanding of the current crisis range widely across the whole sector of consumer finance including mortgages credit binges the regulation of consumer lending insolvency repayment plans debt counselling and much more besides The conclusions drawn from the book are equally wide ranging but above all the lesson learned from these essays is that the financialisation of contemporary life ensures that issues of the appropriate role of credit remain of critical importance in society
