Evaluation of Mineral Reserves Andre G. Journel, Phaedon C. Kyriakidis, 2004-05-27 This book addresses the practice of geostatistical simulation to evaluation of mineral reserves prediction of recovered tonnages and mineral grades and the impact of mining dilution Such prediction is absolutely critical for mine planning and investment decisions yet it cannot be made on maps directly interpolated from present data Various dilution factors need to be introduced to account for the support effect mining unit volumes are vastly different from composite data unit volumes the information effect future selection of ore waste will be based on vastly different data than that presently available Geostatistical simulations allow a rigorous evaluation of these effects on reserves recovery These stochastic simulations have the potential to be for the mining industry what a wind tunnel is for aircraft design This book is written by two expert geostatisticians Journel is the pioneer of mining geostatistics and established academics

Scholz, Friedrich-Wilhelm Wellmer, Michael Mew, Gerald Steiner, 2025-09-12 This book provides a conceptual framework presenting a description and modelling of the regulating mechanisms of supply demand and supply demand dynamics sketches the most relevant classification systems of phosphorus deposits and outlines how they are related and how they should be improved to provide reliable comparable classification which is accepted by mining companies geological surveys science industry politicians and the public For anticipating how the phosphate reserves are increasing by increasing

market values of phosphorus we use the Cumulative Availability Curve CAC approach The presented data for supply and demand dynamics reveal that given our current knowledge due to the abundance of phosphate rock sufficient phosphorus supply will be feasible for at least 1000 years The book stresses desiderata in knowledge and technology development particularly for the reduction of losses and thus a decrease of negative environmental impacts and an improvement of the use efficiency The book is designed as a fact book For all essential statements e g Mineral phosphorus will be available for at least a millenium rather than 300 years The total use efficiency of phosphorus is less than 10% the reader will find solid scientific references or calculations which can be used by researchers mineral industry and business actors policymakers governmental institutions NGOs etc Advances in Energy Science and Equipment Engineering Shiquan Zhou, Aragona Patty, Shiming Chen, 2015-11-05 Advances in Energy Equipment Science and Engineering contains selected papers from the 2015 International Conference on Energy Equipment Science and Engineering ICEESE 2015 Guangzhou China 30-31 May 2015 The topics covered include Advanced design technology Energy and chemical engineering Energy and environmental engineering Energy scien Advances in Applied Strategic Mine Planning Roussos Dimitrakopoulos, 2018-01-17 This book presents a collection of papers on topics in the field of strategic mine planning including orebody modeling mine planning optimization and the optimization of mining complexes Elaborating on the state of the art in the field it describes the latest technologies and related research as well as the applications of a range of related technologies in diverse industrial contexts

Brownfields IV E. Beriatos, C. A. Brebbia, 2008-04-18 Rehabilitation of brownfields particularly those which are contaminated can be an expensive undertaking and requires not only technical solutions but the involvement of financial regulatory and community stakeholders Fundamental to this process is the analysis of the risks involved and the development of the appropriate strategies Those need to be weighted against the economic and social benefits of brownfield development to assess the general viability of the redevelopment In most cases the demand for development land drives the process forward while sometimes the rehabilitation is grounded on the wish to restore the landscape and the ecology of a region This volume contains the proceedings of the Fourth International Conference on Prevention Assessment Rehabilitation and Development of Brownfield Sites that was held in Cephalonia Greece in May 2008 Brownfield development is in most cases essential to attract new business to the locality and for the creation of healthy communities Therefore there is a great need for deeper research and study of all aspects of the problem technical institutional financial social and an exchange of ideas know how and experience among experts and scientists The proceedings have been arranged into the following sections Rehabilitation of Brownfields Development Issues Remediation Studies and Technologies Case Studies Risk Assessment and Management Community and Public Involvement *Being Nuclear* Gabrielle Hecht, 2014-08-29 The hidden history of African uranium and what it means for a state an object an industry a workplace to be nuclear Uranium from Africa has long been a major source of fuel for nuclear power and atomic weapons including the bomb dropped on Hiroshima In 2003 after

the infamous yellow cake from Niger Africa suddenly became notorious as a source of uranium a component of nuclear weapons But did that admit Niger or any of Africa s other uranium producing countries to the select society of nuclear states Does uranium itself count as a nuclear thing In this book Gabrielle Hecht lucidly probes the question of what it means for something a state an object an industry a workplace to be nuclear Hecht shows that questions about being nuclear a state that she calls nuclearity lie at the heart of today s global nuclear order and the relationships between developing nations often former colonies and nuclear powers often former colonizers Hecht enters African nuclear worlds focusing on miners and the occupational hazard of radiation exposure Could a mine be a nuclear workplace if as in some South African mines its radiation levels went undetected and unmeasured With this book Hecht is the first to put Africa in the nuclear world and the nuclear world in Africa By doing so she remakes our understanding of the nuclear age

Mining and the Environment

Karlheinz Spitz, John Trudinger, 2019-08-20 The history of mining is replete with controversy of which much is related to environmental damage and consequent community outrage Over recent decades this has led to increased pressure to improve the environmental and social performance of mining operations particularly in developing countries The industry has responded by embracing the ideals of sustainability and corporate social responsibility Mining and the Environment identifies and discusses the wide range of social and environmental issues pertaining to mining with particular reference to mining in developing countries from where many of the project examples and case studies have been selected Following an introductory overview of pressing issues the book illustrates how environmental and social impact assessment such as defined in The Equator Principles integrates with the mining lifecycle and how environmental and social management aims to eliminate the negative and accentuate the positive mining impacts Practical approaches are provided for managing issues ranging from land acquisition and resettlement of Indigenous peoples to the technical aspects of acid rock drainage and mine waste management Moreover thorough analyses of ways and means of sharing non transitory mining benefits with host communities are presented to allow mining to provide sustainable benefits for the affected communities This second edition of Mining and the Environment includes new chapters on Health Impact Assessment Biodiversity and Gender Issues all of which have become more important since the first edition appeared a decade ago The wide coverage of issues and the many real life case studies make this practice oriented book a reference and key reading It is intended for environmental consultants engineers regulators and operators in the field and for students to use as a course textbook As much of the matter applies to the extractive industries as a whole it will also serve environmental professionals in the oil and gas industries Karlheinz Spitz and John Trudinger both have multiple years of experience in the assessment of mining projects around the world The combination of their expertise and knowledge about social economic and environmental performance of mining and mine waste management has resulted in this in depth coverage of the requirements for responsible and sustainable mining
