## **Grandeur And Misery Frances Bid For Power In Europe 1914 194:**

**Grandeur And Misery** Anthony Adamthwaite, 2014-03-04 A central question in European history is how did a great power pre eminent in 1918 lie defeated by the same enemy less than 20 years later Until recently the explanation has been sought in fundamental weaknesses that could only leave the French of 1940 hamstrung and demoralized Recent studies have challenged that view and now for the first time the revisionist approach is displayed in a single volume both summarizing the research of others and drawing on the author s own work in the archives The book is about as far from dry as dust diplomatic history as it s possible to get Its very readable and the author manages to show with the telling anecdote that even a serious subject has its comic side that for instance the French High Command kept forces stationed in the Alps for seven years because no one in the foreign service had thought to pass on news about a secret treaty between Italy and France in 1902 or that after a particularly stressful meeting Andrew Bonar Law the British prime minister mouth to Poincar the French president through the closed carriage window of his train and you go to hell all the while smiling and exuding affability Such episodes are not the substance of the book but they oil its progress The Ideological Origins of Great Power Politics, 1789-1989 Mark L. Haas, 2018-09-05 How do leaders perceive threat levels in world politics and what effects do those perceptions have on policy choices Mark L Haas focuses on how ideology shapes perception He does not delineate the content of particular ideologies but rather the degree of difference among them Degree of ideological difference is he believes the crucial factor as leaders decide which nations threaten and which bolster their state s security and their own domestic power These threat perceptions will in turn impel leaders to make particular foreign policy choices Haas examines great power relations in five periods the 1790s in Europe the Concert of Europe 1815 1848 the 1930s in Europe Sino Soviet relations from 1949 to 1960 and the end of the Cold War In each case he finds a clear relationship between the degree of ideological differences that divided state leaders and those leaders perceptions of threat level and so of appropriate foreign policy choices These relationships held in most cases regardless of the nature of the ideologies in question the offense defense balance and changes in the international distribution of power Anglo-French Relations in the Twentieth Century Alan Sharp, Glyn Stone, Professor Glyn A Stone, 2002-03-11 Anglo French Relations in the Twentieth Century is a collection of studies on the key episodes of the difficult and often discordant Anglo French exchange over the past century The authors critically re evaluate the role of Spain in Anglo French relations up to 1918 the missed opportunity of the 1920s with the failure of France and Britain to find sufficient common ground and co operation the short lived Anglo French alliance and the Second World War the degree of Anglo French Imperial co operation the Suez Crisis British and French policies on European Integration *Cataclysm* David Stevenson, 2009-03-25 David Stevenson s widely acclaimed history of World War I changes forever our understanding of that pivotal conflict Countering the commonplace assumption that politicians lost control of events and that the war once it began quickly became an unstoppable machine Stevenson contends that politicians

deliberately took risks that led to war in July 1914 Far from being overwhelmed by the unprecedented scale and brutality of the bloodshed political leaders on both sides remained very much in control of events throughout According to Stevenson the disturbing reality is that the course of the war was the result of conscious choices including the continued acceptance of astronomical casualties In fluid prose Stevenson has written a definitive history of the man made catastrophe that left lasting scars on the twentieth century Cataclysm is a truly international history incorporating new research on previously undisclosed records from governments in Europe and across the world From the complex network of secret treaties and alliances that eventually drew all of Europe into the war through the bloodbaths of Gallipoli and the Somme to the arrival of American forces and the massive political economic and cultural shifts the conflict left in its wake Cataclysm is a major revision of World War I history

Wrestling with Democracy Dennis Pilon,2013-01-01 Though sharing broadly similar processes of economic and political development from the mid to late nineteenth century onward western countries have diverged greatly in their choice of voting systems most of Europe shifted to proportional voting around the First World War while Anglo American countries have stuck with relative majority or majority voting rules Using a comparative historical approach Wrestling with Democracy examines why voting systems have or have not changed in western industrialized countries over the past century In this first single volume study of voting system reform covering all western industrialized countries Dennis Pilon reviews national efforts in this area over four timespans the nineteenth century the period around the First World War the Cold War and the 1990s Pilon provocatively argues that voting system reform has been a part of larger struggles over defining democracy itself highlighting previously overlooked episodes of reform and challenging widely held assumptions about institutional change

