Economics Of A Technology Based Service Sector:

The Economics of a Technology-based Service Sector, 1998 Innovation in the U.S. Service Sector Michael P. Gallaher, Albert N. Link, Jeffrey E. Petrusa, 2007-01-24 Using a cutting edge structure where a current description of the service sector and up to date case studies are compared and contrasted with innovative activity in manufacturing this book contributes towards a better theoretical understanding of innovation in the U S service sector The U S service sector is the largest sector in the U S economy and accounts for an increasingly significant share of U S gross domestic product currently 68 percent Both in the United States as well as in other industrialized nations the service sector is a dynamic component of economic activity and growth As pervasive and economically important as the service sector is innovative activity in service sector firms remains somewhat of an enigma it is not well understood and not well defined because it differs dramatically from the traditional model of innovation in manufacturing Innovation in the U S Service Sector fills this void placing emphasis on the United States but with global relevance It is essential reading for all students of business and management economics and political science

Kueh, 2012-10-01 The book confronts the popular conjecture of a Pax Sinica emerging to replace Pax Americana in the wake of global financial crisis It argues that by virtue of its overwhelming economic technological and military clout US hegemony will continue to prevail though increasingly less coherently as China's ascendance as a global power accelerates The argument is underpinned with analysis of different junctures in China's trajectory towards the status of economic giant from the tacit creation of the Greater China growth triangle and ordeal of the Asian Financial Crisis through the breakthrough with China's membership in the WTO and the subsequent large scale realignment of productive forces in the Asia Pacific region A chronological approach is combined with topical analysis focusing in particular on the interplay between economic imperatives and geopolitical dynamics Taken together the book provides a highly refreshing and coherent perspective for looking at China arising as a dominant Asia Pacific power with significant global implications As an interdisciplinary study it will appeal to scholars and academics as well as businessmen and government policy makers interested in Asian and global affairs and especially to students of economics politics international business and globalization studies Y Y Kueh is a Hong Kong based China expert He taught at The Chinese University of Hong Kong for over two decades served as Founding Director of Centre for Chinese Political Economy at Macquarie University Sydney and retired from Lingnan University Hong Kong as Chair Professor of Economics and Dean of Social Science Currently he is Senior College Tutor Honorary New Asia College The Chinese University of Hong Kong

Technology-Based Regional Economic Development Akio Nishizawa, David V. Gibson, 2024-10-08 Regional technology

based economic development and the recruitment and retention of talent is a top priority of city regions in the United States and in countries around the world. However, policy recommendations from government officials, industry leaders, and academics are often ambiguous or are in conflict. To address these issues, this book deals with the complex intersection of institutional theory and national and regional policy initiatives. It provides an overview of United States and Japanese technology policy development at the national level with case analyses of Austin, Texas and Tsuruoka, Japan to identify key regional strategies and processes that have resulted in successful endogenous technology based business development and job creation. It offers an innovative analytical perspective to improve our understanding of how successful tech based regional economic development works in theory and practice. The book's discussion is grounded on important technology paradigm shifts in the US and Japan from 1970 to 1980 leading to current realities. To address the complex Puzzle of Space conundrum, the authors describe similarities and differences in regional development processes in Austin and Tsuruoka. They present a generalizable model indicating necessary and sufficient conditions linked to the building of new Small i institutions at normative and cognitive levels of analysis in consort with regulative policy and innovations at macro level. Capital I institutions. The book clearly explains the relations between institutions and economic growth, an important issue in contemporary economics. The book's conclusions clarify critical success factors for endogenous regional development growth theory and lead to recommendations for policymakers who are searching for ways to achieve success. **Economic**

Technology Transfer and Economic Growth in Sub-Saharan African Countries Nathaniel O. Agola, 2016-03-21. This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets. The analytical model also provides an exhaustive analysis of all critical variables at the global, regional, and national levels which contribute to failure or success of technology transfer efforts. The model is validated by an incisive analysis of technology transfer experiences of Japan, Korea, Singapore, Taiwan, province of China, and Malaysia. While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer, the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries. This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals. Special Economic Zones and China's Development Path Yitao Tao, Zhiguo Lu, 2018-10-05.
