Gravity And Light:

By Way of Obstacles Emmanuel Falque,2022-12-06 In *By Way of Obstacles* Emmanuel Falque revisits the major themes of his work finitude the body and the call for philosophers and theologians to cross the Rubicon by entering into dialogue in light of objections that have been offered In so doing he offers a pathway through a work that will offer valuable insights both to newcomers to his thought and to those who are already familiar with it For it is only after one has carved out one s pathway that one may see more clearly where one has been and where one might be going Here readers will discover the profound relation between Falque s emphasis on the human experience of the world and his desire for philosophy and Christian theology to enter into conversation For only by speaking within the human horizon of finitude can Christianity be credible for human beings and it is because Christian theology teaches that God entered into our finitude that it can also teach us something of what it is to be human Contemporary phenomenology Falque warns over privileges an encounter with the infinite that cannot be originary Calling us back to finitude he calls us to a deeper understanding of our humanity

Knowledge Al McDowell, 2009 This book develops new science of gravity and light based on the century old Le Sage theory of an ether that was replaced by Einstein's Theory of Relativity After presenting astrophysical data contradicting the theory that the universe is expanding from a Big Bang experiments believed to prove Relativity are shown to actually prove the ether theory instead Freedom from the speed limit of light enables a science of subatomic particles traveling faster than light to produce gravity electric and magnetic fields light and radio waves Major technical innovations include solving the two fundamental problems with the Le Sage gravity theory and extending this theory to electromagnetism and consciousness This is a theory of everything that explains the heretofore unknown causes of the forces of nature This book builds on the works of Zecharia Sitchin and other authors to explain how life developed on Earth and that evolution requires direction from intelligence that dwells in the subatomic particles on which this theory of gravity and light is based Our biblical God is shown to be a composite of Sitchin's extraterrestrial gods who colonized Earth and the intelligence that dwells alongside our own mind in the particles from which the universe is constructed and powered *Spatial Orientation* Hermann
