Baron Leon Bennett, 2012-02-19 Fighter pilot Manfred von Richthofen the Red Baron lacked innate aerobatic ability As a tyro he attempted to solve this problem through denial going so far as to sneer at stunting as pointless Great War air combat experience proved quite the reverse and so we would anticipate a short and sad fighting life for the fellow Yet the Red Baron became the Great War s single greatest scorer as measured by total victories How did he do it This book is concerned with tactics especially those tactics used by the Red Baron and his opponents It offers the how and why of Great War aerial combat The author leans heavily on his expertise in engineering and aerodynamic techniques to explain this with his reasoning presented in a readable non mathematical style Absent are both the usual propaganda laced Air Service reports and psychobabble Offered instead is the logic behind Great War aerial combat i e those elements determining success or failure in the Red Baron s air war Gunnery experience led to the machine gun as the weapon best suited for aerial combat Joined with a suitable aircraft the extremely successful Fokker diving attack resulted In reaction effective defensive techniques arose using forms of shrewd tactical cooperation by two seater crews pilot and gunner These are detailed Numbers mattered establishing the level of assault firepower Tactics of machines flying together in formation are given as well as those of formation busters intent upon reversing the odds and turning large numbers into a disadvantage A pilot s nature and emotions had much to do with choosing between the options defining tactics What were the aces like How were tactics tailored to suit personality What traits made for the ability to grapple with a jammed machine gun A dozen high achievers are examined in terms of tactics and background In a fascinating study Leon Bennett covers all of these aspects of WWI aerial combat and more Similarly the author turns his attention to examining the cause of von Richthofen s death employing the tools of logic rather than merely accepting one of the many conflicting eyewitness reports as truth In doing so much testimony is exposed as unlikely The bullet scatter to be expected from ground anti aircraft fire matters greatly and is developed along with the odds against lone riflemen hoping to hit a fast moving low altitude target The most dangerous altitude for front line crossing is established The author concludes by rating the possibility of a rifleman downing the Red Baron as quite realistic certainly as likely as any of the more celebrated possibilities This is an important book offering a groundbreaking account of WWI aerial tactics and a thorough examination of the final combat and death of the Red Baron

Warfare in World History Michael S. Neiberg, 2001 Covering the major periods of military history Neiberg details the

evolution of technology in weaponry as well as the social political and cultural forces at the heart of these key conflicts From the pre gunpowder era to the wars of liberation fought across the Third World this survey focuses not only on the famous and heroic but also on the countless millions who have fought for these causes throughout history *Twilight War* Mike Moore,2008-03-03 Considering the historical background of space militarization and providing an overview of the United States efforts to militarily dominate space since the dawn of the space age this book argues that America must either ensure that space related weapons are verifiably banned for all nations through an international treaty or definitively choose a policy of unilateral space dominance that may lead to an arms race in space and possibly to another cold war The 1967 Outer Space Treaty designated space as the province of all mankind It expressly prohibited nuclear and non nuclear weapons of mass destruction in orbital space and exclusively limited the use of the Moon and other celestial bodies for peaceful purposes But changes in the post Cold War world as well as unforeseeable advances in satellite and weapons technologies have compelled every space faring nation save the U S and Israel to go on record as favoring a new treaty for the Prevention of an Arms Race in Outer Space In *Twilight War The Folly of U S Space Dominance* Mike Moore former editor of *The Bulletin of the Atomic Scientists* argues that the U S merely provokes conflict when it presumes to be the exception to the rule Rejecting treaty negotiations while further militarizing space renders America unable to lead by example Moore concludes that instead of trying to stop an arms race in space by starting one the U S must radically rethink its strategy *Air Pictorial* ,1971

Target Leipzig Alan Cooper,2009-11-19 A gripping account of the RAF s attempt to destroy a Messerschmitt factory in 1944 and the carnage and confusion that unfolded on a dark winter night Seventy nine heavy bombers failed to return from the catastrophic raid on the industrial city of Leipzig on the night of February 19 20 1944 Some 420 aircrew were killed and a further 131 became prisoners of war It was at that time the RAF s most costly raid of World War II by far The town was attacked in an attempt to destroy the Messerschmitt factory that was building the famous and deadly Bf 109 fighter The bomber stream flew into what appeared to be a trap It seemed that the Luftwaffe and anti aircraft guns were aware of the intended target and waiting to pounce as soon as the bombers crossed the coast They were subjected to constant attack by night fighters and intense flak until those aircraft that remained clawed their way home and secured relative safety over the North Sea This book analyzes what went wrong Espionage played a part and two bombers collided shortly after takeoff as did others as they wove their way through enemy searchlights and maneuvered violently to escape Luftwaffe night fighters At the outset poor navigational and meteorological briefings had hindered the bombers attempts to locate the target and confusion reigned The author explains the concept of this third raid on Leipzig and describes the two previous ones in October and December 1943 both of which had been deemed successes He looks at the third raid from every angle including the defending force s and describes the daylight raid that followed on the 20th by the USAAF The book also includes appendices listing all RAF aircraft and crew on the raid route maps and many photographs **Warfare** Kevin P.
