**Running--Just Undo It** Jack Nirenstein, 2005-06-06 Recognized leaders in the scientific research and development fields of running should never have been taken seriously They have all failed to solve the mechanics of what it takes to run My techniques are not simply better they are the only way to do it effectively They will help everyone achieve better health safety and performance than they have been able to do by running the old way If running is a part of your exercise routine Running Just Undo It will help you improve your performance Author Jack Nirenstein s amazing methods will transform how you run by teaching you simply to pay close attention to the mechanics of the human body While gravity running is not a new concept the Nirenstein method is the first and only way to make it work Nirenstein contends that athletes tend to let bad science interfere with their inherent body mechanics Too many runners don t achieve optimum performance because of inaccurate instructions about proper form The standard science of pushing hard for a longer stride sounds logical but Nirenstein shows you how it actually opposes the body s forward motion With stretching techniques step by step instructions for all types of running and many helpful photos and illustrations you ll be off and running in no time

Brooks, 2007-04-24 This book captures the essence of Charlotte Selver s practice of Sensory Awareness like no other publication It is an invitation to experience life firsthand again as we did when we were children In a culture where we have grown accustomed to accumulating knowledge from teachers and experts it is rare to find a book that actually invites us to trust our own senses again It is the authors intent to give back to the reader authority over his or her own experience and learning processes Much of the book focuses on reviving the senses in order to open the mind and body to direct learning The book imitates an actual Sensory Awareness class involving the reader as a student guiding him or her along a journey with and through the senses to a way of living that is in accordance with the natural functioning of the human organism in its environment The range of explorations include a renewed connection to the support of the earth as a foundation for trust the central role of gravity for our health and for finding orientation in life a study of breathing that promotes health and vitality and connecting and interacting with other people A handbook to a more genuine and connected way of living the work is also a beautifully crafted account of Sensory Awareness showing these profound teachers at work with their students and with the reader
