Grass Systematics:

Grass Systematics Frank W. Gould, Robert Blaine Shaw, 1983 First published in 1969 this book was originally designed to serve as a guide and source of information for undergraduate courses in agrostology Experience has shown however that its documentation of facts theories and hypotheses and its literature citations also make it eminently suitable for graduate studies and systematic grass research Principal emphasis has been placed on the structure and growth of the grass plant and on the characteristics of the grass genera of the United States Discussion of tribes and subfamilies relates particularly to grasses of subtropical and temperate North America but reference is also made to worldwide representatives of these groups The listings of genera and higher taxa are in phylogenetic sequence and the key to U S genera is based on the most readily observable characters of the inflorescence Information has been brought up to date in this edition and studies in biochemical development of grasses C3 and C4 relationships and taxonomy have been included to reflect changes in agrostology since the original edition was written *Grasses: Systematics and Evolution* SWL Jacobs, J Everett, 2000-05-19 *Grasses Systematics and Evolution* is a selection of the very best papers from the Proceedings of the Third International Symposium on Grass Systematics and Evolution held in Sydney Australia in 1998 The papers represent some of the leading work from around the world on grasses and include reviews and current research into the comparative biology and classification All 41 papers have been peer reviewed and edited *Grass Systematics* Frank W. Gould, Robert Blaine Shaw, 1983 *Grass Systematics and Evolution* Thomas R. Soderstrom, 1987 This series aims to publish innovative works in the field of zoo and aquarium biology and conservation with priority given to books that focus on the interface between captive and field conservation and seek to merge theory with practice This volume summarizes the large body of research on grasses of the last quarter century and encompasses a wide range of topics from morphology to DNA **Grass Systematics and Evolution**, 1987 *Grass Evolution and Domestication* G. P. Chapman, 1992-10-22 An examination of the domestication of grasses and cereals over the last ten thousand years **Monocots: Systematics and Evolution** Karen L Wilson, David A Morrison, 2000-05-19 *Monocots Systematics and Evolution* presents leading work from around the world on non grass monocotyledons and includes reviews and current research into their comparative biology phylogeny and classification The papers are based on presentations at the Second International Conference on the Comparative Biology of the Monocotyledons Monocots II held in Sydney Australia in late 1998 Many were subsequently updated or extended to take into account new information All 72 papers have been peer reviewed *Population Biology of Grasses* G. P. Cheplick, 1998-03-28 *Dynamics Reproductive Versatility in the Grasses* Geoffrey Peter Chapman, 1990-11-30 This 1990 text brings together a detailed review by acknowledged authorities of grass reproductive biology Essential to contemporary awareness of grasses is an understanding of their role in sustaining ecologically fragile environments and the relative importance of annual and perennial reproduction is examined here *Phytolith Systematics* Susan C. Mulholland, George Rapp Jr., 2013-06-29 This volume is the first in the Advances in

Archaeological and Museum Science series sponsored by the Society for Archaeological Sciences The purpose of this biennial series is to provide summaries of advances in closely defined topics in archaeometry archaeological science environmental archaeology preservation technology and museum conservation The Society for Archaeological Sciences SAS exists to encourage interdisciplinary collaboration between archaeologists and colleagues in the natural and physical sciences SAS members are drawn from many disciplinary fields However they all share a common belief that physical science techniques and methods constitute an essential component of archaeological field and laboratory studies The General Editors wish to express their appreciation to Renee S Kra and Frances D Moskovitz of Radiocarbon for their special expertise and assistance in the production of this volume We also appreciate the contribution of the two reviewers for their excellent comments and suggestions The General Editor responsible for undertaking the development of this volume was R E Taylor

Identification Guide for Near Eastern Grass Seeds Mark Nesbitt, 2016-09-16 Archaeobotanical studies constantly encounter the carbonized grains of grasses cultivated and wild but the vast diversity of wild species that are potentially present has made identification of archaeological material fraught with difficulties This volume provides an invaluable tool for mastering these difficulties Based on years of laboratory study of an extensive reference collection this book gives expert guidance for the identification and interpretation of grass seeds focusing on those species that occur in the Near East and Europe

The Biology and Utilization of Grasses V Younger, 2012-12-02 The Biology and Utilization of Grasses reviews current knowledge about grass biology and it highlights the important role of grasses in human existence It discusses many fundamental aspects of grass biology including evolution and genetics morphology physiology and ecology with emphasis on the relationship of these basic concepts to the use of grasses for forage turf and rangelands Comprised of 28 chapters this volume begins with an overview of the evolution and genetics of the grass family followed by a discussion on practical grass breeding problems The reader is also introduced to vegetative growth and development of seedlings and mature plants the ecological aspects of grasses soils and mineral nutrition in relation to grass growth the effects of defoliation moving or grazing carbohydrate reserves physiology of flowering and grass seed production and culture treatments Other chapters consider the role of polyploidy in the evolution and distribution of grasses selection and breeding of grasses for forage and other uses seedling vigor and seedling establishment environmental modification for seedling establishment the microclimate of grass communities effects on turf grass of cultural practices in relation to microclimate and competition within the grass community This book will be of benefit to plant breeders ecologists botanists and biologists

Shukla,2019-06-10 **Diversity and Classification of Flowering Plants** Armen Leonovich Takhtadzhian,1997 The culmination of more than fifty years of research by the foremost living expert on plant classification Diversity and Classification of Flowering Plants is an important contribution to the field of plant taxonomy In the last decade the system of classifying plants has been thoroughly revised Instead of describing every individual family Takhtajan includes descriptions in keys to families which he calls descriptive keys The advantage of descriptive keys is that they give both the characteristic features of the families and their differences The delimitation of families and orders drastically differs from the one accepted by the Englerian school and from the one accepted in Arthur Cronquist s system Takhtajan favors the smaller more natural families and orders which are more coherent and better defined where characters are easily grasped and which are more suitable for information retrieval and phylogenetic studies including cladistic analysis because it reduces polymorphic codings **Guide to Texas Grasses** Robert B. Shaw,2012-06-21 In this new complete Guide to Texas Grasses Robert B Shaw and the team at the Texas A&M details of the classification and distribution of Texas grasses brief species accounts distributional maps color photographs plus black and white drawings of 670 grass species native introduced and ornamental Scientific keys help identify the grasses to group genera and species and an alphabetized checklist includes information on origin native or introduced longevity annual or perennial growth season cool or warm season endangered status and occurrence by ecological zone A glossary literature citations and a quick index to genera round out the book Guide to Texas Grasses is a comprehensive treatment of Texas grasses meant to assist students botanists ecologists agronomists range scientists naturalists researchers extension agents and others who work with or are interested in these important plants *Reconstructing the Tree of Life* Trevor R. Hodkinson,John A.N. Parnell,2006-12-26 To document the world s diversity of species and reconstruct the tree of life we need to undertake some simple but mountainous

tasks Most importantly we need to tackle species rich groups We need to collect name and classify them and then position them on the tree of life We need to do this systematically across all groups of organisms and b
