## Granta 85 Hidden Histories:

Alive, Alive Oh! Diana Athill, 2020-03-31 Enchanting Diana Athill 98 still has a few things to teach us about growing old with dignity and humor and grace Astute and sparkling Associated Press Several years ago Diana Athill accepted that she could no longer live entirely independently and moved to a retirement home in Highgate Released from the daily anxieties of caring for her own property and free to settle into her remaining years she reflects on what it feels like to be very old and on the moments in her long life that have risen to the surface and which sustain her in these last years What really matters in the end Which memories stand out As she approaches her 100th year Athill recalls in sparkling precise detail the exact layout of the garden of her childhood a vast and beautiful park attached to a large house relates with humor clarity and honesty her experiences of the First and Second World Wars and her trips to Europe as a young woman and in the remarkable title chapter describes her pregnancy at the age of forty three losing the baby and almost losing her life and her gratitude and joy on discovering that she had survived Alive Alive Oh is so beautifully written and exquisitely detailed Athill mines her memories of a life well lived and generously lays them out on the page for the rest of the world to enjoy Star Tribune Witty candid If you haven't read Athill and open her latest book expecting serene reflections from a nonagenarian sipping tea in her garden you're in for a surprise San Francisco Chronicle *The Bulletin*, 2004 *Archives*, 2007 **Hidden Histories** Ian Jack, 2004 This issue of Granta excavates histories both personal and political repressed memories unexplored lives forgotten wars secret careers Parapsychology David Groome, Ron Roberts, 2016-11-07 Containing contributions from leading paranormal researchers this edition of Parapsychology continues to challenge and provoke readers with some of psychology's most puzzling phenomena Whether believers or sceptics the book provides readers with the opportunity to further their understanding of the paranormal bridging the gap between traditional psychology and its so called fringe areas Featuring updates to many of the original chapters this book brings readers up to date with the wealth of radical research in the field This edition also includes several new chapters covering subjects as diverse as possession and exorcism conspiracy theories reincarnation and religious belief many of which are extremely relevant in the world today Drawing on a range of research the book provides a balanced introduction to parapsychology exploring the strengths and limitations of scientific investigation itself Parapsychology is for readers from a variety of backgrounds professionals in the field students lay readers and anyone who wants to understand what the paranormal can tell us about ourselves A variety of viewpoints are on offer with the emphasis on the reader to make up their own mind Prepared to be unsettled again **Inside the Neolithic Mind: Consciousness, Cosmos, and the Realm of the Gods** David Lewis-Williams, David Pearce, 2005-10-01 An exploration of how brain structure and cultural content interacted in the Neolithic period 10 000 years ago to produce unique life patterns and belief systems What do the headless figures found in the famous paintings at Catalhoyuk in Turkey have in common with the monumental tombs at Newgrange and Knowth in Ireland How can the concepts of birth death and wild cast light on the

archaeological enigma of the domestication of cattle What generated the revolutionary social change that ended the Upper Palaeolithic David Lewis Williams's previous book *The Mind in the Cave* dealt with the remarkable Upper Palaeolithic paintings carvings and engravings of western Europe Here Dr Lewis Williams and David Pearce examine the intricate web of belief myth and society in the succeeding Neolithic period arguably the most significant turning point in all human history when agriculture became a way of life and the fractious society that we know today was born The authors focus on two contrasting times and places the beginnings in the Near East with its mud brick and stone houses each piled on top of the ruins of another and western Europe with its massive stone monuments more ancient than the Egyptian pyramids They argue that neurological patterns hardwired into the brain help explain the art and society that Neolithic people produced Drawing on the latest research the authors skillfully link material on human consciousness imagery and religious concepts to propose provocative new theories about the causes of an ancient revolution in cosmology and the origins of social complexity In doing so they create a fascinating neurological bridge to the mysterious thought lives of the past and reveal the essence of a momentous period in human history 100 illustrations 20 in color

**Collocations in Science Writing** Christopher J. Gledhill,2000 A Homeric Catalogue of Shapes Charlayn von Solms,2019-11-14 In the popular imagination Homer as author of the Iliad and the Odyssey epitomises poetic genius So when scholars proposed that the Homeric epics were not the unique creation of an individual author but instead reflected a traditional compositional system developed by generations of singer poets swathes of assumptions about the poems and their author were swept aside and called into question Much had to be re evaluated through a new lens The creative process described by scholars for the Homeric epics shares many key attributes with the modern visual art forms of collage and its less familiar variant sculptural assemblage A Homeric Catalogue of Shapes describes a series of twelve sculptures that together function as an abstract portrait of Homer not a depiction of him as an individual but as a compositional system The technique by which the artworks were produced reflects the poetic method that scholars termed oral formulaic In both of these creative processes the artwork is constructed from pre existing elements such as phrases characters and plot lines in the epics and objects fragmented items and borrowed forms in the sculptures The artist author presents a largely unknown characterisation of Homeric poetics in a manner that emphasizes the extent and complexity of this Homer s artistry
