sprawling cities and enormous tracts of agricultural land formed the environment over which millions of men and thousands of the era's most formidable military vehicles fought for their respective overlords and ideologies. The battle for Berlin would technically begin on April 16, 1945, and though it ended in a matter of weeks, it produced some of the war's most climactic events and had profound implications on the immediate future. It ushered in over 45 years of the Cold War.

*War Land on the Eastern Front* by Vejas Gabriel Liulevicius, 2000-05-18. *War Land on the Eastern Front* is a study of a hidden legacy of World War I: the experience of German soldiers on the Eastern front and the long-term effects of their encounter with Eastern Europe. It presents an anatomy of an occupation, charting the ambitions and realities of the new German military state there. Using hitherto neglected sources from both occupiers and occupied, official documents, propaganda, memoirs, and novels, it reveals how German views of the East changed during total war. New categories for viewing the East took root along with the idea of a German cultural mission in these supposed wastelands. After Germany's defeat, the Eastern front's lessons were taken up by the Nazis, radicalized and enacted when German armies returned to the East in World War II. Vejas Gabriel Liulevicius's persuasive and compelling study fills a yawning gap in the literature of the Great War.

**Big Wars** by John Storey, 2021-09-01. World War II was the biggest and most destructive war in history. For two centuries, wars had grown ever larger with the use of more terrible weapons and rising casualties, culminating in the cataclysmic global events of 1939-45. And then quite suddenly, large international wars have all but disappeared. What caused wars to grow in size to such an extent and then shrink so precipitously? Is this a permanent state of affairs, or could big wars make a comeback? Lawyer and historian John P. Storey explores these questions by looking at the evolution of military technology and tactics over the long history of warfare. From ancient bronze spears and chariots to World War II tanks and warplanes, from the nuclear weapons of the Cold War to the drones and robotics of the future, the changes in our methods of waging war have had and will continue to have a major impact on their size and destructiveness. The sobering conclusion Storey makes is that based on past trends and the weapons in the pipeline for the future, there is a much higher risk of there being much bigger wars in the coming decades.

**The Biggest Battles of the Eastern Front During World War II: the Siege of Leningrad, the Battle of Stalingrad, the Battle of Moscow, the Battle of Kursk, and the Battle of Berlin** by Charles River Charles River Editors, 2018-02-27. Includes pictures. Includes accounts of the battles by soldiers and generals on both sides. Includes online resources and a bibliography for further reading. World War II was fought on a scale unlike anything before or since in human history, and the unfathomable casualty counts are attributable in large measure to the carnage inflicted between Nazi Germany and the Soviet Union during Hitler's invasion of Russia and Stalin's desperate defense. The invasion came in 1941, following a nonaggression pact signed between the two in 1939, which allowed Hitler to focus his attention on the west without having to worry about an attack from the eastern front. While Germany was focusing on the west, the Soviet Union sent large contingents of troops to the border region between the two countries, and Stalin's plan to take territory in Poland

and the Baltic States angered Hitler By 1940 Hitler viewed Stalin as a major threat and had made the decision to invade Russia In the course of this contest Russia must be disposed of Spring 1941 The quicker we smash Russia the better Hoyt p 17 The surprise achieved by the German invasion in 1941 allowed their armies to advance rapidly across an incredibly wide front but once winter set in the two sides had to dig in and brace for German sieges of Russian cities In the spring of 1942 Germany once more made inroads toward Stalingrad Stalin s own pet city Not surprisingly he ordered that it be held no matter what There was more than vanity at stake though Stalingrad was all that stood between Hitler and Moscow It also was the last major obstacle to the Russian oil fields in the Caucasus which Stalin needed and Hitler coveted If the city fell so would the rest of the country and Hitler would have an invaluable resource to fuel his armies Meanwhile Leningrad which had a population of roughly three million on the eve of the German attack was one of the victims of the Russian unpreparedness but once the siege began in the fall of 1941 the Soviets knew they were in a desperate struggle to the death In fact the Russians wouldn t have even been given a chance to surrender if they had wanted to because the orders to the German forces instructed them to completely raze the city After the defeat of Soviet Russia there can be no interest in the continued existence of this large urban center Following the city s encirclement requests for surrender negotiations shall be denied since the problem of relocating and feeding the population cannot and should not be solved by us In this war for our very existence we can have no interest in maintaining even a part of this very large urban population The Third Reich s dictator initially viewed Moscow as a relatively trivial objective only to be seized once the Red Army suffered defeat in detail In fact he planned a pause during the bitter Russian winter conserving German strength for a fresh offensive in spring of 1942 Wisely According to Chief of Operations Colonel Heusinger Hitler manifested an instinctive aversion to treading the same path as Napoleon Moscow gives him a sinister feeling At the Battle of Kursk the vast expanses of southern Russia and the Ukraine provided the Eastern Front arena where the armies of Third Reich dictator Adolf Hitler and Soviet dictator Josef Stalin wrestled lethally for supremacy in 1943 Endless rolling plains ideal tank country vast forests sprawling cities and enormous tracts of agricultural land formed the environment over which millions of men and thousands of the era s most formidable military vehicles fought for their respective overlords and ideologies The battle for Berlin would technically begin on April 16 1945 and though it ended in a matter of weeks it produced some of the war s most climactic events and had profound implications on the immediate future It ushered in over 45 years of the Cold War
