Ernest Thompson Seton and Charles G D Roberts as well as popular contemporary authors such as Barbara Gowdy Yann Martel Margaret Atwood and many others By recontextualizing these works with closer attention to contemporary scientific and animal advocacy debates this book offers a fresh new perspective on a wide range of texts **Science in Canada** J.D. Babbitt,1965-12-15 The relationship between science and government currently the subject of much lively debate was one to which E W R Steacie devoted a great deal of his energy and outstanding talents As President of the National Research Council a key position which he held for ten years Dr Steacie played an important role through the inspiration and direction that he gave to science in Canada He was an outspoken critic of any attempt to formulate a broad general plan for science and of any intrusion of administrative considerations into scientific establishments At the time of his death in 1962 Dr Steacie was the accepted leader of Canadian Science as J D Babbitt says in the Introduction to this book He goes on to say that this was a distinction he had attained not alone because of his official position as President of the National Research Council but also because of his outstanding research accomplishments his sure feel for scientific values and his strong personality In Dr Steacie official position and personal ability were happily matched it seemed almost that the wide responsibilities of the National Research Council had been designed with such a man in view E W R Steacie joined the National Research Council of Canada in 1939 as Director of the Division of Chemistry became Vice President Scientific in 1950 and in 1952 President of the Council He served as President for ten years and during that time delivered more than 90 speeches and addresses Using extracts from these speeches Dr Babbitt has skillfully brought together the remarks of Dr Steacie on the development of science in Canada and has given an orderly presentation of his views on the organization of scientific activities The topics covered include Science and the University Science and the Humanities Science and the National Academy Science and Society Government Science Industrial Science and International Science Dr Steacie s pungent almost aphoristic style and the directness of his statements will make this book an exciting and important one not only for scientists who are vitally concerned with the questions he considers but also for that section of the general public who has for too long heard only the opinions of non scientists strongly felt but often ill informed on the relationship of science and society **Great Canadian Vacations** Fodor's,Fodor's Travel Publications, Inc.
