Grazing Incidence Optics for Astronomical and Laboratory Applications, 1986 **Grazing Incidence Optics for Astronomical and Laboratory Applications** Stuart Bowyer, 1988 *Grazing Incidence Optics for Astronomical and Laboratory Applications* Stuart C. Bowyer, James C. Green, 1988 **Imaging in High Energy Astronomy** L. Bassani, G. di Cocco, 2012-12-06 An almost complete collection of the papers given at the International Workshop on Imaging in High Energy Astronomy Anacapri Italy 1994 These proceedings which concentrate on imaging above 10 keV represent the state of the art in the field resulting from the success of many missions I C Granat and CGRO carrying detectors for high energy astronomy with imaging capabilities The main topics of the book are Bragg concentrators coded mask modulation collimators double Compton telescopes the occultation method tracking chambers and new experimental techniques The book also contains some papers dealing with image reconstruction and processing with an emphasis on the above techniques

Handbook of X-ray and Gamma-ray Astrophysics Cosimo Bambi, Andrea Santangelo, 2024-02-29 This book highlights a comprehensive coverage of X ray and Gamma ray astrophysics The first and the second parts discuss respectively X ray and Gamma ray experimental techniques and observatories The third part is devoted to science including galactic and extragalactic sources The fourth and last parts are dedicated to analysis techniques in X ray and Gamma ray astronomy spectral analysis imaging analysis timing analysis and polarimetric analysis Presenting the state of the art in X ray and gamma ray astronomy this is both a valuable book for students and an important reference resource for researchers in the field **Silver-Halide Recording Materials** Hans I. Bjelkhagen, 2013-06-29 Silver Halide Recording Materials gives a detailed analysis of the theory the characteristics the manufacturing and the processing methods of silver halide materials used for the recording of holograms Emphasis is placed on the selection of suitable silver halide materials for conventional as well as special holographic applications A detailed account of current developing and bleaching methods used in the production of silver halide holograms is given The author also supplies a large number of recipes for different types of processing baths The text is complemented by a comprehensive list of references which will facilitate further study The monograph will be suitable for courses in holography where the student possesses some background knowledge about the general holographic process and the holographic technique **Energy Research Abstracts**, 1992 **International**

Zech, 2013-11-11 From the reviews Astronomy and Astrophysics Abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working

in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world Space Science Reviews 1 Dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts Fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes The Observatory Magazine 2 *Optical Engineering*, 2006 Publishes papers reporting on research and development in optical science and engineering and the practical applications of known optical science engineering and technology **Modern Developments in X-Ray and Neutron Optics** Alexei Erko, Mourad Idir, Thomas Krist, Alan G. Michette, 2008-04-14 This volume describes modern developments in reflective refractive and diffractive optics for short wavelength radiation It also covers recent theoretical approaches to modelling and ray tracing the x ray and neutron optical systems It is based on the joint research activities of specialists in x ray and neutron optics working together under the framework of the European Programme for Cooperation in Science and Technology COST Action P7 in the period 2002-2006 *Hot Thin Plasmas in Astrophysics* R. Pallavicini, 2012-12-06 This volume contains all but one of the lectures and seminars presented at the NATO Advanced Study Institute on HOI Thin Plasmas in Astrophysics held in Cargèse Corsica from September 8 to 18 1987 The meeting was planned in collaboration with the members of the Scientific Organizing Committee 10 whom I am grateful for suggesting a comprehensive and well balanced program The SOC was comprised of Prof J Bleeker Space Research Institute Utrecht The Netherlands Dr C Cesarsky CEN Saclay France Dr R Mushotzky GSFC USA Prof K Pounds University of Leicester UK Prof H Schnopper Danish Space Research Laboratory Denmark Dr H Tananbaum Center for Astrophysics USA Dr G Trinchieri Arcetri Observatory Italy and Prof 1 Truemper MPE Garching Germany The ASI fully supported by the NATO Scientific Affairs Division was organized with the intent of providing a critical and up to date overview of our present knowledge and understanding of the properties of hot thin plasmas in astrophysics as they are revealed by X ray observations from space The X ray and UV emission from optically thin thermal plasmas is a common feature of many astrophysical systems This type of emission occurs in the solar corona and in the coronae of other stars in supernova remnants and in the hot interstellar medium in normal galaxies and galactic halos and in the intergalactic gas in clusters **Wspc Handbook Of Astronomical Instrumentation, The (In 5 Volumes)**, 2021-05-07 Our goal is to produce a comprehensive handbook of the current state of the art of astronomical instrumentation with a forward view encompassing the next decade The target audience is graduate students with an interest in astronomical instrumentation as well as practitioners interested in learning about the state of the art in another wavelength band or field closely related to the one in which they currently work We assume a working knowledge of the fundamental theory optics semiconductor physics etc The purpose of this handbook is to bring together some of the leading experts in the world to

discuss the frontier of astronomical instrumentation across the electromagnetic spectrum and extending into multimessenger astronomy
