The Politics of Knowledge Patrick Baert,Fernando Domínguez Rubio,2013-03 This volume explores how the relation between knowledge and the political is developing in the rapidly evolving context of knowledge societies By analysing how the traditional boundaries and categories of the political are being redefined in the age of communication technologies and information economies this monograph provides a novel perspective on current debates about knowledge societies

Knowledge Politics Nico Stehr,2005

Science and Democracy Stephen Hilgartner,Clark Miller,Rob Hagendijk,2015 In the life sciences and beyond new developments in science and technology and the creation of new social orders go hand in hand In short science and society are simultaneously and reciprocally coproduced and changed Scientific research not only produces new knowledge and technological systems but also constitutes new forms of expertise and contributes to the emergence of new modes of living and new forms of exchange These dynamic processes are tightly connected to significant redistributions of wealth and power and they sometimes threaten and sometimes enhance democracy Understanding these phenomena poses important intellectual and normative challenges neither traditional social sciences nor prevailing modes of democratic governance have fully grappled with the deep and growing significance of knowledge making in twenty first century politics and markets Building on new work in science and technology studies STS this book advances the systematic analysis of the coproduction of knowledge and power in contemporary societies Using case studies in the new life sciences supplemented with cases on informatics and other topics such as climate science this book presents a theoretical framing of coproduction processes while also providing detailed empirical analyses and nuanced comparative work

Science and Democracy Knowledge as Wealth and Power in the Biosciences and Beyond will be interesting for students of sociology science technology studies history of science genetics political science and public administration

Beyond Technocracy Massimiano Bucchi,2009-06-02 Nuclear energy stem cell technology GMOs the more science advances the more society seems to resist But are we really watching a death struggle between opposing forces as so many would have it Can today s complex technical policy decisions coincide with the needs of a participatory democracy Are the two sides even equipped to talk to each other

Beyond Technocracy Science Politics and Citizens answers these questions with clarity and vision Drawing upon a broad range of data and events from the United States and Europe and noting the blurring of the expert lay divide in the knowledge base the book argues that these conflicts should not be dismissed as episodic or the outbursts of irrationality and ignorance but recognized as a critical opportunity to discuss the future in which we want to live

Massimiano Bucchi s

analysis covers the complex realities of post academic science as he Explores the widely debated theme of science and democracy across a broad range of technological controversies Overviews issues raised by the current relationship among scientists policymakers business interests and the public Dispels stereotypes of the detached scientific community versus the uninformed general public Examines the role of the media in framing scientific debate Addresses the question of how to move beyond technocracy to a more fruitful collaboration between scientists and citizens Offers a bold vision for a future in which the scientific and public spheres regard each other as partners working toward a shared purpose Beyond Technocracy Science Politics and Citizens has great value as a postgraduate text for courses in technology and society political science and science policy It will also find an interested audience among scientists policymakers managers in the technological sector and concerned lay readers

Designs on Nature Sheila Jasanoff, 2005 Biology and politics have converged across much of the industrialized world Taking a look at some twenty five years of scientific and social development this work compares the politics and policy of the life sciences in Britain Germany the United States and in the European Union as a whole *States of Knowledge*, 2004 *Bioinformational Philosophy and Postdigital Knowledge Ecologies* Michael A. Peters, Petar Jandrić, Sarah Hayes, 2023-04-23 The book presents a cross disciplinary overview of critical issues at the intersections of biology information and society Based on theories of bioinformationalism viral modernity the postdigital condition and others this book explores two inter related questions Which new knowledge ecologies are emerging Which philosophies and research approaches do they require The book argues that the 20th century focus on machinery needs to be replaced at least partially by a focus on a better understanding of living systems and their interactions with technology at all scales from viruses through to human beings to the Earth's ecosystem This change of direction cannot be made by a simple relocation of focus and or funding from one discipline to another In our age of the Anthropocene human and planetary biology cannot be thought of without digital technology and society Today's curious bioinformational mix of blurred and messy relationships between physics and biology old and new media humanism and posthumanism knowledge capitalism and bio informational capitalism defines the postdigital condition and creates new knowledge ecologies The book presents scholarly research defining new knowledge ecologies built upon emerging forms of scientific communication big data deluge and opacity of algorithmic operations Many of these developments can be approached using the concept of viral modernity which applies to viral technologies codes and ecosystems in information publishing education and emerging knowledge journal systems It is within these overlapping theories and contexts that this book explores new bioinformational philosophies and postdigital knowledge ecologies
