Krause,Kim Kihwan,2023-11-15 Economic growth in all developing countries is guided and often accelerated by generally intrusive policies implemented by governments intent on playing an active role in furthering development As economies have grown and become more complex however even small market distortions are magnified and the tendency is to rely more heavily on the market for continued growth In this volume leading experts in economic development examine the variety of issues that arise as governments in some of the newly industrializing countries of Southeast Asia such as South Korea Taiwan and Singapore grapple with this difficult process of liberalization This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek

Gable,1963 **Capital Exports to Less Developed Countries** W. Guth,2013-03-09 There is little need today for an author publishing a work on less developed countries to emphasise the importance of this question In view of the large and increasing number of publications on this subject and in fairness to the reader it seems appropriate however to outline briefly what the book sets out to describe As the title conveys I have concentrated on the financial side of the problem without neglecting altogether the important political social and human aspects I have primarily dealt with the problems of capital formation capital transfer capital employment and the associated balance of payments considerations The attempt is made to set out in an integrated analysis the problems of capital exports to less developed countries both from the point of view of the creditor and of the debtor be they countries or individuals This method appeared all the more appropriate since the provision of long term funds for capital exports and the question of their employment in the capital importing countries are so closely interconnected that they could hardly be treated separately *Research on International Affairs* United States.
