Economic Integration Of Korean Peninsula:

Economic Integration of the Korean Peninsula Marcus Noland, 1998 The North Korean economy cannot sustain its population Absent fundamental economic reforms it will never be able to do so Hence North Korea will require sizable external support for the foreseeable future South Korea China Japan and the United States have been willing to provide this support because they fear a collapse in the North or even worse a lashing out that would unleash war on the peninsula and put millions of people in Asia in jeopardy including thousands of US troops stationed in South Korea and Japan The status quo is thus closer to extortion than charity In this volume a diverse group of contributors analyze prospective developments on the Korean peninsula The authors first address the three broad strategic possibilities of war collapse and gradual adjustment Four immediate policy issues are then considered the current economic conditions and policies in the North the food crisis the nuclear energy nuclear weapons issue and the possibility of large scale refugee flows Finally the volume considers several longer run issues concerning the inevitable integration of the peninsula the potential relevance of the German experience the costs and benefits of economic unification between North and South Korea and the possible role of the international financial institutions in funding the new arrangement The volume concludes with recommendations for policymakers especially in the United States and South Korea from the preceding analyses

North Korea and Economic Integration in East Asia Yeongseop Rhee, Patrick Messerlin, 2019-06-27 Throughout North Korea's history it has regarded external relations with suspicion and as a potential threat to its regime With North Korea working towards denuclearization there is now hope for an economic opening This book examines the external economic strategies that North Korea may consider for its reforms and development which are related to the East Asian economic integration process This book emphasizes that considering theoretical factors as well as conditions of the North Korean economy economic opening and integration should have high priority anteceding or at least being parallel to economic reforms and transformation Also among various alternative strategies for achieving the goal of economic reform and development based on economic opening the utilization of East Asian regional economic integration framework would be the best option for North Korea because this framework can provide an opportunity for North Korea to overcome structural problems in its external economic relations and to circumvent political conflicts thus leading to a smoother rapprochement towards economic opening This book is timely as it shows how a new economic recovery strategy on the Korean Peninsula may be accomplished

Regional and Urban Policy and Planning on the Korean Peninsula Harry Ward Richardson, Chang-Hee Christine Bae, 2011-01-01 The potential for reunification of the two Koreas whether in the short or long term argues for a comprehensive look at policy and planning issues that encompass the peninsula as a whole This book deals with spatial policy issues in both South and North Korea in a broad and non political way Part one deals with South Korea examining cultural changes the capital city of Seoul Greenbelt policy the balanced national regional development strategy and the new mega regional approach Part two delves into aspects of development in North Korea such as the limitations of national statistics the marketization of the economy integration with the rest of North East Asia and the need for a spatial infrastructure strategy Part three examines the case for reunification in the interests of both the South and North It argues that a transitional approach would be less costly and less risky than sudden reunification primarily via an early strategy of shifting more capital to the North and later by moderating migration flows to the South The book also examines whether the capital should remain in Seoul or be relocated elsewhere should reunification occur Professors students and public policy officials in the fields of Asian studies regional economics and planning urban studies and political science and any reader interested in the future of Korea will find this book very current and enlightening

Korea in the New Asia Francoise Nicolas, 2007-06-07 Since the late 1970s a number of regional developments have impacted upon South Korea's political and economic standing in Asia China's spectacular growth and closer integration with its neighbouring economies along with a tendency toward more assertive political and diplomatic activity have deeply altered both the economic and political East Asian environment Simultaneously the 1997-98 financial crisis catalysed a process of increased regional co-operation in East Asia China's rise has imposed a leadership problem that may constitute a major obstacle on the road to deeper regional integration as well as add force to the need for collective action and it is this paradox that may give South Korea a key role in the reorganization of the region Moreover inter-Korean relations and Korea's future security environment may also feel the effects of the rise of China Korea in the New Asia seeks to analyze to what extent and how South Korea may contribute to and take advantage of the new regional configuration in East Asia The book represents the first study to address Korea's regional policy responses to the rise of China as an economic power and the regional economic integration of East Asia Written by an international team of experts this multidisciplinary study will appeal to researchers academics and students with an interest in international relations security studies economics and East Asian politics

Korea at the Center: Dynamics of Regionalism in Northeast Asia Charles K. Armstrong, Gilbert

Rozman, Samuel S. Kim, Stephen Kotkin, 2016-09-16 The common images of Korea view the peninsula as a long standing battleground for outside powers and the Cold War's last divided state But Korea's location at the very center of Northeast

Asia gives it a pivotal role in the economic integration of the region and the dynamic development of its more powerful neighbors. A great wave of economic expansion driven first by the Japanese miracle and then by the ascent of China has made South Korea an economic powerhouse in its own right, the hub of the region once again a natural corridor for railroads and energy pipelines linking Asiatic Russia to China and Japan. And over the horizon an opening of North Korea with multilateral support would add another major push toward regional integration. Illuminating the role of the Korean peninsula in three modern historical periods, the eminent international contributors to this volume offer a fresh and stimulating appraisal of Korea as the key to the coalescence of a broad open Northeast Asian regionalism in the twenty fifth century. **North**

Korea in the World Economy Eun Kwan Choi, E. Han Kim, Yesook Merrill, 2003-08-29. Mention North Korea to people today and they will conjure up many unflattering images particularly in the wake of George W. Bush denouncing the state as part of an axis of evil. Despite this cold war type rhetoric the state of North Korea has begun to recognise the difficult challenges that it faces and is now trying to get to grips with them systematically. This book brings together a selection of many of the world experts on the North Korean economy and covers such important issues as possible unification with South Korea, the significance of China's economic success, Europe and the United States' roles in North Korea. **North Korea in the World Economy** provides an accessible, well written and comprehensive account of this unique country and its economy. It will be extremely interesting not only for students and academics with an interest in Korean studies, international finance and transition economies but also for anyone with an interest in international economics. **Constitutional Handbook on Korean Unification** Korea Economic Research Institute (South Korea), 2002-11-27. Korea's Future and the Great Powers Nicholas Eberstadt, Richard J. Ellings, 2012-03-15. The eventual reunification of the Korean Peninsula will send political and economic reverberations throughout Northeast Asia and will catalyze the struggle over a new regional order among the four great powers of the Pacific: Russia, China, Japan and the United States. **Korea's Future and the Great Powers** addresses the vital issues of how to achieve a stable political order in a unified Korea, how to finance Korean economic reconstruction and how to link Korea into a cooperative framework of international diplomatic relations. *Avoiding the Apocalypse: The Future of the Two Koreas* [ISBN not on www] Noland, Marcus, 2000.

Korea's Economic Miracle C. Harvie, Hyun-Hoon Lee, 2002-12-17. Korea, one of the original Tiger Economies, experiences a traumatic and largely unanticipated economic crisis in 1997-98 from which the country is still recovering. Despite having achieved spectacular economic advances from the early 1960s, the crisis laid bare numerous structural economic and policy weaknesses. Charles Harvie and Hyun Hoon Lee chronicle and analyze the key factors behind Korea's economic miracle from 1962-1989 and the causes that contributed to the economic downturn and ensuing crisis of 1997-98. Is the Korean economy

still fading or is its revival underway As the country undertakes a series of recovery measures the authors consider the importance of the ongoing restructuring efforts in the corporate and banking sectors the development of the new economy and the potential economic advantages to be derived from reunification with the North **The Ashgate Research**
