Office for Subject Cataloging Policy,2012 Rights, Gender and Family Law Julie Wallbank,Shazia Choudhry,Jonathan Herring,2009-12-04 There has been a widespread resurgence of rights talk in social and legal discourses

pertaining to the regulation of family life as well as an increase in the use of rights in family law cases in the UK the US Canada and Australia Rights Gender and Family Law addresses the implications of these developments and in particular the impact of rights based approaches upon the idea of welfare and its practical application There are now many areas of family law in which rights and welfare based approaches have been forced together But whilst to many they are premised upon different ethics respectively of justice and of care for others they can nevertheless be reconciled In this respect a central concern is the gender blind character of rights based approaches and the ontological and practical consequences of their employment in the gendered context of the family Rights Gender and Family Law explores the tensions between rights based and welfare based approaches explaining their differences and connections considering whether if at all they are reconcilable and addressing the extent to which they can advantage or disadvantage the interests of women children and men It may be that rights based discourses will dominate family law at least in the way that social policy and legislation respond to calls of equality of rights between mothers and fathers This collection however argues that rights cannot be given centre stage without thinking through the ramifications for gendered power relations and the welfare of children It will be of interest to researchers and scholars working in the fields of family law gender studies and social welfare
