<http://www.blumandcolvin.org>      **An Economist's Lessons on Happiness** Richard A. Easterlin, 2021-03-01 Once called the dismal science economics now offers prescriptions for improving people's happiness. In this book Richard Easterlin, the father of happiness economics, draws on a half century of his own research and that conducted by fellow economists and psychologists to answer in plain language questions like: Can happiness be measured? Will more money make me happier? What about finding a partner? Getting married? Having a baby? More exercise? Does religion help? Who is happier: women or men, young or old, rich or poor? How does happiness change as we go through different stages of life? Public policy is also in the mix. Can the government increase people's happiness? Should the government increase their happiness? Which countries are the happiest and why? Does a country need to be rich to be happy? Does economic growth improve the human lot? Some of the answers are surprising: no more money won't do the trick; neither will economic growth; babies are a mixed blessing, but they are all based on reason and well-vetted evidence from the fields of economics and psychology. In closing, Easterlin traces the genesis of the ongoing Happiness Revolution and considers its implications for people's lives down the road.      **Economic Thought and the Irish Question 1817-1870** R. D. Collison Black, 2015-02-12 Originally published in 1960, this book presents a discussion of the relationship between economic theory and economic policy in relation to nineteenth-century Irish history. The text focuses on the period 1816-70 and covers a variety of areas including the land system, absentee landlords, the poor law, private enterprise, free trade, public works, and emigration. A bibliography is included and detailed notes are incorporated throughout. This book will be of value to anyone with an interest in Irish history, British foreign policy, and economic theory.      **Population Growth** Noah Berlatsky, 2009-08-07 As technology makes the world more accessible, it is increasingly important to develop a wide perspective on social issues as well as political, environmental, and health issues of global significance. This volume focuses on the issue of population growth from a variety of international perspectives. Readers will evaluate population growth and its relationship to hunger, the environment, the economy, and society. Essay sources include WALHI, The Indonesian Forum for Environment, The Economist, and The Galapagos Conservancy. Helpful features include an annotated table of contents, a world map, and country index, a bibliography, and a subject index.      **The State of Nature** Gregg Mitman, 1992-10 Although science may claim to be objective, scientists cannot avoid the influence of their own values on their research. In *The State of Nature*, Gregg Mitman examines the relationship between issues in early twentieth-century American society and the sciences of evolution and ecology to reveal how explicit social and political concerns influenced the scientific agenda of biologists at the University of Chicago and throughout the United States during the first half of this century. Reacting against the view of nature red in tooth and claw, ecologists and behavioral biologists such as Warder Clyde Allee, Alfred Emerson, and their colleagues developed research programs they hoped would validate and promote an image of human society as essentially cooperative rather than competitive. Mitman argues that Allee's religious training and pacifist convictions shaped his pioneering studies of animal communities in a way that could be

generalized to denounce the view that war is in our genes
