Social and Emotional Adjustment and Family Relations in Ethnic Minority Families Ronald D. Taylor, Margaret C. Wang, Margaret C

Wang, 2013-11-26 This collection of essays addresses issues related to the intersection of family relationships and several contexts for the social and emotional development of ethnic minority adolescents The papers are organized in sections under subtitles which reflect three contextual frames through which these issues may be examined The first section focuses on the relationship between economic factors and resources on the one hand and family relations as environments for development on the other The next part focuses on family and peer networks and relations as contexts for the emotional and social development of adolescents The last section takes neighborhood and school as contexts for and determinants of social and emotional adjustment in adolescence Like much of the extant work and current thought concerning development in ethnic minority children and adolescents the authors have highlighted the more stressful and negative aspects of these several contexts There are a few explicit and several implicit references made to supportive and more positive contexts and manifestations of relationships which frame the developmental experiences of ethnic minority adolescents These serve as a reminder that many ethnic minority adolescents do overcome the odds against success and grow into healthy and wholesome adults However in large measure this book is a contribution to our understanding of the problematic circumstances under which a significant segment of the population exists reminding us that life for ethnic minority adolescents is difficult The fact that some of these young people manage to overcome the negative and stressful aspects of their experiences and defy the implicit prediction of failure to thrive is truly remarkable

The Culture of Child Care Kay E. Sanders, Alison Wishard Guerra, 2016 As societies are experiencing increasing levels of immigration from contexts outside of the Western industrialized world child care programs are experiencing simultaneously increasing diversity in enrollment A question that has been raised by early childhood advocates and practitioners is whether the former articulations regarding definitions of quality models of relationships and peer relations in the child care context are accurate and relevant within the increasing racial linguistic and ethnic diversity of the United States The Culture of Child Care provides a much needed integration of research pertaining to crucial aspects of early childhood development attachment in non familial contexts peer relations among ethnically and linguistically diverse children and the developmental importance of child care contexts during early childhood This volume highlights the interconnections between these three distinct bodies of research and crosses disciplinary boundaries by linking psychological and educational theories to the improvement of young children s development and experiences within child care The importance of cultural diversity in early childhood is widely acknowledged and discussed but up until now there has been little substantive work with a cultural focus on today s educational and early child care settings This innovative volume will be a unique resource for a wide range of early childhood professionals including basic and applied developmental researchers early childhood educators and advocates and policymakers
