## **Ecovillages A Practical Guide To Sustainable Communities:**

Ecovillages Jan Martin Bang,2005-09-01 A unique combination of permaculture design and ecovillage planning with examples from around the world      **Utopianism: A Very Short Introduction** Lyman Tower Sargent,2010-09-23 One of the leading scholars in the field of utopian studies examines utopianism and its history publisher description      **Eco-Homes** Doctor Jenny Pickerill,2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us      **Ecomuseums 2nd Edition** Peter Davis,2011-06-02      **Permaculture** Craig Gibsone,Jan Martin Bang,2015-06-22 Permaculture design as divine creative activity Permaculture looks for the patterns embedded in our natural world as inspirations for designing solutions to the many challenges we are presented with today It is a philosophical spiritual and practical approach to the use of the land integrating microclimate functional plants animals soils water management and human needs into intricately connected highly productive systems In essence permaculture uses observation as basis for creating sustainable and effective human settlements The authors discuss the components Earthshare Fairshare and Peoplecare with a specific emphasis on the spiritual aspects of the design process Topics range from soil and plants energy sources and house design to alternative economics group process governance and spiritual nurturing and enquiry Examples of existing permaculture structures from around the world most notably from the Findhorn Community Eco Village bring the concepts to life First hand accounts of how people got started on their permaculture project lend a personal touch The first book to look at the spiritual aspects as well as the practical implementation of permaculture design      Urban Utopias Malcolm Miles,2007-11-21 Utopia tends to generate a bad press regarded as impracticable perhaps nostalgic or contradictory when visions of a perfect world cannot accommodate the change that is necessary to a free and self organizing society But people from diverse backgrounds are currently building a new society within the old balancing literal and metaphorical utopianism and demonstrating plural possibilities for alternative futures and types of settlement Thousands of such places exist around the world including intentional communities eco villages permaculture plots religious and secular retreats co housing projects self build schemes projects for low impact housing and activist squats in urban and rural sites This experience suggests however that when

planning and design are not integral to alternative social formations the modern dream to engineer a new society cannot be realized The book is structured in four parts In part one literary and theoretical utopias from the early modern period to the nineteenth century are reconsidered Part two investigates twentieth century urban utopianism and contemporary alternative settlements focusing on social and environmental issues activism and eco village living Part three looks to wider horizons in recent practices in the non affluent world and Part four reviews a range of cases from the author s visits to specific sites This is followed by a short conclusion in which a discussion of key issues is resumed This book brings together insights from literary theoretical and practical utopias drawing out the characteristics of groups and places that are part of a new society It links today s utopian experiments to historical and literary utopias and to theoretical problems in utopian thought

Communes in America, 1975-2000 Timothy Miller, 2019-03-26 Communes in America 1975 2000 is the final volume in Miller s trilogy on the history of American intentional communities Providing a comprehensive survey of communities during the last quarter of the twentieth century Miller offers a detailed study of their character scope and evolution Between 1975 and 2000 the American communal experience evolved dramatically in response to social and environmental challenges that confronted American society as a whole Long accepted social norms and institutions family religion medicine and politics were questioned as the divorce rate increased interest in spiritual teachings from Asia grew and alternative medicine gained ground Cohousing flourished as a response to an increasing sense of alienation and a need to balance community and private lives At the same time Americans became increasingly concerned with environmental protection and preservation of our limited resources In the face of these social changes communal living flourished as people sought out communities of like minded individuals to pursue a higher purpose Organized topically each chapter in the volume provides basic information about various types of communities and detailed examples of each type from ecovillages and radical Christian communities to pagan communes and cohousing experiments Miller also takes a step back to look at the prevalence of communal living in American life over the twentieth century Based on exhaustive research Miller s final volume provides an indispensable survey and guide to understanding utopianism s enduring presence in American culture

The Tiny House Movement Tracey Harris, 2018-10-15 The Tiny House Movement Challenging Consumer Culture features in depth interviews with movement residents builders and advocates as well as the author s insights from her fieldwork of living tiny In it we learn how the movement is challenging consumerism overwork and environmental destruction and facilitating a more meaningful understanding of home This book highlights that the tiny house movement is more than a lifestyle choice and that the movement challenges the consumerist lifestyle In Canada and the United States we are taught that bigger is better and that constant growth in our personal wealth accumulation and in the economy is a sign of our success We sacrifice well being and life satisfaction because of our relationship with stuff This leads to personal debt and unsustainability in our relationships communities and the environment This is the first book to examine the tiny house movement as a challenge to consumer

culture by demonstrating its potential to offer individual collective and societal change      *Hijacking Sustainability* Adrian Parr, 2012-02-10 How the sustainability movement has been co-opted from ecobranding by Wal Mart to the greening of the American military The idea of sustainability has gone mainstream Thanks to Prius driving movie stars it's even hip What began as a grassroots movement to promote responsible development has become a bullet point in corporate ecobranding strategies In *Hijacking Sustainability* Adrian Parr describes how this has happened how the goals of an environmental movement came to be mediated by corporate interests government and the military Parr argues that the more popular sustainable development becomes the more commodified it becomes the more mainstream culture embraces the sustainability movement's concern over global warming and poverty the more sustainability culture advances the profit maximizing values of corporate capitalism And the more issues of sustainability are aligned with those of national security the more military values are conflated with the goals of sustainable development Parr looks closely at five examples of the hijacking of sustainability corporate image greening Hollywood activism gated communities the greening of the White House and the incongruous efforts to achieve a sustainable army Parr then examines key challenges to sustainability waste disposal disaster relief and environmental refugees slum development and poverty Sustainability Parr says offers an alternative narrative of the collective good an idea now compromised and endangered by corporate military and government interests

