The globe is tilted, showing continents in shades of blue, green, and red. The background features a soft, hazy sky with pinkish clouds and a line of evergreen trees on the right. Denters, Paul J.I.M. de Waart, 2023-11-27 The chapters in this volume are based on the papers that were presented at the Calcutta seminar organized in March 1992 by the ILA Committee on Legal Aspects of a New International Economic Order NIEO The conference focused on the right to development in particular its ideas and ideology human rights aspects and implementation in specific areas of international law The volume is accordingly organized in three parts The chapters cover a vast area of subjects derived from the UN Declaration of the Right to Development From the developed and underdeveloped world 33 authors discuss topics including contents scope and implementation of the right to development human rights of individuals and peoples co operation between the European Community and the Lomé IV states current developments in investments treaties refugee protection development and democracy concept of sustainable development environmental issues protection of intellectual property transfer of technology human rights in international financial institutions and the legal conceptualization of the debt crisis Professor Oscar Schachter observes in the first chapter that the Declaration continues to be a challenging subject for legal commentary for its debatable legal status its combination of collective and individual rights its expansive conception of development and its equivocal obligation Apart from support doubts about the concept to the right to development may also be found in this volume Peace Treaties and International Law in European History Randall Lesaffer, 2004-08-19 In the formation of the modern law of nations peace treaties played a pivotal role Many basic principles and rules that governed and still govern relations between states were introduced and elaborated in the great peace treaties from the Renaissance onwards Nevertheless until recently few scholars have studied these primary sources of the law of nations from a juridical perspective In this edited collection specialists from all over Europe including legal and diplomatic historians international lawyers and an International Relations theorist analyse peace treaty practice from the late fifteenth century to the Peace of Versailles of 1919 Important emphasis is given to the doctrinal debate about peace treaties and the influence of older Roman and medieval concepts on modern practices This book goes back further in time beyond the epochal Peace of Treaties of Westphalia of 1648 and this broader perspective allows for a reassessment of the role of the sovereign state in the modern international legal order **Third World Attitudes Toward International Law** Frederick E. Snyder, Surakiart Sathirathai, 1987-06-23 *Integrating Human Rights into Development Cooperation: The Case of the Lomé Convention* Karin Arts, 2021-08-04 Human rights democracy and governance concerns are prominent elements in the development cooperation policy of the European Community The relations between the European Community EC and 71 developing countries in Africa the Caribbean and Pacific ACP have proved to be a laboratory for developing ideas on these

matters for translating them into binding treaty norms and for applying them in practice The experiences gained in the ACP EC relationship carry special value because they are the product of dialogue and joint decision making between groups of developed and developing states Therefore 25 years of ACP EC cooperation under the Lom Convention provide a rich learning ground for anybody involved or interested in the debate on linking development cooperation to human rights and to human rights related concerns This book explores the international law aspects of the subject It first investigates the general international legal basis for linking development cooperation to human rights democracy and good governance Both the negative and positive ways of making such a linking by punitive and supportive measures are addressed The book then delves into the evolution of Lom treaty norms on the subject and into the concrete human rights practices that took shape under them It explores the contributions to and influence of both the EC and ACP states on those treaty provisions and practices A comprehensive overview is provided of the support measures and sanctions resorted to in response to the human rights situation in ACP countries The book assesses the overall experiences gained and presents a synthesis of factors that proved to be constraints or conducive to the efforts to integrate human rights fully into ACP EC development cooperation The insights gained could well inform similar efforts undertaken by others

Within international law there is no unified concept of peace This book addresses this gap by considering the liberal conception of peace within Western philosophy alongside the principle of peaceful coexistence supported in the East By tracing the evolution of the international law of peace through its historical and philosophical origins this book investigates whether there is a right to peace The book explores how existing international law and institutions contribute to the establishment of peace or how they fail to do so It sets out how international law promotes the negative dimension of peace the absence of violence as well as its positive dimension the presence of underlying conditions for peace It also investigates whether international actors and institutions have particular obligations in relation to the establishment and maintenance of peace Discussions include the relationships between the different regimes of human rights trade development the environment and regulation of arms trade with peace the role of women refugees and other groups seeking equal treatment the role of peacekeepers transitional justice mechanisms international courts fact finding missions and national constitutional frameworks in upholding peace in practice and how civil society participates in the promotion and safeguarding of peace The book's comprehensive treatment of the concept of peace in international law makes it an ideal reference work for those working in the field as well as for students Minorities and the Making of Postcolonial States in International Law

Mohammad Shahabuddin, 2021-06-10 The ideological function of the postcolonial national liberal and developmental state inflicts various forms of marginalisation on minorities but simultaneously justifies oppression in the name of national unity equality and non discrimination and economic development International law plays a central role in the ideological making of the postcolonial state in relation to postcolonial boundaries the liberal individualist architecture of rights and the neoliberal economic vision of development In this process international law subjugates minority interests and in turn aggravates the problem of ethno nationalism Analysing the geneses of ethno nationalism in postcolonial states Mohammad Shahabuddin substantiates these arguments with in depth case studies on the Rohingya and the hill people of the Chittagong Hill Tracts against the historical backdrop of the minority question in Indian nationalist and constitutional discourse Shahabuddin also proposes alternative international law frameworks for minorities International Law and Transition to Peace in Colombia César Rojas-Orozco, 2021-07-05 In International Law and Transition to Peace in Colombia César Rojas Orozco analyses the role of international law in transition from armed conflict to peace by using the analytical framework of jus post bellum and Colombia as a case study While contemporary attention to jus post bellum has focused on its theoretical development and

regarding international warfare this book is the first work to comprehensively assess the concept in practice and in the context of a non international armed conflict Discussing the creative formulas adopted in Colombia to conciliate international legal requirements and the practical needs of peace the book offers concrete elements to understand the concept of jus post bellum as a framework to guide other transitions around the world

The Roles of International Law in Development Siobhan McNerney-Lankford,Robert McCorquodale,2023-10-21 The Roles of International Law in Development provides an in depth analysis of the relationship between public international law and development Unlike the existing body of literature on public international law this book investigates how international law and development interact and evaluates the significant and multifaceted roles that international law plays in development Bringing together a collection of perspectives from contributors working across multiple fields the chapters explore the relevance and applicability of international law to particular sectors and issues implicated in development activities This includes chapters on human rights gender equality race and discrimination environmental law and climate change forced displacement and migration and international trade and investment They analyse how international law rules and processes can influence procedural and substantive aspects of development policies as these regulate various forms of financial support trade technical assistance and policy dialogue They also explore whether and how development could be more effective and yield more equitable and sustainable outcomes if the relevant and applicable rules of international law were better understood consistently incorporated and appropriately applied to development activities A foundational premise of this book is that development policy and practice should be grounded more systematically in international law rejecting the notion that development law and policy comprise a self contained regime or that development is undertaken in a legal vacuum The proposed systematic grounding in public international law would in turn help uphold international legal accountability in the

context of development activities
