Pretty, 1993 The author looks at the challenge facing agriculture today and details the concepts and characteristics of alternative sustainable agricultural practices Empirical evidence from a diverse range of agro ecological and community setting show the impact of more sustainable practices In addition existing policy frameworks and institutional processes are considered and alternatives which are known to work are presented

*Integrating the Economy and the Environment* David William Pearce, Ece Özdemiroğlu, 1997 This paper provides a comprehensive overview of the key conceptual policy and practical aspects of integrating economic and environmental policies Policy makers confront several complex issues in trying to harmonise economic and environmental objectives

**The Economics of Ecosystems and Biodiversity: Ecological and Economic Foundations** Pushpam Kumar, 2012-12-20 Human well being relies critically on ecosystem services provided by nature Examples include water and air quality regulation nutrient cycling and decomposition plant pollination and flood control all of which are dependent on biodiversity They are predominantly public goods with limited or no markets and do not command any price in the conventional economic system so their loss is often not detected and continues unaddressed and unabated This in turn not only impacts human well being but also seriously undermines the sustainability of the economic system It is against this background that TEEB The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues This book written by a team of international experts represents the scientific state of the art providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity and showing how these can be mainstreamed into public policies This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade

**Environmental Valuation** Jennifer Rietbergen-McCracken, Hussein Abaza, 2013-10-11 This companion volume to Economic Instruments for Environmental Management presents essential information on the applications of economic valuation to environment and development It draws on a three year collaborative effort by research institutions around the

world Authoritative studies review the range of valuation methods used in developing economies their purposes the problems encountered and the quality of the results Topics covered include the value of wildlife viewing the conservation of rainforests mangroves and coral reefs supplying rural water and controlling urban air pollution The analysis reveals important methodological and contextual factors highlighting key lessons and ways of strengthening future valuations Written to be accessible to non economists the book provides source material for students and academics and for policy makers and professionals using valuation methods to frame policy

**Economics of Poverty, Environment and Natural-Resource Use**

**Use** Rob B. Dellink, Arjan Ruijs, 2008-03-25 Reduction of poverty is a tremendous and persistent challenge for the global community Given that the livelihood of millions is at stake there is an urgent need to reconsider the causes of and the remedies for poverty Poverty and its reduction are closely linked to the natural resources base The quality and bounty of the local environment certainly affect living conditions of the poor and their poverty is often seen as a contributing factor to the degraded condition of the local environment Teasing apart the direction of causality in this resource poverty nexus is a serious empirical challenge This book contributes to an improved understanding of the economic dimensions of environmental and natural resource management and poverty alleviation The ten chapters of the book offer an overview of the current knowledge concerning the relation between poverty environment and natural resource use Three sides of the debate receive particular attention First the relation between resource use and poverty is discussed from a theoretical point of view Second it is questioned whether payments for environmental services or considering values of resources can be an effective tool for stimulating both sustainable resource use and poverty alleviation Third alternative strategies to break the land degradation poverty cycle are discussed

*Environmental Valuation in Developed Countries* David W. Pearce, 2006

*Environmental Valuation in Developed Countries* will be of interest to policy makers and economist in search of a variety of methodologies related to environmental valuation Political Studies Review This is the second of two volumes of case studies that illustrate how environmental economists place values on environmental assets and on the flows of goods and services generated by those assets The first volume *Valuing the Environment in Developing Countries* illustrates methodologies and applications of valuation techniques in the developing world this volume concentrates on developed or wealthy nations where the first examples of economic valuation of the environment were carried out This important book assembles studies that discuss broad areas of application of economic valuation from amenity and pollution through to water and health risks from forestry to green urban space In this his last book the late David Pearce brought together leading European experts contributors to some two dozen case studies exploring the frontiers of economic valuation of natural resources and environmental amenity in the developed world Essays on the role of valuation in environmental policy environmental justice and green accounts are presented and case study topics include valuing forestry benefits GM crops water use and quality externalities in the electricity sector renewable energy benefits electricity transmission line disamenity urban greenspace

chemical risks noise pollution Economic valuation has undoubtedly made an important contribution to the environmental debate and the contributors illustrate how sophisticated techniques have become and how powerful their application can be As such this significant volume will prove essential reading for academics researchers students and practitioners in the field of environmental economics