Eco-Aesthetics Malcolm Miles, 2014-05-08 By moving beyond traditional aesthetic categories beauty the sublime the religious Eco Aesthetics takes an interdisciplinary approach bridging the arts humanities and social sciences and explores what aesthetics might mean in the 21st century It is one in a series of new radical aesthetics promoting debate confronting convention and formulating alternative ways of thinking about art practice There is no doubt that the social and environmental spheres are interconnected but can art and artists really make a difference to the global environmental crisis Can art practice meaningfully contribute to the development of sustainable lifestyles Malcolm Miles explores the strands of eco art eco aesthetics and contemporary aesthetic theories offering timely critiques of consumerism and globalisation and ultimately offers a possible formulation of an engaged eco aesthetic for the early 21st century      **The Communal Idea in the 21st Century**, 2012-09-28 The idea of a better society as associated with the communal idea is investigated from both theoretical perspectives and through contemporary experiences around the world This idea leaves nobody indifferent Whatever the hardship that its concretization implies however once it does materialize it cannot as such avoid new challenges tensions and unexpected claims This means at varying degrees negations of and removals from the utopian inspiration Humans are able to create unprecedented conditions of life under most ambitious inspirations but are unable to safeguard their achievements from change alterations and contradictions In this however another aspect of the utopian realizations is that they ultimately leave room for new utopist thinking and enrolment As far indeed the utopian inspiration draws its vitality from potent civilizational codes its renewal from ashes is as unavoidable as its self betrayal through

materialistic values evolved to make us such wasteful consumers and how corporations profit at our expense The bad news is that rising prices of oil may bankrupt our economy unless we learn how to reduce our energy use The good news is that earth centered values are being affirmed by increasing numbers of people The book shows how earth centered spirituality can help us live more modestly on the earth and preserve the climate      *The Americas and Oceania: Assessing Sustainability* Ray C. Anderson, Sara G. Beavis, Michael L. Dougherty, Tirso Gonzales, Ricardo Braun, Muhammad Aurang Zeb Mughal, Mark Wilson, 2012-11-01 The Americas and Oceania Assessing Sustainability provides extensive coverage of sustainability practices in two regions linked culturally and historically by their relative isolation before the Columbian exchange by their colonization after it and by the challenges of pollution resource overuse and environmental degradation Regional experts and international scholars focus on environmental history in areas such as the South Pacific islands now particularly threatened by rising ocean levels due to climate change and on countries whose governments and corporations can play a major role in promoting or discouraging sustainable choices Brazil an emergent power on the world stage the United States the world's third most populous nation and New Zealand seemingly on its way to becoming an enviable model of sustainable development      **Oikos: God's Big Word for a Small Planet** Andrew Francis, 2017-04-25 How you spend your time and money controls what happens on this planet Planet Earth and its people are in danger We face ongoing economic and ecological crises These will deepen unless all of God's people begin to act as one global community Natural resources are diminishing and the economic world order is changing We cannot go on living as though we can call up another planet Change is needed now and this book addresses that The biblical vision of the world as oikos meaning household is God's challenge to all people about the way we live now and in the future Oikos affirms the need for reconciliation and peace between faiths and nations and should determine our economic practices and how we care for the planet In this timely and challenging book is a renewed call to follow the Maker's instructions Whether it is 9/11 Chernobyl or the 2008 financial crash that call for change is repeating itself This book not only explains why we need to change but also provides practical advocacy of how you can help to achieve it      Space, Power and the Commons Samuel Kirwan, Leila Dawney, Julian Brigstocke, 2015-10-23 Across the globe political movements opposing privatisation enclosures and other spatial controls are coalescing towards the idea of the commons As a result struggles over the commons and common life are now coming to the forefront of both political activism and scholarly enquiry This book advances academic debates concerning the spatialities of the commons and draws out the diverse materialities temporalities and experiences of practices of commoning Part one Materialising the Commons focuses on the performance of new geographical imaginations in spatial and material practices of commoning Part two Spaces of Commoning explores the importance of the turn from commons to commoning bringing together chapters focusing on the doing of commons and how spaces materials bodies and abstract flows are intertwined in these complex and excessive processes Part three An Expanded Commons explores the broader registers and spaces in which

the concept of the commons is at stake and highlights how and where the commons can open new areas of action and research Part four The Capture of the Commons questions the particular interdependence of the commons and enclosure assumed within commons literature framed by the concept of neoliberalism Providing a comprehensive introduction to the diverse ways in which ideas of the commons are being conceptualised and enacted both throughout the social sciences and in practical action this book foregrounds the commons as an arena for political thought and sets an agenda for future research

Finding Community Diana Leafe Christian, 2007-05-01 Finding community is as critical as obtaining food and shelter since the need to belong is what makes us human The isolation and loneliness of modern life have led many people to search for deeper connection which has resulted in a renewed interest in intentional communities These intentional communities or ecovillages are an appealing choice for like minded people who seek to create a family oriented and ecologically sustainable lifestyle a lifestyle they are unlikely to find anywhere else However the notion of an intentional community can still be a tremendous leap for some deterred perhaps by a misguided vision of eking out a hardscrabble existence with little reward In fact successful ecovillages thrive because of the combined skills and resources of their members Finding Community presents a thorough overview of ecovillages and intentional communities and offers solid advice on how to research thoroughly visit thoughtfully evaluate intelligently and join gracefully Useful considerations include Important questions to ask of members and of yourself Signs of a healthy and not so healthy community Cost of joining and staying Common blunders to avoid Finding Community provides intriguing possibilities to readers who are seeking a more cooperative sustainable and meaningful life Diana Leafe Christian is the author of Creating a Life Together and editor of Communities magazine She lives at Earthhaven Ecovillage in North Carolina
