## Great Auto Makers And Their Cars:

**Great Auto Makers and Their Cars** Bob Italia, 1993 Introduces some of the men whose ideas and innovations shaped the development of modern automobiles including Karl Benz Ferdinand Porsche William Lyons and Henry Ford Amazing Archaeologists and Their Finds William Scheller, 1994-05-01 Each chapter discusses a major archaeological find such as King Tut's tomb the walls of Troy and the city of Jericho and profiles the key individuals involved The World's Greatest Explorers William Scheller, 1992-06-01 Relates the enterprises and discoveries of twelve explorers including Vasco da Gama Captain James Cook and Roald Amundsen **The New Domestic Automakers in the United States and Canada** A.J. Jacobs, 2015-12-16 Over the past forty years state provincial and local governments in the United States and Canada have provided foreign automakers with approximately 480 billion in incentives in order to lure light vehicles assembly plants to their areas This has included tax abatements infrastructure construction land giveaways job training programs and other subsidies As of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide Six Men Built the Modern Auto Industry Richard Alan Johnson, This is the story of six extraordinary men who each built something from nothing redefined the automotive industry after World War II and redirected its course for the future Henry Ford II visionary autocrat with an iron will Shoichiro Honda most successful automotive entrepreneur since Henry Ford I Eberhard von Kuenheim founder of the modern BMW Lee Iacocca Ferdinand Piech builder of Volkswagen Group and Robert Lutz who left retirement at 70 and is still highly influential at General Motors

What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, they made a sizable dent in the societies they lived in. To a man, they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything, these were brave and cantankerous souls who rode the waves of history. Each could see the future. They could just make it out, sometimes imperfectly, but could see it nonetheless. They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again. The compelling story of the global car business over the past half century. A lively and engaging narrative that recounts some times collaborative, sometimes archly antagonistic interactions among the men. Full of business revelations at the highest level, written by a journalist operating at the heart of the industry. Global appeal that shows how automotive groups in the USA, Europe, and Asia have influenced each other. A business story interlaced with personal details that explains why the six were determined to be successful. About the Author: For two decades, Richard Johnson has worked for Crain Communications, publisher of the world's leading automotive business publications. Founding editor of Crain's Automotive News Europe, he has been a reporter and editor for the group in Detroit, Tokyo, Frankfurt, and London. He is currently a senior editor with Automotive News in Detroit and regularly talks to the most senior executives in the leading car manufacturing groups.

**Top Entrepreneurs and Their Businesses** Robert B. Pile, 1993-03-01 Examines the lives of eight men and one woman including Sam Walton, L.L. Bean, Walt Disney, and Rose Totino who built once small businesses into well-known enterprises.

Great Justices of the Supreme Court Nathan Aaseng, 1992-09-01 Profiles eight notable justices of the United States Supreme Court and landmark cases in which each was involved: John Marshall, Roger Taney, John Harlan, Oliver Wendell Holmes, Louis Brandeis, Charles Evans Hughes, Hugo Black, Earl Warren.

Faster, Higher, Farther: How One of the World's Largest Automakers Committed a Massive and Stunning Fraud Jack Ewing, 2017-05-23 A rich history of a company whose cars for better and worse have touched millions of lives; a character study of a brilliant but deeply flawed leader and a case study in how a corporate culture can turn toxic. Bethany McLean, New York Times Book Review. Faster, Higher, Farther chronicles a corporate scandal that rivals those at Enron and Lehman Brothers, one that will cost Volkswagen more than 22 billion in fines and settlements. Through meticulous reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install defeat devices in diesel vehicles that unlawfully lowered CO2 levels during emissions testing and how the fraud was committed, covered up, and finally detected. Faster, Higher, Farther is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.