*Twilight of the Titans* Paul K. MacDonald,Joseph M. Parent,2018-04-15 In *Twilight of the Titans* Paul K MacDonald and Joseph M Parent examine great power transitions since 1870 to determine how declining powers choose to behave identifying the strong incentives to moderate their behavior when the hierarchy of great powers is shifting Challenging the conventional wisdom that such transitions push declining great powers to extreme measures this book argues that intimidation provocation and preventive war are not the only alternatives to the loss of relative power and prestige Using numerous case studies MacDonald and Parent show how declining states tend to behave the policy options they have how rising states respond to those in decline and what conditions reward particular strategic choices

**Failed Imagination?** Andrew Williams,2013-01-18 The main purpose of this book is to explain how mainly American but also British and other Western policy makers have planned and largely managed to create an international order in their own image the so called New World Order It shows how this seismic shift in international relations has developed through the major global wars of the twentieth and twenty first centuries It uses a wide variety of historical archival material to give the background to the current and historical American obsession with creating the world order one that both reflects the American national interest but also can be said to have established the major security economic

organisational and normative pillars of our epoch In addition it provides excellent background reading for the current debate about American foreign policy and the origins of neo conservatism in international relations This edition updates a very successful first edition of the title with additional material to take into account changes in the global order since 2001 and the beginning of the War on Terror *From Versailles to Pearl Harbor* Margaret Lamb, Nicholas Tarling, 2017-03-14 In 1941 the European war became a world war This book tackles that process in its economic political and ideological dimensions Margaret Lamb and Nicholas Tarling explore the significance of the Asian factor and the importance of East Asia in the making of the war in Europe and the transformation of the European war of 1939 into the world war of 1941 This Asian factor has often been neglected but the policies of all the major powers were affected by their world wide interests France had its possessions in North Africa and Asia Nazi Germany chose to become involved in China and to make an agreement with Japan Britain's action in Europe and the Mediterranean were conditioned by its commitments elsewhere in the world and the United States and the Soviet Union were both involved in Europe and Asia In particular the threat that Japan presented to the status quo in East Asia made it difficult for the war in Europe in turn affected the position in East Asia The US built a two ocean navy and encouraged the British to continue their struggle by keeping the resources of South East Asia available and these steps led to a clash with the Japanese Lamb and Tarling's global approach throws valuable new light on the origins of the Second World War **Failed Imagination?** Andrew J. Williams, 1998 Francisco Gomez de Sandoval Duke of Lerma 1553-1625 is the last major unknown statesman in modern European history Patrick Williams brings him dramatically to life and challenges the assumptions that historians have made about him and about Spanish history at a time of profound crisis inviting a re-evaluation of the phenomenon of government by favourites in this seminal period of European history Lerma served Philip III as his favourite and first minister between 1598 and 1618 His power dazzled contemporaries one petitioner telling Philip that he had come to see him because I could not get an appointment with the Duke of Lerma Within a decade of assuming office Lerma had raised his family from humiliating poverty to great riches and was the greatest patron of the arts in Europe His use of power provoked intense debate about the nature of corruption in government Yet Lerma remained deeply ambivalent about his position Determined to follow family tradition and retire into religious life to secure the salvation of his soul he secured a cardinalate in 1617 ending his life as a prince of the Church **1914-1918** David Stevenson, 2004 In the summer of 1914 Europe exploded into a frenzy of mass violence The war that followed had global repercussions destroying four empires and costing millions of lives Even the victorious countries were scarred for a generation and we still today remain within the conflict's shadow In this major new analysis published ninety years after the First World War began David Stevenson re-examines the causes course and impact of this war to end war placing it in the context of its era and exposing its underlying dynamics His book provides a wide ranging international history drawing on insights from the latest research It offers compelling answers to the key questions about how this terrible struggle unfolded

questions that remain disturbingly relevant for our own time      **Global Great Depression and the Coming of World War**

