Economics Of Price Discrimination:

The Economics of Price Discrimination George Norman,1999 This volume brings together the most significant articles which have appeared over the past three decades analyzing the application and effects of price discrimination Discrimination is a pervasive marketing practice that survives despite the attempts of regulators to limit or eliminate its use it is widespread also in oligopolistic and imperfectly competitive markets It is a practice used by firms in pricing their products over product dimensions such as space time and quality and it affects the ability of firms to compete in other firms markets or to protect their own This collection of articles by leading authors in the field highlights what we know of the motivations for and the welfare implications of price discrimination It also presents a blueprint for further work in this important area The Economics of Price Discrimination Louis Philips,1983-06-30 A theoretical and unified explanation of how prices are determined in practice written in a non technical way **The Economics of Price Discrimination** Louis Philips,1985

The Economics of price discrimination ,1983 The Economics of Price Discrimination Leslie Donald Fixler,1960

First Principles of Economics Richard G. Lipsey,Colin Harbury,1992 Introduction to economics for complete beginners

Advanced Placement Economics John S. Morton,Rae Jean B. Goodman,2003 Antitrust Law and Economics of Product Distribution ,2006 Antitrust Law and Economics of Product Distribution explores the economics of product distribution and examines whether the courts have formulated legal standards consistent with those economic principles focusing on the sale of goods through dealers distributors and franchisees **The Law and Economics of Article 102 TFEU** Robert O'Donoghue KC,Jorge Padilla,2020-09-03 a reference book in this area of EU competition law and a must have companion for academics enforcers and practitioners alike as well as EU and national judges Judge Nils Wahl Court of Justice of the European Union This seminal text offers an authoritative and integrated treatment of the legal and economic principles that underpin the application of Article 102 TFEU to the behaviour of dominant firms Traditional concerns of monopoly behaviour such as predatory pricing refusals to deal excessive pricing tying and bundling discount practices and unlawful discrimination are treated in detail through a review of the applicable economic principles the case law and decisional practice and more recent economic and legal writings In addition the major constituent elements of Article 102 TFEU such as market definition dominance effect on trade and applicable remedies are considered at length The third edition involves a net addition of over 250 pages with a substantial new chapter on Abuses In Digital Platforms an extensively revised chapter on standards and virtually all chapters incorporating substantial revisions reflecting key cases such as Intel MEO Google Android Google Shopping AdSense Qualcomm *Privacy, Economics, and Price Discrimination on the Internet* Andrew Odlyzko,2014 The rapid erosion of privacy poses numerous puzzles Why is it occurring and why do people care about it This paper proposes an explanation for many of these puzzles in terms of the increasing importance of price discrimination Privacy appears to be declining largely in order to facilitate differential pricing which offers greater social and economic

gains than auctions or shopping agents The thesis of this paper is that what really motivates commercial organizations even though they often do not realize it clearly themselves is the growing incentive to price discriminate coupled with the increasing ability to price discriminate It is the same incentive that has led to the airline yield management system with a complex and constantly changing array of prices It is also the same incentive that led railroads to invent a variety of price and quality differentiation schemes in the 19th century Privacy intrusions serve to provide the information that allows sellers to determine buyers willingness to pay They also allow monitoring of usage to ensure that arbitrage is not used to bypass discriminatory pricing Economically price discrimination is usually regarded as desirable since it often increases the efficiency of the economy That is why it is frequently promoted by governments either through explicit mandates or through indirect means On the other hand price discrimination often arouses strong opposition from the public There is no easy resolution to the conflict between sellers incentives to price discriminate and buyers resistance to such measures The continuing tension between these two factors will have important consequences for the nature of the economy It will also determine which technologies will be adopted widely Governments will likely play an increasing role in controlling pricing although their roles will continue to be ambiguous Sellers are likely to rely to an even greater extent on techniques such as bundling that will allow them to extract more consumer surplus and also to conceal the extent of price discrimination Micro payments and auctions are likely to play a smaller role than is often expected In general because of the strong conflicting influences privacy is likely to prove an intractable problem that will be prominent on the public agenda for the foreseeable future

The Law and Economics of Price Discrimination in Modern Economies Daniel J. Gifford, Robert T. Kudrle, 2008 This paper examines the forms goals and results of price discrimination It reviews various economic analyses and critiques of the three Pigovian types of price discrimination It observes that economists traditional concern with aggregate welfare has not until recently been accompanied by a similar concern by lawyers Until the late twentieth century lawyers tended to focus on fairness instead These different concerns have impeded mutual understanding as have the various meanings that lawyers and economists have attributed to such basic terms as monopoly power market power and competition in the price discrimination context The paper examines the principal laws of the United States and the European Union that deal with price discrimination focusing especially on the Robinson Patman Act and Article 82 c of the Treaty Establishing the European Union The paper compares the operation of these two provisions finding superficial resemblances but significant differences in practice While the Robinson Patman Act was designed to prevent powerful buyers from forcing price concessions from often weak producers to the detriment of small buyers enforcement of Article 82 c is directed differently Although the language of Article 82 c suggests that it is designed to protect purchasers for resale from discrimination by their suppliers the European Commission employs Article 82 c to protect competitors from aggressive pricing by dominant generally producer firms The paper also examines the developing law on loyalty rebates on both sides of the Atlantic again finding that the approaches of the two jurisdictions differ significantly at least as exemplified by the most recent cases It distinguishes between loyalty rebates offered by the seller of a single product and those offered by a multi product seller The paper s main message is that price discrimination is an essential element in an effectively competitive economy and should be treated that way under the law

The Concept of Abuse in EU Competition Law Pinar Akman, 2012-02-03 The objective s of Article 102 TFEU what exactly makes a practice abusive and the standard of harm under Article 102 TFEU have not yet been settled This lack of clarity creates uncertainty for businesses and coupled with the current state of economics in this area raises an important question of legitimacy Using law and economic approaches this book inquires into the possible objectives of Article 102 TFEU and proposes a modern approach to interpreting abuse In doing so this book establishes an overarching concept of abuse that conforms to the historical roots of the provision to the text of the provision itself and to modern economic thinking on unilateral conduct This book therefore inquires into what Article 102 TFEU is about what it can be about and what it should be about regarding both objectives and scope The book demonstrates that the separation of exploitative abuse from exclusionary abuse is artificial and unsound It examines the roots of Article 102 TFEU and the historical context of the adoption of the Treaty the case law policy and literature on exploitative abuses and where relevant on exclusionary abuses The book investigates potential objectives such as fairness and welfare as well as the potential conflict between such objectives Finally it critically assesses the European Commission s modernisation of Article 102 TFEU before proposing a reformed approach to abuse which is centred on three necessary and sufficient conditions exploitation exclusion and a lack of an increase in efficiency
