**Changing**

**Gender Patterns of Work in Global Value Chains** Stephanie Barrientos, 2019-05-23 This book focuses on the changing gender patterns of work in a global retail environment associated with the rise of contemporary retail and global sourcing. This has affected the working lives of hundreds of millions of workers in high middle and low income countries. The growth of contemporary retail has been driven by the commercialised production of many goods previously produced unpaid by women within the home. Sourcing is now largely undertaken through global value chains in low or middle income economies using a cheap feminised labour force to produce low price goods. As women have been drawn into the labour force, households are increasingly dependent on the purchase of food and consumer goods, blurring the boundaries between paid and unpaid work. This book examines how gendered patterns of work have changed and explores the extent to which global retail opens up new channels to leverage more gender equitable gains in sourcing countries.

**Dimensions of Poverty** Valentin Beck, Henning Hahn, Robert Lepenies, 2020-06-10 This anthology constitutes an important contribution to the interdisciplinary debate on poverty measurement and alleviation. Absolute and relative poverty both within and across state boundaries are standardly measured and evaluated in monetary terms. However, poverty researchers have highlighted the shortfalls of one dimensional monetary metrics. A new consensus is emerging that effectively addressing poverty requires a nuanced understanding of poverty as a relational phenomenon involving deprivations in multiple dimensions including health, standard of living, education and political participation. This volume advances the debate on poverty by providing a forum for philosophers and empirical researchers. It combines philosophically sound analysis and genuinely global research on poverty's social embeddedness. Next to an introduction to this interdisciplinary field which links Practical Philosophy, Development Economics, Political Science and Sociology, it contains articles by leading international experts and early career scholars. The contributors analyse the concept of poverty, detail its multiple dimensions, reveal epistemic injustices in poverty research and reflect on the challenges of poverty related social activism. The unifying theme connecting this volume's contributions is that poverty must be understood as a multidimensional and socially relational phenomenon and that this insight can enhance our efforts to measure and alleviate poverty.

Alozie, 2015-01-06 Capitalist Realism in Africa: Realities and Myths in Advertising is a multifaceted analysis of the role of advertising in the national development of Nigeria and by extension other African Nations. The book examines the unique political, cultural and religious systems that create the context for advertising in African countries and describes the unique historical, social, economic, communication and political context within which the practice of advertising takes place. Since the end of the Cold War, the several African nations or emerging countries have undertaken concrete efforts to reform their political, social and economic institutions as

they strive to join the global economy and improve the socioeconomic conditions of their citizens To achieve these goals administrators have relied on various forms of mass media including advertising to promote these reforms and socioeconomic development Despite some unique challenges and opportunities as well as controversies surrounding the role of advertising in developing economies advertising literature relevant to African countries remains in a blind spot Capitalist Realism in Africa Realities and Myths in Advertising bridges this gap by offering an in depth analysis of advertising in an area of the world that has been largely neglected and provides a ground for generating a discussion about the practice of advertising in an African context
