The Grandfather of Black Basketball Edwin Bancroft Henderson II, 2024-02-20. The first contemporary biography of the man credited with introducing basketball to African Americans on a wide scale organized basis. Dr. Edwin Bancroft Henderson was the son of working-class parents born in slavery. A driven, intelligent, and charismatic young man, Henderson attended Harvard University's Dudley Sargent School of Physical Training. There, he met the leaders in the new field of physical education and recognized athletics and basketball, especially as a public health initiative and a way that young Blacks could gain college scholarships and debunk the idea of racial inferiority. In *The Grandfather of Black Basketball: The Life and Times of Dr. E. B. Henderson*, Edwin Bancroft Henderson II, Dr. Henderson's grandson provides unprecedented detail and fascinating insight into this influential figure in Black history. Henderson organized the first athletic league for Blacks, introduced basketball to Black people on a wide scale organized basis, and founded associations to train and organize Black officials and referees. He also wrote and co-edited the first Spalding publication that highlighted the exploits of African American participation in sports and authored *The Negro in Sports*. Outside of athletics, Henderson was instrumental in founding the first rural branch of the NAACP, advocated for school desegregation, and held executive board positions with multiple NAACP branches. Overlooked for decades, Henderson was finally enshrined in the National Basketball Hall of Fame in 2013 as a contributor. *The Grandfather of Black Basketball* gives long overdue recognition to a sports pioneer, civil rights activist, author, educator, and pragmatic humanitarian who fought his entire life to improve opportunities for youth through athletics.

Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12. This second edition of the *Handbook of Communication and Aging Research* captures the ever-changing and expanding domain of aging research. Since it was first recognized that there is more to social aging than demography, gerontology has needed a communication perspective. Like the first edition, this handbook sets out to demonstrate that aging is not only an individual process but an interactive one. The study of communication can lead to an

understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging
