Economie Des Talacoms:

L'économie des télécommunications en Afrique Raymond Lemesle, 2002-01-01 L'Afrique subsaharienne compte environ le même nombre de téléphones que la ville de Tokyo Son retard pourrait s'accroître l'heure où le monde industrialisé se lance sur les super autoroutes de l'information De plus la plus grande partie des équipements en service en Afrique est importée et l'assistance technique y manque de coordination Le poids économique des télécommunications repose aujourd'hui sur des disparités techniques et financières que les organisations internationales tentent d'atténuer afin de promouvoir le Continent sur le marché mondial des télécommunications Dans cette perspective l'évolution des statuts des opérateurs des télécommunications africaines s'oriente vers la privatisation des services à l'instar des pays industrialisés Parallèlement l'abandon des technologies obsolètes s'impose afin que la fracture numérique n'aille pas en s'approfondissant Le présent ouvrage n'est ni un traité d'économie ni un traité technologique mais plutôt une synthèse des principaux problèmes intéressant une économie spécialisée où les aspects des télécommunications spécifiques à l'Afrique sont abordés
