Economics: a reader

Economics A Reader

ML Morrison

Economics A Reader:

The Economic Reader Massimo M. Augello, Marco Enrico Luigi Guidi, 2012 This book proposes a comparative study of the history of manuals of political economy in the most representative countries for the development of economics in the 19th and early 20th centuries demonstrating and the professionalisation of economics *The Economic Reader* Massimo M. Augello, Marco Enrico Luigi Guidi, 2012 The book studies the origins and evolution of economic textbooks in the nineteenth and early twentieth century up to the turning point represented by Paul Samuelson's *Economics* 1948 which became the template for all the textbooks of the postwar period The case studies included in the book cover a large part of Europe the British Commonwealth the United States and Japan Each chapter examines various types of textbooks from those aimed at self education to those addressed to university students secondary school students to the short manuals aimed at the popularisation of political economy among workers and the middle classes An introductory chapter examines this phenomenon in a comparative and transnational perspective **Regional Economics** Harry Ward Richardson, 1970

Contemporary Issues in Heterodox Economics Arturo Hermann, Simon Mouatt, 2020-10-07 Heterodox economics can provide a more complete and robust explanation of economic realities than orthodox or mainstream economics Contemporary Issues in Heterodox Economics Implications for Theory and Policy Action argues that this greater explanatory power gives heterodox economics the ability to illuminate appropriate policy for the major crises of our time as well as proffer the basis for a more rounded pluralist approach to economic theory The chapters in this wide ranging volume address some of the key issues facing the global economy including the growing disparity of income wealth between persons and economic areas environmental degradation issues associated with employment and the regularity of economic financial crises The authors examine potential policy responses such as modern monetary theory models of public ownership and the need to move beyond standard concepts of growth They also explore the deficiencies of orthodox economics and contend that a more pluralist approach to economics is required in the public sphere in academia and in the classroom in order to help face the challenges of the twenty first century This book is invaluable reading for students and scholars across the social sciences who are interested in alternatives to mainstream economic thinking *Economics* Henry Clay, 1930 Reader's Guide to Periodical Literature Supplement, 1919 Economics of Development A.P. Thirlwall, Penélope Pacheco-López, 2017-09-16 This classic bestselling textbook provides a comprehensive introduction to the field of development economics The 10th edition of Tony Thirlwall's book now co written with Penélope Pacheco López provides a clear comprehensive and rigorous introduction to the theory of development economics and the experience of developing countries Balancing a historic approach with current data and references it provides a wide ranging analysis of the subject This all inclusive methodology succeeds at representing different schools of thought with a balance of micro and macro topics An ideal textbook for undergraduate students of economics and other social sciences it is also suitable for upper undergraduate and master's level

modules on development economics as an option on a non economics degree New to this Edition A brand new chapter on human capital education nutrition health and the role of women in development New material on the Sustainable Development Goals the measurement of poverty and the multidimensional poverty index Discussion of randomized control trials The role of structural change in economic development New IMF lending facilities Economics Sir Henry Clay, 1951

Managerial Economics Mr. Rohit Manglik, 2023-08-21 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels *Economics, a Reader* Kenneth G. Elzinga, 1978 *Reader's Index and Guide*, 1915

The Substance of Economics for the Student and the General Reader Herbert Albert Silverman, 1960

Economics with Calculus Michael C. Lovell, 2004 This textbook provides a calculus based introduction to economics Students blessed with a working knowledge of the calculus would find that this text facilitates their study of the basic analytical framework of economics The textbook examines a wide range of micro and macro topics including prices and markets equity versus efficiency Rawls versus Bentham accounting and the theory of the firm optimal lot size and just in time monopoly and competition exchange rates and the balance of payments inflation and unemployment fiscal and monetary policy IS LM analysis aggregate demand and supply speculation and rational expectations growth and development exhaustible resources and over fishing While the content is similar to that of conventional introductory economics textbook the assumption that the reader knows and enjoys the calculus distinguishes this book from the traditional text The Reader's Basis Angeline Parmenter Carey, 1908 *The Economics of Electricity Markets* Darryl R. Biggar, Mohammad Reza Hesamzadeh, 2014-07-10 Bridges the knowledge gap between engineering and economics in a complex and evolving deregulated electricity industry enabling readers to understand operate plan and design a modern power system With an accessible and progressive style written in straight forward language this book covers everything an engineer or economist needs to know to understand operate within plan and design an effective liberalized electricity industry thus serving as both a useful teaching text and a valuable reference The book focuses on principles and theory which are independent of any one market design It outlines where the theory is not implemented in practice perhaps due to other overriding concerns The book covers the basic modelling of electricity markets including the impact of uncertainty an integral part of generation investment decisions and transmission cost benefit analysis It draws out the parallels to the Nordpool market an important point of reference for Europe Written from the perspective of the policy maker the first part provides the introductory background knowledge required This includes an understanding of basic economics concepts such as supply and demand monopoly market power and marginal cost The second part of the book asks how a set of generation load and transmission resources should be efficiently operated and the third part focuses on the generation investment decision Part 4 addresses

the question of the management of risk and Part 5 discusses the question of market power Any power system must be operated at all times in a manner which can accommodate the next potential contingency This demands responses by generators and loads on a very short timeframe Part 6 of the book addresses the question of dispatch in the very short run introducing the distinction between preventive and corrective actions and why preventive actions are sometimes required The seventh part deals with pricing issues that arise under a regionally priced market such as the Australian NEM This section introduces the notion of regions and interconnectors and how to formulate constraints for the correct pricing outcomes the issue of constraint orientation Part 8 addresses the fundamental and difficult issue of efficient transmission investment and finally Part 9 covers issues that arise in the retail market Bridges the gap between engineering and economics in electricity covering both the economics and engineering knowledge needed to accurately understand plan and develop the electricity market Comprehensive coverage of all the key topics in the economics of electricity markets Covers the latest research and policy issues as well as description of the fundamental concepts and principles that can be applied across all markets globally Numerous worked examples and end of chapter problems Companion website holding solutions to problems set out in the book also the relevant simulation GAMS codes [Appendix to the House and Senate Journals of the](#)

[... General Assembly of the State of Missouri](#) Missouri. General Assembly,1923 **Economic Thinkers** David A. Dieterle,2013-08-08 Who are the individuals whose novel ideas writings and philosophies have influenced economics throughout history and in doing so have helped change the world This encyclopedia provides a readable study of economics by examining the great economists themselves This book presents biographies of 200 economic thinkers throughout history supplying a one stop reference about the men and women whose ideas writings and philosophies created the foundation of our current understanding of economics Depicting their subjects within the contexts of history development economics and econometrics these biographies provide an insightful overview of the world of economics through the economists of significance and the many subdisciplines topics eras and philosophies they represent **Economic Thinkers** A Biographical Encyclopedia begins by describing economic thinkers in ancient Greece and Rome moves through history to cover economists in the 15th through 19th centuries and addresses economic theory in the 20th century and the modern era Written to be easily accessible and highly readable the work will appeal to students scholars general readers and anyone interested in learning about the historical and philosophical foundation of economics **The Oxford Handbook of Philosophy of Economics** Harold Kincaid,Don Ross,2009-03-26 This volume is the first comprehensive cohesive and accessible reference source to the philosophy of economics presenting important new scholarship by top scholars
