It is edited and written by world renowned experts in emergency medicine and oncology and covers the diagnosis and management of the full range of emergencies caused directly by cancer or by its treatment. It shows how the entire spectrum of clinical medicine is brought to bear in the care of cancer patients in the unique setting of the emergency department ED from health promotion and prevention to treatment and palliative care. Recognizing the multiple overlapping contexts in which emergency care of cancer patients occurs, the book addresses clinically crucial interdisciplinary topics such as the ethics of ED cancer care, the interface with palliative social work, substance abuse, and more. Finally, perspective on care system and social forces that shape ED cancer care such as cancer care disparities and care models and on how ED cancer care is delivered outside of the United States frame the book as a whole. Against the backdrop of rising numbers of cancer patients and survivors as the United States population ages and a forecast shortage of oncologists, this book is designed to serve as the authoritative single source clinical reference on cancer emergencies. The intended audience includes emergency physicians, oncologists, internists, family physicians, emergency nurses, nurse practitioners, physician assistants, policy makers, as well as pre and postgraduate trainees. College Student Death Rosa Cintrón, Katherine Garlough, Erin Taylor Weathers, 2007

Every year, thousands of college students die, leaving our campuses stunned and bereft. In the midst of crisis, it may be necessary to react quickly to their deaths, but appropriate responses can be accomplished through thoughtful preparation. From those who have weathered the deaths of their students, it is possible to adapt strategies that are compassionate, ethical, appropriate, and that reflect well on the campus. College Student Death Guidelines for a Caring Campus is the result of many years of collaboration with more than thirty contributors. It applies the knowledge of university personnel called upon to respond to student death on and off campus and to provide solace to family and the campus community. This book provides support to university staff in the immediacy of student death, guides the design of policy before a crisis occurs, and provides instructional considerations for faculty. It enables the campus professional in understanding the complexities of effective response to college students' death and choosing an appropriate course. College student death affects the depth and breadth of the campus community. Members of innumerable campus units, including student affairs, housing, counseling centers, police departments, international programs, student life, legal affairs, administrative affairs, drug and alcohol centers, health centers, religious communities, and athletic departments, can benefit from this book.