**II** John E. Moser, 2015-11-17 The Global Great Depression and the Coming of World War II demonstrates the ways in which the economic crisis of the late 1920s and early 1930s helped to cause and shape the course of the Second World War Historian John E Moser points to the essential uniformity in the way in which the world's industrialized and industrializing nations responded to the challenge of the Depression Among these nations there was a move away from legislative deliberation and toward executive authority away from free trade and toward the creation of regional trading blocs away from the international gold standard and toward managed national currencies away from chaotic individual liberty and toward rational regimentation in other words away from classical liberalism and toward some combination of corporatism nationalism and militarism For all the similarities however there was still a great divide between two different general approaches to the economic crisis Those countries that enjoyed easy unchallenged access to resources and markets the United States Great Britain the Soviet Union and France tended to turn inward erecting tariff walls and promoting domestic recovery at the expense of the international order On the other hand those nations that lacked such access Germany and Japan sought to take the necessary resources and markets by force The interplay of these powers then constituted the dynamic of international relations of the 1930s have nots attempting to achieve self sufficiency through aggressive means challenging haves that were too distrustful of one another and too preoccupied with their own domestic affairs to work cooperatively in an effort to stop them      **Britain in Vietnam** Peter Neville, 2007-08-07 This book is a study of the

circumstances leading to British intervention in Vietnam in 1945 and the course and consequences of this intervention The first part of the work links French colonialism with the native communist insurgency while examining British and Foreign Office attitudes towards French Indochina The study then looks at the key Anglo American wartime relationship concerning Indochina and its impact The second half of the book focuses on the local problems faced by the British in Southern Indochina and whether commanding general Douglas Gracey was guilty as critics have suggested of collusion with French colonialism It also examines the wider problems linked to available military resources and the controversial issues of the role of the OSS and the use of Japanese troops to preserve law and order Finally the book makes a groundbreaking link between British intervention and the outbreak of the French Vietminh war in 1946 Britain in Vietnam will be of interest to students of British foreign policy military history and South East Asian history in general      **France, Britain and the United States in**

**the Twentieth Century 1900 - 1940** A. Williams, 2014-07-15 Why is France so often relegated to the background in studies of international relations This book seeks to redress this balance exploring the relationship between the United States United Kingdom and France and its wider impact on the theory and practice of international relations      **International Labor and**

**Working Class History** , 2001      *Der mögliche Frieden* Ralph Blessing, 2014-02-24 Der vorliegende Band beschreibt die deutsch franz sischen Beziehungen in der zweiten H lfte der 1920er Jahre als sich zwischen beiden L ndern eine gewisse Ann

herung abzeichnete die in den Verträgen von Locarno der Verleihung des Friedensnobelpreises an den deutschen Außenminister Gustav Stresemann und seinen französischen Kollegen Aristide Briand im Jahre 1926 dem deutsch-französischen Handelsvertrag von 1927 und schließlich dem Kriegsschlichtungspakt von 1928 ihren Höhepunkt fand. Die Studie untersucht die Beziehungen zwischen den Ländern nicht nur unter den vorherrschenden Interpretationsmustern des deutschen Revisionismus und des französischen Sicherheitsstrebens sondern analysiert auch inwiefern moderne außenpolitische Konzepte das Verhältnis beider Länder beeinflusst haben. Als modern wird dabei die vom amerikanischen Präsidenten Woodrow Wilson eingeleitete Revolution des Völkerrechts verstanden, das auf den Säulen von Demokratie, kollektiver Sicherheit und Freihandel ruhen sollte. The British National Bibliography Arthur James Wells, 1995 **Grandeur And Misery** Anthony Adamthwaite, 1995-11-17 A central question in European history is how did a great power pre-eminent in 1918 lie defeated by the same enemy less than 20 years later. Until recently the explanation has been sought in fundamental weaknesses that could only leave the French of 1940 hamstrung and demoralized. Recent studies have challenged that view and now for the first time the revisionist approach is displayed in a single volume both summarizing the research of others and drawing on the author's own work in the archives. The book is about as far from dry as dust diplomatic history as it's possible to get. It's very readable and the author manages to show with the telling anecdote that even a serious subject has its comic side that for instance the French High Command kept forces stationed in the Alps for seven years because no one in the foreign service had thought to pass on news about a secret treaty between Italy and France in 1902 or that after a particularly stressful meeting Andrew Bonar Law the British prime minister mouthed to Poincaré the French president through the closed carriage window of his train and you go to hell all the while smiling and exuding affability. Such episodes are not the substance of the book but they oil its progress. **Grandeur and Misery** Anthony P. Adamthwaite, 1995 This account of France's transition from victor in 1918 to vanquished in 1940 offers a long overdue reassessment of all the central issues **Arts & Humanities Citation Index**, 1979