Water and Development - Volume II Catherine M .Marquette,2009-08-10 Water and Development is a component of Encyclopedia of Water Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Water is perhaps the most critical natural resource upon which humans depend Agricultural and food production trade and ultimately the economic development of all regions of the world depend on rivers streams dams oceans and other water resources This critical relationship has persisted through the agricultural and industrial revolution and into the era of economic globalization The relationship between human activity and the water resources on which it depends also continues to be reciprocal Human consumption energy agricultural industrial and other economic activity have significant impacts on water quality and quantity for better or worse A key element of sustainable development rests on our global capacity to interact with the water resources on which we depend in ways that preserve them for our use and that of future generations The two volumes on the subject present some of the topics such as Water Agriculture and Food Interactions dams water valuation arid regions water management and Conflict over Water Resources Water and Sustainable Development They consider the implications which contributions have in each of these areas as well as introduce additional issues relating to the future of dams innovative ways of increasing water supply transboundary water resources and the implications of global climate change for water resources These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts Managers and Decision makers and NGOs

*Handbook of Environmental Economics* Karl-Goran Maler,Jeffrey R. Vincent,2005-12-09 Much applied environmental economics is concerned with the valuation of changes in environmental quality Obtaining reliable valuation estimates requires attention to theoretical and econometric issues that are often quite subtle Volume 2 of the Handbook of Environmental Economics presents both the theory and the practice of environmental valuation It synthesizes the vast literature that has accumulated since the publication of the Handbook of Natural Resource and Energy Economics two decades ago It includes chapters on individual valuation methods written by researchers responsible for fundamental advances in those methods It also includes cross

cutting chapters that deal with aspects of welfare theory uncertainty experimental methods and public health that are pertinent to valuation Throughout the volume attention is paid to research and policy issues that arise not only in high income countries where most of the theory and econometrics that underlie applied valuation methods have been developed but also in poorer parts of the world The volume provides a state of the art reference for scholars and practitioners alike

*Dimensions of Environmental and Ecological Economics* Nirmal Chandra Sahu,Amita Kumari Choudhury,2005 Besides Covering The Paradigmatic Bases Of Environmental Ecological And Natural Resource Economics This Book Discusses The Economic Dimensions Of And Approaches To Pollution Environmental And Ecosystem Management Biodiversity Global Warming Energy And Resource Use And Sustainable Development

**Valuing the Environment in Developing Countries** David Pearce,Corin Pearce,Charles Palmer,2002-01-01 The substantial and growing interest in the monetary valuation of preferences for environmental improvement and against environmental damage has prompted a demand for case studies illustrating methodologies and applications of valuation techniques In this book the first of two volumes the authors provide detailed case studies of valuation techniques that have been used in developing countries They demonstrate that valuation works and that it can yield significant insights into policy relevant issues regarding conservation and economic development The authors address a whole range of environmental issues under the broad themes of water and air quality biological diversity and forest functions The economic approaches covered include contingent valuation hedonic property prices travel cost methodologies and benefits transfer They also go on to look at the idea of extending national accounts to reflect changes in environmental assets Examples of the varied and interesting case studies include valuing improvements to sanitation in Malaysia the value of visits to game parks in South Africa and tropical forest values in Mexico They highlight how valuation techniques can be applied often with limited resources to critical development issues Academics and practitioners of environmental economics will draw great value from this unique and original work as will the many multilateral and bilateral aid agencies The book will also prove a valuable addition to graduate and undergraduate courses in environmental economics where there is a need for case material
